Project 1 - GOT ONLINE

Vendor Management : Approve or reject vendor applications, manage vendor details, and view overall performance. Review and approve products added by vendors to ensure quality and compliance. View reports on sales, revenue, and customer feedback to optimize platform operations.

Shop Setup : Allow vendors to create and customize their shops, including shop name, logo, and description. Enable vendors to add, edit, or delete products, set prices, and manage stock. Allow vendors to view incoming orders, update order statuses, and handle delivery and returns.

Frameworks & Libraries - Laravel, jQuery, Bootstrap, Ajax

Tools & Platforms - Composer, XAMPP, Apache

Role - Technical Frontend and backend Development

Project 2 - STUDYCARNIVAL

Add Courses : Separate modules for managing PG and UG courses, with fields for course names, descriptions, prerequisites, and syllabus outlines.

Fee Structure : Define and update course fees, including any installment plans or scholarships.

Course Details : Include detailed information about each course, such as duration, credits, faculty, and course objectives.

Online Registration : Enable students to register for courses by filling out a detailed form with personal and academic information.

Document Upload : Let students upload required documents like transcripts and ID proof for verification.

Frameworks & Libraries - Laravel, jQuery, Bootstrap, Ajax

Tools & Platforms - Composer, XAMPP, Apache

Role - Technical Frontend and backend Development

Project 3 - UNIG HRMS

Employee Profiles : Store all relevant employee data, such as personal details, contact info, and employment history.

Document Management : Upload and securely store employee related documents (ID proof, resumes, certificates).

Leave Requests : Enable employees to request leave with a simple form. Notify managers for quick approvals or rejections. Keep track of leave balances for each type (paid leave, sick leave).

Frameworks & Libraries - Laravel, jQuery, Bootstrap, Ajax

Tools & Platforms - Composer, XAMPP, Apache

Role - Technical Frontend and backend Development

Project 4 - BM ONE

User Management : Store all user data and credentials based on their profile details and app usage history.

Document Management : Upload and securely store user-related documents (ID proof, resumes, certificates).

Manage Users : Managing for users details and credentials and assign roles in users

Frameworks & Libraries - Laravel , Node js

Tools & Platforms - Composer, Lamp , Apache

Role - Technical Backend Developing
