## Profile Summary

---

Senior PHP Developer with **7+ years** of experience building and maintaining scalable web applications, primarily using **Laravel** and **CodeIgniter**. Skilled in backend development, API design, and database optimization with **MySQL** and **MongoDB**. Also proficient in **JavaScript** and **jQuery** for front-end interactions. A strong track record in FinTech and enterprise software, delivering secure, high-performance solutions aligned with business needs. Known for writing clean, maintainable code and collaborating effectively across teams to meet project goals.

## Core Skills

---

### Back end

PHP, Laravel, CodeIgniter, REST APIs, Payment Gateway Integration,Third Party API

### Databases

MySQL, MongoDB

### Front end

JavaScript, jQuery, AJAX, Bootstrap,CSS

## Soft Skills

---

- Strong problem-solving skills with keen attention to detail.
- Effective time management and ability to handle multiple tasks simultaneously
- Excellent communication and teamwork abilities
- Quick learner with eagerness to adopt new technologies and continuously improve skills

## Tools & Technologies

---

- Strong understanding of OOP concepts
- Version control: Git
- Experience with project management tools (Jira, Trello)
- Experience with SSH server
- Token-based authentication (JWT, OAuth)
- CI/CD deployment concepts
- Knowledge of CMS tools (WordPress)
- Experienced with API testing tools (Postman, Swagger)

## Professional Experience

---

### **Tech maven IT Solutions Pvt Ltd, Sr. PHP Developer**

07/2021 – 10/2025

Ernakulam, India

- Developed and integrated **backend APIs** to support the React front-end and implemented **admin panel CMS pages** for content and data management.
- Built core modules including **member registration and profile management, venue management, reporting.**
- Implemented **document processing, generation, and downloading** functionalities, ensuring secure and streamlined file handling.
- Optimized **MySQL** and **MongoDB** queries and integrated **token-based authentication** to enhance system performance and security.

### **Stepson Web Consultancy Services Pvt Ltd, PHP Developer**

10/2017 – 07/2020

Ernakulam, India

- Developed **scalable e-commerce and CRM solutions** using **CodeIgniter** and **PHP**, delivering reliable and high-performance business platforms.
- Built and maintained **responsive WordPress websites**, customizing themes and plugins to align with client requirements and brand identity.
- Migrated **legacy systems** to modern, optimized **PHP/MySQL** applications, reducing technical debt and improving overall efficiency.

### **GTECH Computer Education, Faculty & Project Mentor**

10/2014 – 09/2017

Idukki, Kerala

- Trained **100+ students** in **PHP, MySQL, HTML, Javascript**, fostering practical coding skills and project-based learning.
- Mentored **academic projects**
- Guided students in applying **best practices for database optimization, debugging**, and efficient software design..

## Key Projects

---

### **reach.boats, Digital Platform for Boating Community & Crew Recruitment**

Reach Boats is a technology-driven marine industry platform that connects boating professionals, crew, and enthusiasts through community engagement and recruitment features.

I contributed to the backend development by integrating RESTful APIs and managing CRM functionalities for the platform. My work improved data flow between the React front end and backend systems, enhancing overall platform performance and reliability.

**Tech Slack** : Laravel 10, MYSQL, React.

**VFS (Visa Processing System), Visa Management System – Backend Development**

The visa processing system was designed to simplify and automate the submission, tracking, and management of visa applications. I developed and integrated backend APIs focused primarily on the application submission process, ensuring secure data handling, smooth workflow execution, and reliable communication between the front end and backend systems.

**Tech Stack** : Laravel, MYSQL,React.

**Swimphony (Swimming Software), Swim Program Management System**

Swimphony is a platform designed to manage swimming programs and sports activities for schools and organizations. I contributed to backend development by implementing the reporting module, user registration and profile management, and venue management features. My work helped streamline administrative workflows, improve data accuracy, and enhance the overall efficiency of the system.

**Tech Stack** : Codeigniter, MongoDB

**Sharestates (Fintech Platform), Online Lending & Investing Platform**

Sharestates is a real estate investment platform that streamlines property financing and loan management. I contributed to backend development by implementing document processing and generation features for loan applications, ensuring accurate data handling, secure file management, and automated document workflows that improved operational efficiency.

**Tech Stack**: Codeigniter, MYSQL.

**ESC Manager**

ESC Course Finder is a web-based portal for managing courses, student access, and administrative operations. I implemented the complete system using **CodeIgniter** and **MySQL**, handling all modules independently, including user management, course registration, and data processing to ensure smooth and efficient platform functionality.
