

# PHILIP E. ITORO

*Snr. Fullstack/DevOps Engr.*

**GitHub:** <http://github.com/itorophilip1998> | **Portfolio:** <https://philips-folio.vercel.app>

**Email:** [itorophilip1998@gmail.com](mailto:itorophilip1998@gmail.com) | **Phone:** [+2349024195493](tel:+2349024195493)

**LinkedIn:** <https://linkedin.com/in/itoro-philip-1b2182225>

---

## Professional Summary

Highly skilled Senior Fullstack Engineer with 9+ years of experience building scalable, efficient, and responsive web applications. Proficient in modern **Frontend**, **Backend**, and **DevOps** technologies, including TypeScript, JavaScript, Nest.js, and Next.js, with advanced expertise in tools like TikZ and LaTeX for document generation and visual representation. Proven ability to lead teams, deliver innovative solutions, and drive digital transformation by integrating modern tech stacks that optimize performance and user experience.

---

## Skills

- **Frontend:** React.js, Next.js, Vue.js, Angular, React Native, Micro Frontends, SASS, Tailwind, Bulma, Ant Design, HTML5, CSS3, Chrome Extension Script
  - **Backend:** Node.js, Laravel, PHP, Java, Spring Boot, Nest.js, RESTful APIs, Microservices Architecture
  - **Databases:** MySQL, PostgreSQL, MongoDB, Redis, Graph Databases, Event-Driven Database, Sequelize, Distributed & Sharded Databases
  - **DevOps:** Kafka, RabbitMQ, Change Streams, Kubernetes, Docker, CICD pipelines, Server scripting, TeraForm, AWS, Azure, Linux shell, Bash ,etc
  - **Blockchain & Smart Contracts:** Solidity, Ethereum, DApps, Smart Contracts
  - **Documentation & Tools:** TikZ, LaTeX, Swagger API, Figma, Git, Agile Methodologies
- 

## Work Experience

## **DevOps Engineer (Contract)**

**Homiee** | Remote (Sydney, Australia) | *Nov 2024 – Present*

*Homiee is a comprehensive platform facilitating real estate transactions and management.*

### **Key Responsibilities:**

- Designed and implemented a microservices architecture to support a distributed platform.
- Managed MongoDB distributed databases with replica sets for high availability.
- Integrated RabbitMQ and Kafka for event-driven architecture and real-time updates.
- Automated CI/CD workflows with Jenkins and GitHub Actions, improving deployment cycles.
- Deployed application instances across multiple regions for low-latency performance.
- Dockerized microservices for consistent development and production environments.
- Orchestrated container management using Kubernetes.
- Developed infrastructure as code (IaC) templates using Terraform for scalable deployment.
- Monitored system performance and optimized resource allocation with Prometheus and Grafana.
- Integrated security measures, including SSL/TLS certificates and IAM policies.

## **Full Stack Engineer (Contract)**

**Miatech** | Remote (Brazil) | *Jul 2024 – Nov 2024*

*Miatech develops innovative apps, including DubballUp, a fitness app for all fitness levels.*

### **Key Responsibilities:**

- Led the development of web applications, including management information systems.
- Created frontend components using React.js and managed state with Redux Toolkit.
- Developed scalable backend services using Node.js and Express.
- Designed and optimized database schemas with PostgreSQL.
- Utilized TikZ and LaTeX for technical documentation and system diagrams.
- Implemented role-based access control (RBAC) for enhanced security.
- Conducted unit and integration testing with Jest and Mocha for robust code coverage.
- Built reusable UI components for rapid feature development.
- Integrated REST APIs and third-party services for enhanced functionality.
- Provided mentorship and code reviews for junior developers.
-

## **Frontend Engineer (Contract)**

**Switchive** | Remote (Nigeria) | *Jun 2024 – Aug 2024*

*Switchive enables crypto payments for everyday items, simplifying digital transactions.*

### **Key Responsibilities:**

- Developed responsive UIs using React.js, Next.js, and Tailwind CSS.
- Collaborated with backend teams to implement RESTful API integrations.
- Optimized frontend performance for high-traffic environments.
- Designed reusable components using Storybook for team collaboration.
- Led technical strategy for scalable solutions with Nest.js and Redux.js.
- Implemented client-side caching strategies for improved load times.
- Conducted cross-browser testing to ensure consistent performance and appearance.
- Created interactive charts and visualizations with Chart.js and D3.js.
- Used Lighthouse for performance audits and implemented improvements.
- Coordinated sprint planning and deployment cycles with the development team.

## **Full-Stack Engineer (Full-time)**

**Anchor Group NA Corp** | Remote (New York, USA) | *Jan 2023 – Mar 2024*

*Anchor Group develops Total Care Score (TCS), a healthcare management platform.*

### **Key Responsibilities:**

- Developed Total Care Score (TCS) for managing healthcare services and analytics.
- Enhanced security with JWT and OAuth authentication using Laravel.
- Reduced load times by 30% through performance optimizations.
- Generated flowcharts and documentation using LaTeX and TikZ.
- Created real-time dashboards with Vue.js and Chart.js.
- Integrated secure payment gateways for financial transactions.
- Implemented auditing features to track changes and ensure data integrity.
- Conducted A/B testing for new feature validation.
- Designed CI/CD pipelines for automated testing and deployment.
- Provided mentorship to junior developers on best practices and coding standards.

## **Chief Technology Officer / Fullstack Developer (Full-time)**

**Expectoo Technology** | Port Harcourt | *Apr 2022 – Jan 2023*

*Expectoo.net connects users globally with job opportunities.*

### **Key Responsibilities:**

- Spearheaded the technical strategy for multiple SaaS products.
- Built scalable backend services using Nest.js.
- Developed APIs and integrated third-party services.
- Managed technical documentation with LaTeX and TikZ.
- Supervised a team of 10 developers across multiple projects.
- Reduced infrastructure costs by 20% through cloud optimization strategies.
- Designed and implemented job-matching algorithms using machine learning.
- Ensured GDPR compliance in data handling processes.
- Conducted architecture reviews to align with business goals.
- Maintained 99.9% platform uptime through proactive monitoring.

### **Full Stack Engineer (Contract)**

**Soccernity** | Remote (UK) | *Jun 2022 – Oct 2024*

*Soccernity is a platform for football enthusiasts, offering live scores and networking opportunities.*

### **Key Responsibilities:**

- Developed features such as live scores and real-time updates.
- Optimized state management with Redux Toolkit and added gamification elements.
- Conducted end-to-end testing with Cypress for robust functionality.
- Integrated RESTful APIs and developed push notification services.
- Automated deployment pipelines using Docker and Kubernetes.
- Designed user onboarding flows for improved retention rates.
- Created community forums with real-time chat features using Socket.IO.
- Conducted usability testing and incorporated user feedback for improvements.
- Optimized image loading with lazy loading and WebP conversion.
- Implemented SEO best practices for better search engine visibility.

### **Backend Developer (Full-time)**

**Start Innovation Hub** | Uyo, Akwa Ibom, Nigeria | *Sept 2018 – Nov 2021*

*Start Innovation Hub provides innovative tech solutions and software development services.*

### **Key Responsibilities:**

- Built backend services and REST APIs using Laravel and Node.js.

- Designed databases and collaborated on front-end projects using Vue.js.
  - Provided technical support and mentorship to junior developers.
  - Automated routine tasks with shell scripts for improved efficiency.
  - Migrated legacy systems to modern architecture with minimal downtime.
  - Developed plugins for integration with third-party services.
  - Conducted security audits to prevent vulnerabilities.
  - Enhanced debugging with custom logging and monitoring tools.
  - Created project documentation to streamline onboarding processes.
  - Implemented multi-language support in APIs for global reach.
- 

## Education

### HND in Computer Science

Federal Polytechnic Ukana | Graduated: 2023

---

## Certifications

- **LLM**– All of AI: ChatGPT, Midjourney, Stable Diffusion & App Dev Certificate by Udemy
- **Frontend**: Micro Frontend Master Class Certificate by Udemy
