Place: Jaipur, Rajasthan, India

|| Profile Summary

Senior PHP / Laravel Engineer with 7+ years of experience designing scalable web applications, RESTful APIs, and enterprise backend systems. Strong expertise in Laravel, Symfony, microservices architecture, and database optimization, with hands-on experience delivering production-grade platforms supporting large datasets and high-volume operations. Proven ability to improve system performance, implement automated testing using PHPUnit, and collaborate in CI/CD-driven development environments. Passionate about building clean, maintainable, and scalable backend architectures.

|| Technical Skills

Backend:	Core PHP, Laravel, Symfony, REST APIs, Microservices, MVC
Frontend:	Vue.js, JavaScript, Blade Templates
DBMS:	MySQL, PostgreSQL
Testing/Library:	PHPUnit, Automated Testing, Debugging, Queue Jobs
Tools:	Git, Bitbucket, Jira, Postman, Backlog, Docker, AWS

|| Core Competencies

Laravel Development • REST API Design • Microservices Architecture • Backend Optimization • Database Performance Tuning • Automated Testing • CI/CD Deployment • Scalable System Design • Enterprise Application Development, Caching

|| Work Experience

Software Engineer Groony India Private Limited	Remote, Japan Duration: 06/2022 - Present
---	--

Project: Keilog

- Designed and maintained **enterprise modules handling high-volume operational data**.
- Implemented **Excel-based bulk import/export workflows** using Laravel Excel and PhpSpreadsheet and queuing jobs.
- Built **automated test coverage using PHPUnit**, improving release stability, reduced production bugs by **40%**.
- Optimized database queries and backend architecture to enhance application performance.
- Improved deployment stability through **CI/CD integration**

Tech Stack: Laravel, Symfony, Vue.js, PostgreSQL, Redis, Queue Jobs

Project: Rezept Computer

- Contributed to a **large enterprise platform** by developing backend services and supporting feature enhancements.
- Built backend logic using **Core PHP with Vue.js frontend integration**.
- Resolved production issues and improved system stability through debugging and testing.
- Created manual test cases to validate workflows and improve code reliability.
- Handled datasets with **500k+ records**

Tech Stack: Core PHP, Vue.js, PostgreSQL, Queue Jobs

Project: Loguun

- Developed backend modules using **Laravel and Vue.js** for a production platform.
- Successfully managed children's activity location tracking via google maps.
- Implemented **automated testing using PHPUnit** to improve code quality.
- Participated in **peer code reviews and backend optimization efforts**.

Tech Stack: Laravel, Vue.js, MySQL, Queue Jobs, Redis

PHP Developer Grand View Research Inc.	Pune, India Duration: 02/2020 - 06/2022
--	--

Project: Company Website Recreation

- Led redevelopment of the company website focusing on **performance, scalability, and improved user experience**.
- Built a modern **responsive web platform increasing user engagement almost by 60%**.
- Conducted testing, debugging, and cross-device validation.
- **Led the technical development** of project, overseeing system architecture, code quality, and timely delivery of features.

Tech Stack: Laravel, Vue.js, MySQL

Project: CRM, LMS, and Blog Applications

- Developed multiple enterprise applications including **CRM, LMS, and blogging systems**.
- Designed **microservices for Order Processing and KPI analytics**, improving scalability and maintainability.
- Implemented **automated invoice generation using third-party libraries**.
- Improved application performance through backend optimization and bug resolution.

Tech Stack: Symfony, Vue.js, MySQL, Microservices

Software Development Engineer AR Lab	Jaipur, India Duration: 08/2019 - 01/2020
--	--

Project: Property-I and News Feed Management

- Designed and implemented **RESTful APIs using Laravel** for the Property-I platform.
- Developed a **news feed filtering system inspired by social media ranking algorithms**.
- Optimized MySQL queries improving response time and system performance.
- Validated API workflows using **Postman and JSON-based integrations**.

Tech Stack: Laravel, REST API, MySQL, Postman

PHP Developer Ecare Softech Private Limited	Jaipur, India Duration: 07/2018 - 08/2019
---	--

Project: Mines Management System

- Developed a **production-grade system later authorized by the Rajasthan State Government**.
- Implemented compliance-based workflows and structured validation processes.
- Ensured system reliability through systematic debugging and testing.

Tech Stack: Laravel, Blade, MySQL

Project: Pathey-Kan

- Developed and maintained the **Pathey-Kan platform for organizational operations**.
- Implemented features to handle **subscription lifecycle management** (registration, renewal, and tracking) for monthly publication distribution.
- Implemented new features, resolved technical issues, and improved system stability.
- Collaborated with stakeholders to translate requirements into technical solutions.

Tech Stack: Laravel, Blade, MySQL

|| Education

B.tech, Computer Science & Engineering Rajasthan Technical University, Kota	Duration: 10/2010 - 10/2015
---	------------------------------------

|| Achievements

- Received state government of Rajasthan authorization for **Mines Management System**.
- Built enterprise modules supporting **large datasets and high-volume operations**.
- Improved system stability by implementing **automated testing using PHPUnit**.
- Delivered multiple enterprise platforms including **CRM, LMS, analytic microservices and REST APIs**.
- Received a **National Skill Development Corporation (NSDC)** scholarship at the national level.
