

NITIN MESHARAM

Technical Lead | PHP/Laravel | AI Integration | CRM Architecture
nitin.meshram650@gmail.com | +91-9881331656 | Nagpur, India (Open to Remote)

PROFILE SUMMARY

Technical Lead with 14 years building enterprise PHP/Laravel systems and AI-powered automation solutions. Shipped a Gemini AI data assistant that replaced manual reporting for e-commerce operations, and led end-to-end delivery of an ADA compliance platform capable of scanning 500+ page websites. Deep expertise in CRM architecture (SugarCRM/SuiteCRM), REST API design, and database optimization. Currently integrating OpenAI and Gemini APIs into production workflows to accelerate development velocity and business reporting.

TECHNICAL SKILLS

Backend	PHP, Laravel, CakePHP, Core PHP, Python
AI & Automation	OpenAI APIs, Gemini AI, Prompt Engineering, LLM Integration, AI Automation
AI Dev Tools	GitHub Copilot, Cursor AI, Claude AI, ChatGPT, Gemini Code Assist
CRM	SugarCRM, SuiteCRM (Enterprise-level customization & integration)
Database	MySQL, Query Optimization, Schema Design
APIs	REST API Design, Third-party API Integration
DevOps	Git, Docker (fundamentals), Azure DevOps, CI/CD pipelines
E-commerce	OpenCart
Leadership	Team Mentoring, Code Reviews, Agile, Client Coordination

PROFESSIONAL EXPERIENCE

Valethi Technologies LLP | Technical Lead

July 2021 – Present

- Lead a development team delivering Laravel and OpenCart-based enterprise applications for domestic and international clients.
- Designed and optimized MySQL database architecture, improving query performance by 30% across high-traffic modules.
- Architected and shipped an AI-powered internal data assistant (Python + Gemini AI) that enables natural language queries on e-commerce MySQL databases — eliminating manual report generation for the operations team.
- Built VACT (ADA Compliance Tool) as Senior Backend Lead — automated accessibility auditing platform scanning 500+ page websites and generating WCAG-compliant reports for business clients.
- Proposed and implemented API strategies tailored to client requirements; managed client coordination and technical delivery end-to-end.
- Mentored junior and mid-level developers on Laravel best practices, code review standards, and clean architecture.

RNR Datalex Pvt. Ltd. | Senior Web Developer

September 2015 – July 2021

- Developed and maintained SuiteCRM and CakePHP-based enterprise applications serving multi-region client base.
- Collaborated directly with clients and internal project teams to define requirements and ensure on-time delivery.

- Improved system error handling and logging, significantly reducing production incidents and improving user experience.
- Delivered scalable CRM customizations and backend solutions across 5+ years of consistent high performance — recognized with Best Employee of the Year award.

The Missing Floor (Techaroha) | Senior Web Developer

January 2015 – August 2015

- Developed SugarCRM solutions tailored to client workflows; optimized database designs for better performance.

Promarc Software Pvt. Ltd. | Web Developer

January 2012 – January 2015

- Delivered Core PHP web applications from scratch; coordinated with project managers to meet business requirements.
- Recognized as Best Trainee of the Year for exceptional ramp-up and quality of delivery.

KEY PROJECTS

AI-Powered Data Assistant | Python, Gemini AI, MySQL

- Built Python API integrated with Gemini AI to process natural language prompts and dynamically generate MySQL queries for e-commerce reporting.
- Enabled non-technical staff to retrieve sales data, daily orders, and business insights via simple text queries — reducing manual reporting effort significantly.
- Implemented secure API communication, query sanitization, and real-time response handling.

VACT – ADA Compliance Platform | Laravel, MySQL

- Led backend architecture and team for a web-based accessibility auditing platform serving business clients.
- Implemented full-site scanning engine supporting websites with 500+ pages — detecting broken links, missing accessibility attributes, and WCAG violations.
- Generated detailed compliance reports with actionable recommendations; helped clients reduce manual accessibility audit costs.

ShopHub – E-commerce Management Platform | OpenCart, MySQL

- Built comprehensive backend for an online retail management platform — improved operational efficiency by 40% through optimized backend processes and workflow automation.

GCM – Global Customer Management | SugarCRM, MySQL

- Architected unified CRM prototype consolidating contract, product, quote, and order management into a single sales-cycle platform.

RujulERP Legal – Legal Firm Management System | CakePHP, MySQL

- Developed a full-featured legal firm management system with multilingual support (English and Arabic).
- Delivered complete localization and RTL layout handling — enabling the client to serve both English and Arabic-speaking users seamlessly.

AWARDS & RECOGNITION

- Star Performer Award (2x) — Valethi Technologies LLP
- Best Employee of the Year — RNR Datalex Pvt. Ltd.
- Best Trainee of the Year — Promarc Software Pvt. Ltd.
