PROFESSIONAL ACCOMPLISHMENTS

Throughout my career, I've been involved in over 15 Laravel projects, encompassing various aspects such as backend development, theme development, support, and bug fixing. Some of the major projects I've worked on include:

QISQUARED

QISQUARED is a web application designed to offer decision support analytics to stakeholders in financial support ecosystems.

RESPONSIBILITIES

- Backend development using Laravel 8
- Frontend development with Angular
- Creation of REST APIs
- Implementation of new features in the backend

U.S SEC EDGAR DATA PROCESSING

Developed a Laravel application for parsing financial reports published by the American Finance SEC in XML format. The application retrieves data from XML files, saves it into our database, and parses the required information for stock market investors. This project primarily operates through command-line interfaces, utilizing scheduled jobs for automated data processing

RESPONSIBILITIES

- Application developed using Laravel 8
- Created Dockerized environment for the application.
- Handled development and deployment processes.

MOF

MOF is a web application designed to provide job vacancies in Maldives. Users can browse job listings and apply directly through the platform.

RESPONSIBILITIES

NCIT

NCIT is an application focused on providing housing to individuals without homes in Maldives. The system collects applicant details, including financial information and dependent members, to assign a score determining eligibility for housing. The platform includes an admin section for housing authorities to manage collected information and make decisions on housing allocation.

RESPONSIBILITIES

- Developed backend and frontend using Laravel 8.
- Handled development and deployment processes.
- Provided support and performed bug fixing tasks.

TEEYESPEE

TEEYESPEE is an Android application designed for photographers to collaborate and build networks with each other.

RESPONSIBILITIES

- Developed backend using Laravel 6.
- Created APIs to facilitate communication between the app and backend.
- Provided support and performed bug fixing tasks.

KELTRON ERP

KELTRON ERP is a web application focused on the internal financial management system of Keltron. It includes features for generating financial reports.

RESPONSIBILITIES

- Developed backend and frontend using Laravel 6.
- Assisted with support tasks and bug fixing.

TERMS 2.0

TERMS 2.0 is an office automation system developed for the Kerala state stationery department. It serves as an e-commerce web application catering to Kerala government offices, where customers can procure stationery items. Each office is allocated a specific quota for the year, and items are provided based on these quotas.

RESPONSIBILITIES

- Developed backend and frontend using Laravel 6.
 - Assisted with support tasks and bug fixing.
-
