SUMMARY

Proven and results-driven technology professional with hands-on expertise in establishing and managing end-to-end development processes. Adept at navigating Agile methodologies, including seamless execution of sprint planning, backlog grooming, and task tracking using JIRA. Skilled in crafting detailed use cases and ensuring successful delivery across iterative cycles. A front-end development specialist with robust experience in HTML5, CSS3, and modern CSS frameworks such as Bootstrap 4, complemented by strong version control proficiency using GitLab. Demonstrated capability in middleware development with PHP and the Laravel framework, delivering scalable and maintainable backend solutions. Deeply experienced in Learning Management Systems (LMS), particularly Moodle, driving enhancements and customizations that align with organizational learning goals. Known as a self-starter with excellent communication skills, I bring clarity, alignment, and momentum to cross-functional teams. Through a harmonious blend of technical acumen and business insight, I contribute consistently to streamlined operations and elevated user experiences.

EXPERIENCE

Software Engineer

[ApMoSys Technologies Private Limited, Mumbai](#)

Feb'23-May'25

- Led and contributed to multiple enterprise-grade applications across asset management, LMS, governance compliance, and IT infrastructure for internal and client use.
- Developed and maintained modules for CMDB (asset management), Academy (LMS), and Chanakya (tender management) portals using PHP (Laravel), MySQL, PostgreSQL, and JavaScript frameworks via Linux based System.
- Built scalable backend systems and dynamic frontend interfaces for applications like Jupiter (ticketing system) and ESG Prakrit (Environmental, Social, Governance portal for IFCI).
- Created Data Generator tool to simulate large-scale datasets for testing and reporting automation.
- Developed Firewall Rule Certification portal to streamline rule reviews, certifications, and audit trails.
- Integrated role-based access control (RBAC), workflow engines, and dynamic reporting dashboards.
- Participated in requirement analysis, sprint planning, and client demos for iterative delivery.
- Worked with cross-functional teams to deploy, test, and maintain production-ready systems with high availability.

Software Developer

[eAbyas Info Solutions, Hyderabad](#)

Sep'21-Dec'22

- Worked on multiple cloud-based Learning Management System (LMS) platforms including BizLMS and Fractal Analytics Academy, enabling course delivery, certifications, live sessions, and performance tracking across organizational units.
- Developed and maintained features using PHP, Moodle, MySQL, and XAMPP via Linux based System.
- Built dynamic UI components using mustache templates and implemented validation logic.
- Created custom reports using LearnerScript and Moodle's configurable reporting tools.
- Integrated third-party learning platforms (Coursera, Udemy, Percipio) for extended course support.
- Implemented calendar session blocking, live attendance tracking, and learning progress blocks.
- Collaborated with cross-functional teams through reviews, feedback sessions, and development discussions.

Software Engineer

[ATMECS Technologies, Hyderabad](#)

Aug'19-Aug'21

- Worked across multiple internal and client-facing projects including Aspire Intranet, Realty Store, AWAP, and TUI, building enterprise portals, cloud-based infrastructure management tools, and high-traffic websites.
- Developed scalable web applications using PHP (Laravel), Angular, JavaScript, and MySQL.
- Designed and implemented front-end interfaces with HTML5, CSS3, Bootstrap4, and jQuery.
- Worked on templating systems and dashboard-driven configuration tools for workspace and cloud resource management.
- Participated in agile ceremonies, sprint planning, and JIRA-based task management.

- Built use cases, functional flow diagrams, and validation logic to ensure seamless end-to-end integration.
- Optimized application performance and contributed to code reviews to improve code quality and maintainability.
- Integrated external APIs, performed CRUD operations, and implemented dynamic content rendering via AJAX.
- Collaborated with UX designers to enhance UI/UX of client applications.

EDUCATION

Bachelors of Technology in Computer Science & Engineering at B.S.Abdur Rahman Crescent Institute of Science & Technology, Chennai, with aggregate of 9.62 CGPA.

CERTIFICATION

Honours Diploma in Computer Application at Computer Software College (CSC)

SKILLS

PHP,Laravel, HTML5, CSS3, JavaScript, MySQL, Oracle,Bootstrap, XAMPP, REST APIs, Agile/Scrum, Postgresql, Linux Operating System.
