PROFESSIONAL SUMMARY

Senior Backend Developer with 5+ years of experience designing and scaling high-performance web applications using Laravel, PHP, MySQL, and RESTful APIs. Proven track record of improving API response times by 30–40% through advanced query optimization and indexing. Deep expertise in JWT/RBAC authentication, third-party integrations (payment gateways, SMS, email), and database performance tuning. Actively expanding into microservices architecture, Docker, Redis, and AWS to build cloud-native distributed systems.

TECHNICAL SKILLS

Languages: PHP, JavaScript, Python, HTML5, CSS3
Frameworks: Laravel, Vue.js, Nuxt.js, CodeIgniter, Bootstrap
Databases: MySQL, PostgreSQL — query optimization, indexing, schema design
APIs & Auth: RESTful APIs, JWT Authentication, OAuth 2.0, RBAC, Payment Gateway APIs, SMS/Email APIs
DevOps & Cloud: AWS, Docker (learning), Git, GitHub, Bitbucket, Apache, Nginx, Linux, Bash
Architecture: MVC, OOP, Microservices (learning), Queue/Background Jobs, Scalable API Design, SDLC, Agile/Scrum
Tools & AI: Postman, Composer, Jira, Figma, GitHub Copilot, OpenAI, Claude AI, Gemini

PROFESSIONAL EXPERIENCE

Application Developer | Encureit System Private Limited | Jun 2022 – Present

- Architected and deployed scalable RESTful APIs handling high-concurrency production traffic, maintaining 99.9% uptime across all live systems.
- Optimized critical MySQL queries and indexing strategies, cutting API response times by 30–40% and reducing infrastructure costs by ~20%.
- Engineered JWT-based authentication and Role-Based Access Control (RBAC) for multi-tenant enterprise applications, eliminating unauthorized access vulnerabilities.
- Designed and implemented queue-based background job systems to offload heavy processing tasks, improving overall system throughput and responsiveness.
- Integrated third-party payment gateways, SMS providers, and transactional email APIs, enabling fully automated end-to-end workflows.
- Led code reviews and mentored junior developers, reducing production bug rates and improving team delivery velocity in an Agile/Scrum environment.

PHP Developer | Aspireweb Informatics | Oct 2020 – May 2022

- Built and shipped dynamic, database-driven web applications using Laravel and Vue.js, including admin dashboards, CMS modules, and reporting systems from the ground up.
- Designed normalized relational database schemas in MySQL and optimized complex SQL queries, improving data retrieval performance by an estimated 35% on reporting modules.
- Developed reusable backend modules and RESTful API endpoints, reducing new feature development time by ~25% through component reusability.
- Identified, debugged, and resolved critical production bugs, improving system reliability and reducing error rates across client-facing applications.

PROJECT HIGHLIGHTS

Filmcell — *Laravel, MySQL, Google Maps API, Payment Gateway*

- Engineered backend modules for a government-recognized platform covering customer management, lead tracking, and multi-step approval workflow systems.
- Implemented RBAC, database access controls, and conducted security audits to ensure compliance with government-grade standards.
- Built online location booking with Google Maps integration and payment gateway — application recognized as Best Application by the Honorable Chief Minister of Maharashtra.

StandWith.me — *Laravel, Vue.js, Nuxt.js, MySQL, REST APIs, Payment Gateway*

- Developed an international-scale social media platform with a high-availability Laravel backend supporting thousands of concurrent users.
- Implemented OAuth 2.0 social login, Google Calendar booking, and profile-enrichment features to drive user engagement.
- Integrated payment gateway, SMS gateway, and automated email notifications; designed and documented RESTful APIs consumed by mobile and third-party platforms.

IIPS Content Management System — *PHP, Laravel, MySQL*

- Built a full-featured CMS with customer, lead, and reporting modules serving as the operational backbone for institute management.
- Designed RESTful APIs for mobile and external system integrations; implemented RBAC for secure, role-driven multi-user access.

Yashada — Enterprise ERP & CMS — *Laravel, MySQL*

- Developed CMS and ERP modules for enterprise-level government operations, supporting multi-department management on a unified Laravel platform.
- Implemented role-based access control, online file approval workflows, and sub-website architecture within a single Laravel installation.

EDUCATION

Bachelor of Engineering — Computer Science | University of Pune | Aug 2014 – May 2017

ADDITIONAL INFORMATION

Certifications: Core Java Certification

Awards: Best Performer Award of the Year (2021)

Languages: English, Hindi, Marathi
