## NANDALAL S Career Objectives

Seeking a challenging role in a dynamic team environment where I can leverage my technical expertise and experience to contribute to organizational growth while continuously enhancing my skills.

## Skills

|                         |                                                                                                                                    |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------|
| Frontend Development    | HTML5, CSS3, JavaScript (ES6 +), React js, Redux, Hooks, Angular, Rxjs, Ngrx, jQuery, Ajax, JSON, Bootstrap, Material UI, PrimeNG. |
| Backend Development     | PHP (5,7,8), Laravel, CodeIgniter, Yii2, Node.js, Express.js, Nest.js, Rest API, Web Services (REST), OOPS, MVC, SOLID.            |
| Database                | MySQL, PostgreSQL, MongoDB.                                                                                                        |
| Cloud Services          | AWS (S3, SES, SNS, SQS, Lambda, Polly), CI/CD, Git, Bitbucket, Composer, NPM, Postman.                                             |
| AI-assisted development | GitHub Copilot, ChatGPT, Claude, DeepSeek.                                                                                         |

## Work Experience

- 2025 May - Present  
Motoxchange Solutions PVT LTD Trivandrum.  
Senior Software Engineer.
- 2023 Nov - 2025 Mar  
Xipher Software PVT LTD Trivandrum.  
Senior Web Application Developer.
- 2021 Feb - 2023 Aug  
RM Education PVT LTD I Technopark Trivandrum.  
Project lead.
- 2020 Jul - 2020 Dec  
Yarab Technology PVT LTD I Technopark Trivandrum.  
Senior PHP Developer.
- 2019 Aug - 2020 Jun  
Velosit info lab PVT LTD I Technopark Trivandrum.  
Senior Software Engineer.
- 2018 Jul - 2019 Aug  
Aries Estrrado PVT LTD I Technopark Trivandrum.  
PHP Developer.
- 2016 May - 2017 Nov  
NIC I Vellayambalam Trivandrum.  
ASST Programmer.
- 2013 Jul - 2015 Aug  
Soft Creations IT Solutions I Vazhuthacaud Trivandrum.  
WEB Developer.

# Projects Summary

## Motoxchange

|             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Role        | Development & Unit Testing                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Tech Stack  | <b>Old Application</b> → Laravel, JQuery, Javascript, 3 <sup>rd</sup> Party API integrations, Mysql, Reactjs<br><b>New Application Revamping</b> → Nextjs, Nodejs, Mysql                                                                                                                                                                                                                                                                                                 |
| Description | <ul style="list-style-type: none"><li>Developed a digital platform for Buy/Sell/Exchange of cars, including dealer application and customer web portal</li><li>Implemented features for online enquiry, vehicle evaluation, auction, and bidding system</li><li>Built an inspection module for engineers to perform car evaluations via web app</li><li>Delivered the platform as a Progressive Web App (PWA) for app-like user experience and offline support</li></ul> |

## Assessment Master

|             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
