PROJECTS

MOTOMAP

COMPREHENSIVE VEHICLE MANAGEMENT & ACCOUNTING SOFTWARE

Developed a web-based platform for managing used vehicle purchases, sales, and park & sale operations. The system includes sales and purchase drafts, employee registration, salary calculations, attendance tracking, and an integrated CRM. Additionally, it features an Android and iOS mobile app for on-the-go access. The software also incorporates a full-fledged accounting module, including ledger management, payments, receipts, journal entries, trial balance, balance sheet, and various financial reports to streamline business operations.

ConexiGT

A CAB BOOKING MANAGEMENT SYSTEM

Developed a comprehensive cab booking platform to streamline ride management for a Dubai-based company. The application includes a web-based admin panel and driver mobile app API. Key features include, User Roles & Management: Admins, companies, drivers, and passengers with role-based access. Ride Booking & Tracking: Customers can book rides, track cabs in real-time, and receive status updates.

Vantara

E-COMMERCE WEBSITE & ADMIN PANEL

A complete e-commerce platform built for selling Wayanadan Gandhigram products. The project includes a modern customer-facing website and a robust admin panel for managing products, orders, offers, customers, and inventory. Implemented secure Razorpay payment gateway integration for smooth online transactions. Developed REST APIs for mobile app usage, along with wishlist management, offer engine, checkout tracking, and user activity logging. The admin dashboard includes advanced filters, analytics, and role-based access control.

Tech Stack: Laravel, MySQL, Vue.js, jQuery, Bootstrap, Razorpay API, REST APIs, cPanel

THRRU

E-LEARNING MANAGEMENT SYSTEM

A lightweight course management platform designed for educational institutions. Students can create accounts, log in securely, and access study materials assigned by the admin. The system includes role-based controls, allowing administrators to upload materials, manage batches, and assign resources to specific students or groups. Built with a focus on simplicity, easy navigation, and scalable backend architecture.
