SKILLS

PROFESSIONAL

Technologies: PHP, maven , Java
Frameworks : Laravel, Springboot
Front End : Vue Js
IDEs : Eclips, IntelliJ , STS, VsCode
API Platform : Postman,hipposkotch
Testing Tools : Junit, Mockito
Reporting Tools: Jira
Supporting Tools : sonalLint
Version Controll : Bitbucket , Git

EDUCATION

BACELOR OF COMPUTER APPLICATION

JDT islam college of arts and science
Calicut University
2016-2019

SUMMARY

Leveraging my expertise in full-stack web development, I am actively seeking opportunities to apply my advanced technical skill set and leadership capabilities. With strong hands-on experience in Laravel, Vue.js, RESTful APIs, and scalable application architecture, I bring a balanced blend of programming excellence and solution-oriented thinking. Known for my commitment, attention to detail, and ability to guide teams, I have effectively contributed as a Technical Lead—overseeing development workflows, mentoring team members, and ensuring high-quality, timely project delivery. I am eager to take on a role that not only enhances my technical and managerial strengths but also allows me to contribute meaningfully to organizational growth.

WORKING EXPERIENCE

TECHNICAL LEAD

09 -2025-
Present

FULLSTACK DEVELOPER

Lilac Infotech , Calicut

- Built secure REST APIs, integrated third-party services, and delivered smooth, interactive UIs with Vue.js and Inertia.

●	BACKEND DEVELOPER GJ Global IT Ventures, Calicut (Formaly WR Solutions)	03 - 2021- 08 - 2023
	• Excellent at creating and maintaining architecture for RESTful APIs using Spring Boot. • Knowledge of common API technologies, such as OAUTH, Spring Boot and Microservices. • Good knowledge of third-party using web client	
●	JUNIOR SOFTWARE DEVELOPER POTAFO, Calicut	09 -2020- 03 - 2021
	• Manage Learn about core language and its frameworks • Expertise in debugging techniques, ensuring rapid identification and resolution of issues. • Used Flyway for database version control and migration	
●	SOFTWARE DEVELOPER TRAINEE Quest Innovative Solutions	02 -2020- 07 -2020
	• Learn about new and advanced web technologies. • Learn about core language and its frameworks	
●	SOFTWARE DEVELOPER INTERN Tabsyst	07 -2019- 01 - 2020
	• Manage to earn basics of working in live projects • Contributed ideas and suggestions in team meetings and delivered updates on deadlines, designs and enhancements.	

PROJECTS

For Lilac Infotech

Stethoscope – Hospital Management System

A comprehensive HMS enabling hospitals to manage patients, doctors, staff, EHR records, appointments, IP workflows, pharmacy, and billing. Includes separate portals for hospital, doctor, and patient, with real-time video consultations powered by Agora and fully developed mobile apps.

Samasta eLearning Platform

An educational platform built with Laravel and Vue featuring admin panel, website, and mobile apps. Includes modules for managing students, teachers, courses, exams, results, live classes, and digital learning resources for institutes.

Safix – Taxi Booking (Italy)

A modern ride-hailing platform with customer and driver apps, admin panel, and multiple ride modes. Built for an Italian client with features like live tracking, fare calculation, ride history, and driver management.

Raitero – Taxi Booking (USA)

An on-demand taxi booking system developed for a US client, including driver and customer mobile applications, admin backend, live tracking, payments, and booking management.

BeautyMap – E-commerce & Services (KSA)

E-commerce and service booking platform for beauty products, salon appointments, and events for a Saudi client. Includes cart, checkout, vendor management, service scheduling, and a complete admin backend.

YTE Milk – Subscription E-commerce

A subscription-based milk delivery platform allowing customers to schedule recurring orders, track deliveries, and manage subscriptions. Includes an admin dashboard + a farm tourism module for booking and managing farm visits.

For Koraspond

Bilz – Restaurant Management System

A complete restaurant ecosystem covering table & order management, staff roles, customer app, delivery app, kitchen display system, and stock control. Built using Laravel & Vue with real-time updates to streamline restaurant operations end-to-end.

For CJ Global

Paymento – Fintech Platform

A B2B fintech solution supporting Domestic Money Transfer, bill payments, mobile recharge, and Micro ATM services. Integrated with major vendors like NSDL, Airtel Payments Bank, Eco, and Paysprint, built to support large transaction volume and secure financial operations.

Speed and Safe – Logistics System

A logistics and courier management solution designed for automating shipment planning, dispatching, route management, and operational tracking. Focused on enabling streamlined courier operations with real-time monitoring.

Parkezy – Parking Management System

A microservice-based parking platform for managing vehicles' entry/exit, staff allocation, parking zones, payments, and automated reports. Built with agile methodology, supporting large facilities with structured infrastructure mapping.

Expense Management System

A full-fledged expense workflow system handling petty cash, suspense accounts, approvals, receipts, cheque creation, and financial tracking. Can be integrated into larger enterprise systems and supports multi-level approval flows.

Tweek7 – E-commerce + Service Booking

An e-commerce website combined with a bike service booking module. Users can search for services, book appointments, and the system assigns garages and staff automatically.

Potafo – Classifieds & Marketplace

A Laravel-based food delivery application allowing customers to browse restaurants, view menus, place orders, and track deliveries. Includes restaurant onboarding, order management, delivery partner assignment, offers, and a full-featured admin panel.
