

MUHAMMED ABDUL RAHOOF M

Kochi, India | +91 7994221003 | rahoofmuhammed768@gmail.com | <https://www.linkedin.com/in/rahoof>

Full Stack Developer with 2+ years of experience in building scalable ERP, POS, and cloud-based web applications using PHP, CodeIgniter, React.js, and MERN stack. Skilled in RESTful API development, database optimization, cloud deployment, and secure system design. Proven ability to deliver high-quality, business-focused solutions in fast-paced environments.

EXPERIENCE

LABONTE TECHNOLOGIES PRIVATE LIMITED | Kochi, Kerala (JUNE 2024 – PRESENT)

Software Developer

- Designed, developed, and maintained scalable **ERP and business management systems** using **PHP, CodeIgniter, MySQL, and phpMyAdmin**, following secure and optimized coding standards.
- Engineered responsive and high-performance user interfaces using **React.js, JavaScript, jQuery, AJAX, HTML, CSS, Bootstrap, and Tailwind CSS** for improved user experience.
- Implemented **asynchronous data processing** and real-time updates using **AJAX and jQuery**, reducing page load time and enhancing system responsiveness.
- Developed and optimized **POS modules** including billing, returns, exchanges, and advanced reporting features for retail and business operations.
- Deployed, configured, and managed production applications on **Google Cloud Platform (GCP) and aaPanel**, ensuring high availability and scalability.
- Set up and maintained **domains, SSL certificates, databases, and server environments** for secure production deployment.
- Performed proactive **server monitoring, backup management, performance tuning, and troubleshooting** to minimize downtime and ensure system stability.

SYNNEFO SOLUTIONS | Kochi, Kerala (JULY 2023 - JANUARY 2024)

MERN Stack Intern

- Designed and developed full-stack web applications using **MongoDB, Express.js, React.js, and Node.js (MERN Stack)** following MVC architecture.
- Built reusable and optimized **React components** with state management and API integration.
- Developed secure and scalable **RESTful APIs** using Node.js and Express with proper validation and error handling.
- Implemented efficient **CRUD operations**, indexing, and schema design in MongoDB for optimized database performance.
- Integrated front-end and back-end services using **Axios / Fetch API** for real-time data communication.
- Deployed applications on cloud/server environments with environment configuration and production builds.

PROJECTS

Point Of Sale (POS) System | Client-Wise Offline & Centralized ERP

Technologies Used: PHP, CodeIgniter, MySQL, JavaScript, AJAX, jQuery, Bootstrap, ionCube, RESTful APIs.

- Architected a **client-wise offline POS system** integrated with a centralized online ERP, enabling uninterrupted multi-client operations.
- Implemented secure **key-based data synchronization** with automated offline-to-online syncing and strong validation mechanisms.
- Developed **automated local backup and recovery systems** to ensure data protection and prevent transaction loss in offline environments.
- Optimized system performance, inventory management, billing, and reporting to handle high transaction volumes with minimal latency.

Project Management System

Technologies Used: PHP, CodeIgniter, MySQL, phpMyAdmin, JavaScript, AJAX, jQuery, Bootstrap, GCP, aaPanel.

- Built a scalable project management platform suitable for companies across multiple domains to manage client and internal projects.

- Developed automated completion reports, project abstracts, and performance analytics dashboards.
- Implemented task assignment, staff work logs, progress tracking, status monitoring, and client work management features.

Vehicle Rental Management System

Technologies Used: PHP, CodeIgniter, MySQL, phpMyAdmin, JavaScript, AJAX, jQuery, Bootstrap, aaPanel, RESTful APIs, SMTP (Gmail App Password).

- Designed and developed a comprehensive vehicle rental management system with modules for **vehicle creation, classification, and inventory management**.
- Implemented automated **vehicle check-out and check-in workflows** with rental duration tracking and billing integration.
- Integrated **email notification automation** for check-out and check-in events using Gmail SMTP with App Password authentication.
- Developed a **vehicle replacement management feature** to handle breakdowns, maintenance issues, and customer service continuity.
- Integrated real-time **vehicle tracking and status monitoring** to improve fleet utilization and operational efficiency.

Human Resource Management (HRM) Module

Technologies Used: PHP, CodeIgniter, MySQL, phpMyAdmin, JavaScript, AJAX, jQuery, Bootstrap, Excel Import.

- Designed and developed a comprehensive HRM system for managing **employee profiles, attendance, payroll, leave, and performance records**.
- Implemented an **Excel-based bulk upload and data migration feature** to import staff details efficiently and reduce manual data entry.
- Automated **salary calculation, deductions, overtime, and payslip generation** to improve accuracy and operational efficiency.

EDUCATION

JAWAHARLAL COLLEGE OF ENGINEERING AND TECHNOLOGY, PALAKKAD | BTech Computer Science and Engineering (2019-2023)

CGPA: 6.7

ISLAMIC CENTRAL SCHOOL, PALAKKAD, KERALA

Class 12 (2017-2019) | Percentage: 80

Class 10 (2016-2017) | Percentage: 68

CERTIFICATIONS

- MERN Stack Development | issued by Synnefo Solutions
- Programming in Python | issued by Tech By Heart India Pvt. Ltd

SKILLS

- **Programming Languages:** PHP, JavaScript, HTML5, CSS3, SQL
- **Frameworks & Libraries:** CodeIgniter, React.js, Node.js, Express.js, jQuery, Bootstrap, Tailwind CSS
- **Databases:** MySQL, MongoDB, PostgreSQL (Basic)
- **Web Technologies:** AJAX, RESTful APIs, JSON, Responsive Web Design
- **Cloud & Deployment:** Google Cloud Platform (GCP), aaPanel, Domain & SSL Configuration
- **Tools & Version Control:** phpMyAdmin, Git, GitHub, GitHub Desktop, VS Code

LANGUAGES KNOWN

- English, Malayalam, Tamil
-
