PROFESSIONAL EXPERIENCE

Pixbit Solutions Private Limited

Laravel Full Stack Developer

India

2021 Mar-Present

Pixbit Solutions, located in Sahya Government Cyber Park, Calicut, Kerala, specializes in web and mobile app development, e-commerce solutions, and digital marketing services.

Career Growth

- Evolved from Junior Developer to Laravel Developer in under three years, showcasing rapid skill acquisition and adaptability.
- Currently working as Team Lead, overseeing project execution and ensuring timely delivery of high-quality solutions.

Project Management & Leadership

- Developed and launched comprehensive web applications for various sectors, including EV vehicle charging, real estate, and fintech.
- Mentored junior developers, fostering a collaborative and productive work environment.

Technical Expertise

- Developed backend APIs and integrated third-party services to enhance platform functionality.
- Contributed at a beginner level to front-end development using React.js to improve user experience.
- Improved system performance and security through software upgrades and code optimization.

Client Success

- Partnered with cross-functional teams to develop scalable platforms that drive business growth.
- Facilitated clear communication with stakeholders, ensuring timely project delivery and maintaining high levels of client satisfaction.

PROJECTS

Property Management System

Currently working on the Dubai Property Management System, enabling users to sell, rent properties, and apply for mortgages. Phase one is complete, laying the foundation for an efficient real estate platform.

- Utilized Laravel, React.js, and Next.js for web application development, alongside Android and iOS app development.
- Integrated various third-party APIs, including Google Cloud Document AI, Micro-blink, Google Places API, Dubai Pulse API, and Reidin APIs, to enhance functionality and provide real-time data.
- Implemented a multi-admin system to manage different user roles and permissions effectively.

Mortgage Management System

This banking solution simplifies the mortgage application process specifically for the Dubai market. The live application provides an intuitive platform that allows users to efficiently manage their mortgage requests.

- Developed using Laravel, Next.js, and WordPress technologies.
- Focused on providing efficient management of mortgage requests.

Electric Vehicle Charging

A live system aimed at enhancing the experience for EV owners in India by simplifying the process of locating and accessing charging station

- Built the backend using Laravel to support mobile apps on iOS and Android platforms.
- Implemented MQTT protocol to facilitate real-time communication between IoT-enabled charging stations and the application.
