

PUSHPARAJ YUVARAJ

Senior Full Stack Developer | AI-Integrated Web Engineering Lead

✉ pushparaj.yuvaraj@gmail.com | ☎ +91 9047418999 | [LinkedIn](#)
📍 Open to work: Anywhere in India | Remote-friendly

PROFESSIONAL SUMMARY

Senior Full Stack Developer with 15+ years building enterprise-grade web platforms and AI-powered solutions for global clients in the USA, Singapore, and France. Delivered 10+ production systems for a 3,000-storefront US telecom retailer — cutting manual reporting workloads by 60% through custom RAG pipelines and OpenAI API integration. Expert in React.js, Next.js, Laravel, Node.js, Python, and LangChain. Track record of leading agile engineering teams, improving page performance by 40%, and shipping 100% of roadmap milestones on time. Actively seeking a Senior Full Stack or AI-integrated engineering role with a high-impact product team.

CORE TECHNICAL SKILLS

Frontend	React.js, Next.js, jQuery (legacy)
Backend	Node.js, Laravel 12, PHP, CodeIgniter, Python
AI & GenAI	OpenAI API (GPT-4o), LangChain, RAG Architecture, Prompt Engineering, LLM App Development
Databases	MySQL, PostgreSQL, MongoDB, AWS RDS, CouchDB
DevOps & Cloud	AWS (EC2, S3), Docker, GitHub Actions, CI/CD Pipelines
Testing & QA	Selenium, Postman, Python Automation

PROFESSIONAL EXPERIENCE

Senior Technical Lead & IT Manager | Sun Data Tech · AT&T Primecomms (USA) | Jun 2017 – Present

Leading full-stack engineering and AI integration for a US telecom retailer operating 3,000+ retail storefronts across the USA.

- Architected and launched 10+ enterprise web portals supporting real-time inventory tracking, sales reporting, and CRM across 3,000+ AT&T storefronts.
- Reduced manual reporting workload by 60%.** Built custom RAG pipelines and integrated OpenAI API (GPT-4o) to automate AI-driven business reports —
- Achieved 40% improvement in page load performance.** Engineered high-performance full-stack systems using React.js, Next.js, Laravel, Node.js, and MySQL —
- Developed Python/Selenium automation regression suites eliminating 20+ hours/week of repetitive manual QA and data-entry workflows.
- Delivered 100% of roadmap milestones on schedule.** Led an agile squad of 6 engineers across sprint planning, code reviews, and stakeholder demos —

Senior Technical Lead | Softobiz Technology | Aug 2015 – Jun 2017

- Delivered 4 concurrent high-priority client projects (Cadence USA, Singapore Education, ESD Fashion, BragOut USA) as sole engineering lead across Laravel, AngularJS, MongoDB, and MySQL stacks.
- Built a digital learning platform for Mathemate.com (Singapore) serving 15,000+ primary school students with adaptive content pipelines.
- Reduced backend response latency by 35% on the Cadence handyman-tracking platform via PHP modularisation and database index redesign.

Senior Web Developer | Shriganesh Biz Tech Pvt. Ltd. | *Dec 2010 – Aug 2015*

- Built and maintained multi-tenant SaaS business suites for Maverick Fitness (500+ gym domains), Megawin Switch Gear, and Blue Star HVAC using CodeIgniter 3 and MySQL.
- Developed a .NET + CouchDB distributed data architecture for Kepler France with full localisation and real-time sync across European corporate nodes.

CERTIFICATIONS

IBM Certified Developer – Generative AI Applications | Coursera | 2026

EDUCATION

M.Sc. Software Engineering | Vinayaka Missions University | 2009 | UGC-recognized institution

WHAT I BRING TO YOUR TEAM

- End-to-end product ownership from architecture to deployment across web, API, and AI layers.
- Proven AI integration expertise — not just theoretical; shipped RAG pipelines in production at enterprise scale.
- International client experience (USA, Singapore, France) with strong communication and stakeholder management skills.
- Agile team lead who writes code and drives delivery — hands-on technical leadership, not just management.
