- English

PROFESSIONAL EXPERIENCE

Evervent Pvt Ltd. Mohali ,Punjab
Software Engineer
August 2021 – December 2024

Projects

Muthoot Insurance Portal: Led the development and management of the health insurance product for an insurance-based portal. Integrated multiple third-party insurance APIs and implemented secure payment gateway integrations to streamline policy purchase processes.

Multi-Vendor E-commerce Marketplace: Built PHP-based multi-vendor E-commerce platform enabling sellers to manage products,pricing, and orders. Implemented cart, checkout, order management, and secure payment gateway integrations. Worked on third-party API integrations, UAT coordination, and end-to-end delivery with focus on scalability and performance.

JIO Insurance B2C Portal: Led backend development and maintenance of a large-scale insurance broking platform, enabling customers to compare, purchase, and manage insurance policies online. Integrated multiple insurance partner APIs for quote generation, policy issuance, premium calculation, proposal submission, and policy management. Developed and optimized RESTful APIs, payment gateway integrations, customer onboarding workflows, and secure data processing modules, ensuring seamless user experience and operational efficiency.

CAG (Comptroller and Auditor General)

Dialer: Developed an interactive dashboard with graphical call analytics to enable real-time monitoring and informed decision-making. Implemented a robust roles and permissions module to ensure secure access and compliance with government security standards. Managed client communication, coordinated UAT throughout the project lifecycle, and delivered optimized reporting features to enhance operational transparency and auditing efficiency. This was a government project, ensuring adherence to strict compliance and security protocols.

Interbit Solution Pvt Ltd. Mohali ,Punjab

Software Engineer

Jan 2025 – Present

Projects

FundTrack CRM: Developed a full-featured CRM portal for managing finance, funding, and lead generation. Built the backend using PHP and frontend with Angular, and implemented MySQL for data management. Independently handled both front-end and back-end development, including API integrations and dynamic dashboards.
