Proficient in object-oriented design data structures, problem solving, complexity analysis, debugging and strong database designing, Learn how to improve productivity and quality of application, requirements analysis, client success & delivery, Manage multiple projects and task and resource management

Featured Projects

Payroll Management System (UK)

This project involved the complete revamp of a mission-critical payroll management platform for a UK-based payroll solutions provider. The client approached us after facing severe issues with a previously outsourced product poor performance, unstable deployment, lack of technical structure, and an overall negative impact on business operations. I was brought in as the sole technical expert to re-architect, stabilize, and enhance the platform while setting up a professional development, deployment, and issue tracking pipeline.

Tech Stack: Laravel, Node.js, TypeScript, Rest APIs, MongoDB, MariaDB, Azure Storage

Delm8 Route Planner (UK)

Delm8 Route Planner is a next-generation navigation and logistics tool built specifically for delivery drivers and service professionals in the UK. It goes beyond traditional route planners by enabling users to locate named properties (farms, cottages, new builds) with unmatched accuracy, even when postcodes fail. Delm8 optimizes complex routes with 100+ stops while delivering precise door-to-door navigation.

Tech Stack: Symfony, Rest APIs, PostgreSQL, Angular, Stripe In-App Purchase, AWS, Linode

Service MVP – Online Training & Coaching Platform (USA)

Service MVP is a premium online coaching and training platform created by Joe Crisara – “America’s Service Sales Coach.” The platform is designed to help blue-collar service businesses increase revenue and improve sales performance through structured learning, live coaching, and role-based training programs. The system serves startups to Fortune 1000 companies, delivering content through video training, live coaching sessions, workbooks, and digital resources to drive measurable business growth.

Tech Stack: CodeIgniter, RestAPIs, MySQL, Chargify, AWS

HSEQ Management System (Netherlands)

HSEQ Management System is a comprehensive digital platform built to support organizations in managing their Health, Safety, Environment, and Quality (HSEQ) standards and compliance requirements. It’s used by corporations across industries to conduct training, certification, communication, and safety protocol management for their workforce - whether on-site or remote. The system includes HSElife NL, HSEQ Direct, and other tools designed to centralize communication and learning around workplace safety and well-being.

Tech Stack: Symfony, Laravel, WordPress, Redis, MySQL, Mollie Payment, Mailchimp, AWS

Pictrax (USA)

PicTrax offers global explorers, travel discovery, earning, trip planning & advice sharing capabilities. Discover new destinations with the interactive map or use the search & filter functions to refine your search!

Tech Stack: Laravel, Vue.js, MongoDB, AWS

Azurway (France)

Azurway is a transportation and taxi booking platform designed for enterprises, healthcare professionals, and individual passengers. The system enables seamless ride booking, real-time vehicle tracking, route management, invoicing, and secure payment processing. Built to deliver reliable and high-quality transportation services, the platform streamlines the complete journey experience from booking to trip completion.

Tech Stack: Symfony, Rest APIs, MySQL, Web Socket, ZMQ, Google APIs, AWS

Education

Schools and Universities

2009 - 2012	Diploma in Computer Engineering Sarvoday Polytechnic Institute, Gujarat, CGPA 7.4/10 in GTU.
2012 - 2015	Bachelor of Engineering in Computer Science & Engineering B. H. Gardi College of Engineering & Technology, Gujarat, CGPA 7.5/10 in GTU.
