#6 IHNA / IHM Admission Portal

Tool	:	Sublime Text 3, xampp, Bootstrap 3, JQuery
Language	:	PHP5.6, Cakephp Framework
Database	:	Mysql 5.5
Role	:	Update& development.
Site	:	https://portal.ihm.edu.au/ , https://portal.ihna.edu.au/

DESCRIPTION:

IHM/IHNA Admission portal is part of knowledge hub CRM. Admissions portal lets you manage student's admissions, applications, contacts, activities etc. It allows a user to follow a student's all activities / actions (from enquiry till enrollment). It have following features application management, contacts management, activities management, teams, reports, enquiry source, email template, campaigns etc

#7 KoolCRM

Tool : Net Beans IDE 8.1, WAMP, JQuery UI
Language : PHP5.4, Yii Framework
Database : Mysql 5
Role : Research & development
Site : <http://koolcrm.com/>

DESCRIPTION:

Koolcrm is customer relationship management built in Yii and mysql. It have mainly 12 modules that's are following contact management, activity management, task management, events, invoice, quotes, payments, role based user management etc. Contact management keeping all contacts crud and provide a search by criteria. Activity providing activity CRUD and option for search activity by date and today. Task management providing ability to add task, management and search. Quotes module have ability to create new quotes and its management. Invoices module create, keep all invoices and its management etc...

#8 Careerline

Tool : Net Beans IDE 8.1, WAMP
Language : PHP5.4, Yii Framework, REST Service
Database : Couchbase & N1QL
Role : Research & development
Site : <http://www.careerline.com/>

DESCRIPTION:

I participate on this project as R&D. My task is to research & create applications inSOA(Service orientated architecture) in YII and convert existing database to 'Nosql' (Couchbase) . I created API for Couchbase database action and multiple search. This api have options for CRUD database actions and search facility. All request actions are return as json array. This project expecting approximate 1 million users, compare with mysql couch base produce more speed results.

#9 ShowMyIsp

Tool : Net Beans IDE 7.2, LAMP, Google Geo map
Language : Codeigniter Framework, PEAR
Database : MYSQL 5.5
Role : Main developer
Site : <http://showmyisp.com/>

DESCRIPTION:

ShowMyISp is a web application for provide Ip address details with geo location map. This system is ready to use tool for network admin and normal users. This will detect proxy servers also. This system providing following IP details of given IP country, region, city, timezone, zip code, area code ,latitude, longitude ,net speed, Internet service provider, country code ..Etc.

#10 Luluboats

Tool	:	Wamp 2.0, Dream WeaverCS3
Language	:	PHP5, JavaScript, CSS, HTML, Codeigniter, JQuery
Database	:	MYSQL5 Server
Role	:	Team member in development
Site	:	http://www.luluboats.com/

DESCRIPTION:

This site developed with Codeigniter framework. It provides multi level user management. Administrator can able to add, delete, and activate users. Admin panel have to provide an event management. User can add their events and it will be show in home page on date wise. User can able to edit, delete on their events. It provides powerful gallery management administrator can able to manage pictures. It provides a newsletter management.
