Email: shadan.it017@gmail.com

Results-driven computer science student from University MJPR University passionate about developing user-friendly software applications. Excellent problem-solving skills and ability to perform well in a team. Seeking to help organisation develop their product as a software engineer, as well as grow and develop my own skills as a coder.

SKILLS

PHP, Laravel, NodeJs, ReactJs, MySQL, PostgreSQL, MongoDB, Docker, AWS Lambda, EC2, SNS, SQS, S3, and other AWS services as well,

EXPERIENCE

Anviam Solutions Pvt. Ltd.

02-2023 - Present

Sr. Software Engineer

As Sr. Software Engineer at Anviam Solutions Pvt. Ltd., I have had the opportunity to lead, manage, and collaborate with a dynamic team while working on live projects and handling client relationships. My role encompasses a diverse set of responsibilities aimed at ensuring project success, team cohesion, and client satisfaction.

- Lead and mentor a 4 to 5 member team for live projects.
- Manage client relationships, ensuring satisfaction and project success.
- Contribute directly to project development and troubleshooting.
- Collaborate on project planning and quality assurance.
- Foster teamwork and a culture of continuous improvement.
- Designing schema and system for large scalable systems.
- Direct interaction with Mobile team.

Value Creatives

01-2022 - 02-2023

Sr. Software Engineer

- Collaborate with internal teams and clients to fix and improve products.
- Develop high-quality software design and architecture.
- Managing deployment of software on the server.
- Automate tasks through appropriate tools and scripting.
- Designing APIs for a huge system with proper DB schema design.
- Direct interaction with Mobile team

ITX Web Solutions

10-2020 - 01-2022

Software Developer

- Mentored interns on PHP, Javascript, and Laravel Framework.
- Weekly deployment using git by doing merge for all branches of team members.
- Collaborated on all stages of the systems development lifecycle, from requirements gathering to production releases.
- System performance improvements by doing query optimizations and coding improvements for other developed systems.
- Modified existing software to correct errors, adapt to new changes, and improve performance.
- Collaborated with other developers to identify and alleviate the number of bugs in the software.
- Analyzed and designed relational databases using MySQL. Built databases and table structures and developed applications following MVC Architecture.
- Built databases and table Structures and developed applications following MVC Architecture.
- Direct interaction with Mobile team

Catnyx India Pvt. Ltd.

07-2019 - 10-2020

Software Developer

- Collaborated on all stages of the systems development lifecycle, from requirements gathering to production releases.
- Modified existing software to correct errors, adapt to new changes and improve performance.
- Analyzed and designed schema for applications. Collaborated with other developers to identify and alleviate the number of bugs in the software.

- Analyzed and designed relational databases using MySQL. Built databases and table structures and developed applications following MVC Architecture.
- Worked closely with clients to establish problem specifications and system designs. Wrote clean, clear, and well-tested code.
- Direct interaction with Mobile team

EDUCATION	
BIMT (BUDAUN) (MJPR University) BCA (Bachelor of Computer Application)	2016 - 2019
Pramood Inter College Intermediate (UP Board)	2012 - 2014
Pramood Inter College High School (UP Board)	2011 - 2012

PROJECTS	
Vapps	
This Human Resource Management System (HRMS) is a comprehensive platform designed to support multiple administrators and users, enabling them to efficiently manage and oversee employee-related activities, records, and operations within an organization.	
Technologies : Laravel, ReactJs	
Database : MySql	

Payomatix	
This application is thoughtfully designed to streamline the payment process by offering users a variety of secure and convenient payment options. It seamlessly integrates multiple trusted payment gateways, ensuring fast, reliable, and secure transactions. The implementation of diverse gateways enhances flexibility and provides a smooth user experience throughout the payment journey.	
Technologies : Laravel	
Database : MySql	

Rend ID	
This online car rental platform is designed to seamlessly connect hosts—individuals or businesses offering vehicles for rent—with guest users seeking reliable and convenient transportation solutions.	
Hosts play a vital role in the ecosystem by listing their available vehicles on the platform. They may be private car owners or businesses managing a fleet of vehicles. Each host provides comprehensive details about their cars, including specifications, features, rental pricing, availability calendars, and high-quality images to attract potential renters. This enables hosts to effectively showcase their offerings and manage bookings with ease.	
Guest users, on the other hand, are individuals in need of rental cars for various purposes such as travel, daily commuting, or special events. The platform allows them to effortlessly browse through a wide range of car listings, compare options based on preferences and budget, and book vehicles for their desired rental duration—all from a single, user-friendly interface.	
By facilitating smooth interactions between hosts and guests, this platform ensures a secure, transparent, and efficient car rental experience for all parties involved.	
Technologies : CodeIgniter	
Database : MySql	

Parts and Planes	
Parts and Planes is a specialized online marketplace that connects aviation sellers and buyers in one seamless platform. Registered sellers can list and sell aircraft and aviation parts, but are required to subscribe to a suitable plan in order to activate their selling privileges.	
Once subscribed, sellers can manage their inventory by adding detailed listings for planes and parts, complete with specifications, pricing, and images. On the other side, regular users can browse the marketplace, compare listings, and make purchases directly through the platform.	
An integrated admin panel empowers the platform administrators to oversee and manage all activities, including user management, subscription plans, product listings, and transactions—ensuring smooth and secure operations across the platform.	

Technologies : Laravel

Database : MySql

Clipkick

Clipkick is a user-friendly personal media cloud platform designed to make sharing memories seamless and secure. It allows users to upload, store, and organize their videos and photos in a private cloud environment. With Clipkick, users can easily share media with friends and family, either one-on-one or within group conversations.

In addition to media sharing, Clipkick offers built-in chat functionality, enabling real-time communication and collaboration around shared content. Whether it's a family photo album, travel videos, or everyday moments, Clipkick makes it easy to stay connected and relive memories together—all in one secure and convenient space.

Technologies : PHP

Database : MySql

Korteori

This application is a comprehensive platform designed to facilitate online driving test preparation and user engagement. It offers a seamless user experience with features such as user registration, plan subscription, question attempts with real-time result tracking, access to educational content, and the ability to search for nearby driving schools.

Users can read through structured learning material, attempt quizzes to assess their knowledge, and monitor their progress. The platform also includes a robust language switch feature that dynamically translates all content based on the selected language, ensuring accessibility for a diverse user base.

On the administrative side, the application provides powerful tools for managing chapters, topics, questions, and driving school listings, allowing administrators to keep the platform's content relevant, accurate, and up to date.

Technologies : NodeJs, ReactJs

Database : MongoDB

Healthybazar

This is a comprehensive E-Commerce web and mobile application designed for selling medicines online and offering integrated healthcare services. The platform allows users to conveniently purchase a wide range of medicines from the comfort of their homes.

In addition to e-commerce functionality, the application enables doctors to register and offer their consultation services. Users can browse doctor profiles, book appointments, and access medical guidance directly through the platform.

Furthermore, the application is integrated with third-party services such as the Thyrocare API, allowing users to book diagnostic tests like blood tests and other health screenings with ease.

Combining e-commerce, telemedicine, and diagnostic booking in a single platform, this application delivers a seamless, user-centric healthcare experience.

Technologies : NodeJs, ReactJs

Database : MongoDB

Inmorphise

This online learning platform provides users with the opportunity to purchase subscription plans that grant access to a wide range of virtual classes. Designed with a user-friendly interface, the platform offers an engaging learning experience through live sessions, diverse courses, and a rich library of educational materials.

Whether for academic growth, professional development, or personal enrichment, users can conveniently explore and enroll in courses that suit their interests and goals, all from the comfort of their own space.

Technologies : NodeJs, ReactJs

Database : MongoDB

Champbuddy

This application is a vibrant and engaging learning platform designed specifically for children. It offers interactive lessons, fun quizzes, and age-appropriate content across a variety of subjects, encouraging kids to learn through play and exploration.

The platform fosters a safe, enjoyable, and educational environment where children can develop their knowledge and skills at their own pace. Behind the scenes, administrators curate and manage high-quality educational materials to ensure that content remains relevant, interactive, and aligned with learning objectives.

With its colorful interface and dynamic content, the application creates a fun-filled digital classroom that inspires curiosity, supports early learning, and helps young minds grow.

Technologies : NodeJs, ReactJs

Database : MongoDB

Dryclean

This laundry application streamlines user and order management by enabling administrators to create user accounts and place orders on their behalf. Designed for operational efficiency, the platform simplifies the entire laundry process—from user onboarding to order tracking—ensuring a smooth and organized workflow for both admins and customers.

Technologies : NodeJs, ReactJs

Database : MongoDB

Web Asha

This is a comprehensive online portal tailored for students, offering a seamless platform to purchase and access educational content. Administrators have the ability to create and manage courses as well as exams, making the portal a centralized hub for learning and assessment.

Students can browse through available courses and exams, purchase them just like on an e-commerce website, and begin studying immediately. The platform combines the convenience of online shopping with the structure of academic learning, providing a user-friendly and efficient educational experience.

Technologies : Laravel

Database : MySQL

CS Tips

CS Tips is a centralized platform dedicated to preventing and addressing crime across the United States. It connects multiple law enforcement agencies, each with its own dedicated website, all integrated under a central administrative system.

Through this platform, tips related to criminal activity can be securely submitted either via individual agency websites or through the mobile application. Each agency is linked to the main admin panel, allowing for streamlined communication, tip management, and coordinated response efforts.

By empowering communities to report anonymously and efficiently, CS Tips plays a vital role in enhancing public safety and supporting law enforcement efforts nationwide.

Technologies : Laravel

Database : MySQL

Huntingads

HuntingAds is an online classified ads platform that connects sellers with potential buyers through a streamlined and user-friendly interface. The platform supports multiple seller accounts, each managed independently, along with a centralized admin panel for overall control and moderation.

Sellers can create and upload posts showcasing their products or services, which are then displayed prominently on the homepage for maximum visibility. With a focus on simplicity and reach, HuntingAds serves as a dynamic marketplace for users to browse, discover, and connect with listings across various categories.

Technologies : Laravel

Database : MySQL

Texasbutchers

TexasButchers is a specialized e-commerce application designed for selling premium meat products online. The platform offers a seamless shopping experience where users can customize their orders by selecting individual products and add-ons to create personalized meat boxes.

Customers can also choose their preferred delivery frequency—such as every 2 weeks, 4 weeks, and more—ensuring convenience and flexibility. With its intuitive interface, subscription-based delivery options, and focus on quality, TexasButchers brings fresh meat directly to customers' doors while catering to their unique preferences and schedules.

Technologies : Laravel

Database : MySQL

Lachef Restaurant App

LaChef is a robust e-commerce application tailored for the restaurant and food service industry. The platform enables the admin to onboard vendors, manage product listings, and assign delivery personnel, creating a well-organized ecosystem for online food commerce.

Vendors can list and sell their food products directly through the platform, while delivery personnel ensure timely order fulfillment. With its multi-vendor support and centralized admin control, LaChef offers a seamless end-to-end solution for managing online food sales and delivery operations.

Technologies : Laravel

Database : MySql

IOxygen App for Students

IOxygen is a comprehensive Android application designed to support students preparing for the NEET examination. The platform offers a wide range of educational resources including video lectures, test series, and practice questions, all managed by the admin.

Students can access high-quality video content, attempt mock tests, and engage with practice questions to strengthen their understanding of key concepts. With a user-friendly interface and structured learning approach, IOxygen provides an all-in-one solution for effective and efficient NEET exam preparation.

Technologies : Laravel

Database : MySql

Make Easy Classes Students Potal

Make Easy Classes is an intuitive online learning platform designed to enhance the educational experience for students. The portal allows administrators to create and manage structured courses, including video lectures and test series, and assign them to individual students.

Students can easily access assigned courses, watch high-quality educational videos, and attempt test series to assess their understanding and track progress. With a focus on personalized learning and interactive content, Make Easy Classes offers a flexible and engaging environment for academic success.

Technologies : Laravel

Database : MySql

Dippy Drapes

Dippy Drapes is a modern e-commerce website dedicated to selling high-quality clothing materials. The platform offers a smooth shopping experience, allowing customers to explore a wide range of fabrics and textile products.

From the admin panel, administrators can efficiently manage product listings, handle customer orders, track inventory, and oversee overall operations. With a clean design and powerful backend management, Dippy Drapes provides a scalable solution for running a successful online clothing business.

Technologies : Laravel

Database : MySql

IRMT

IRMT is a specialized application designed for railway employees, enabling them to connect with one another for the purpose of swapping job positions or locations. The platform fosters seamless communication between staff members who are seeking mutual transfers based on their preferences and convenience.

By simplifying the process of finding and coordinating with suitable swap partners, IRMT helps railway employees save time and effort while improving work-life balance through location flexibility. It serves as a centralized, user-friendly solution for internal mobility within the railway workforce.

Technologies : Laravel

Database : MySql

Lakshhya Society

Lakshhya Society is the official website of a non-governmental organization (NGO) dedicated to driving social change and community development. The platform allows the admin to manage and publish blog posts, update the gallery with images from various events and initiatives, and oversee other dynamic content through a user-friendly admin panel.

The website serves as a hub for showcasing the organization's activities, engaging with supporters, and spreading awareness about its mission and impact. With a clean and informative interface, Lakshhya Society connects the NGO with its audience and amplifies its voice in the digital space.

Technologies : Laravel

Database : MySql

Aaghaz Ngo

Aaghaz NGO is a dynamic website platform created for a non-governmental organization focused on social upliftment and community service. Through a powerful admin panel, administrators can publish impactful blog posts, manage event galleries, and update various sections of the site to keep the community informed and engaged.

The platform also enables users to register as volunteers, participate in ongoing initiatives, and make donations seamlessly. By offering both storytelling and action, Aaghaz NGO bridges the gap between compassionate individuals and meaningful causes, fostering a stronger and more connected society.

Technologies : Laravel

Database : MySQL

World Makers

This innovative website serves as a multi-purpose platform designed to bridge the gap between students and companies, while also connecting suppliers directly with customers.

Students can explore career opportunities, internships, and training programs offered by companies, fostering professional growth and industry exposure. Simultaneously, the platform supports a marketplace where suppliers can showcase their products and services to reach a broader customer base.

By integrating academic, corporate, and commercial connections into a single platform, this solution enhances collaboration, opportunity access, and efficient service delivery for all users.
