

Pranita Sultania

Technical Lead | PHP | Laravel | Java | Microservices | Fintech

+91 7045981223 @ pranita.sultania@gmail.com https://www.linkedin.com/in/pranita-sultania-ab78a710b Mumbai, MH

SUMMARY

Technical Lead with 10+ years of experience delivering backend systems at scale, specialising in PHP, Laravel, Java, Spring Boot, Microservices, and distributed architectures. Built and led engineering teams delivering critical lending and collections platforms at Paytm, one of India's largest fintech companies. Currently leading a cross-functional technology team and driving end-to-end digital transformation at a manufacturing organisation, establishing the engineering function from the ground up. Strong track record in high-ownership delivery, system architecture, team leadership, and stakeholder management.

KEY ACHIEVEMENTS

2023 – Paytm: Rock Star Award

Honored by the Director of Engineering and Engineering Manager as one of 9 peers for exceptional contributions in the Lending Collection vertical.

2022 – Paytm: Rising Star Award

Commended by the Engineering Manager and Technical Leads as one of 15 peers for outstanding performance in the Lending Collection vertical.

2021 – Cisco: Outstanding Performance Recognition

Recognized as one of 12 peers for outstanding contribution and performance in the RJIL 5G project team.

EXPERIENCE

Technical Lead

Rungta Sizing Works and Process

02/2025 - Present Mumbai, Maharashtra

- Contributed 80% toward development and 20% toward team management responsibilities.
- Established and led the technology function for a legacy textile manufacturing organization, transforming manual business processes into scalable digital systems and reducing manual effort by approximately 80%.
- Owned end-to-end system architecture, backend design, database design, and technical roadmap for the organization's digital transformation initiatives.
- Built and maintained the core Laravel backend powering manufacturing workflows, order management, production tracking, and billing across the platform.
- Designed and integrated Java Spring Boot microservices supporting core manufacturing and operational workflows.
- Defined API contracts, service interactions, and backend architecture patterns across distributed systems.
- Partnered with business leadership to digitise legacy workflows into scalable production systems, improving operational efficiency by approximately 35%.
- Established engineering best practices, deployment workflows, and technical standards for the newly formed technology department.
- Acted as the primary technical decision-maker, balancing long-term scalability, maintainability, and business priorities.
- Stack: Laravel, PHP, MySQL, React.js, REST APIs, Java Spring Boot

Technical Lead

Paytm (One97 Communications)

03/2022 - 01/2025 Mumbai, Maharashtra

- Contributed 80% toward development and 20% toward team management responsibilities.
- Directed end-to-end delivery of lending and collections platform features across the microservices ecosystem, from solution design through production deployment.
- Drove development and management of a Laravel-based collection and lending system, integrating and collaborating across multiple Java Spring Boot microservices supporting critical lending and collections workflows.
- Managed feature releases, go-live activities, and production deployments across interconnected backend services, ensuring system reliability and business continuity.
- Participated in architecture discussions, API design, service integrations, and technical solutioning for scalable fintech platforms.
- Improved system stability and performance through proactive monitoring, troubleshooting, and resolution of legacy issues, reducing production incidents by approximately 40%.
- Built and enhanced CI/CD pipelines using Jenkins and Docker, reducing deployment time by approximately 45% and improving release reliability.
- Mentored and guided a team of six engineers, improving delivery consistency, technical ownership, and sprint predictability by approximately 20%.
- Stack: Laravel, MySQL, Kafka, Redis, Docker, Jenkins, AWS, Java, Spring Boot, Microservices

Senior Software Engineer

Zensar Technologies

10/2020 - 03/2022 Mumbai, Maharashtra

- Contributed to a Yii-based 5G automation project for Reliance Jio in collaboration with Cisco.
- Executed over 80 automation scripts for dynamic configurations and router migration bringing down manual uploads from 100% to 5%.
- Enhanced system scalability and processing efficiency through multithreading using Gearman.

EXPERIENCE

Lead PHP Developer

Swych Gift Cards India

📅 07/2019 - 06/2020 📍 Mumbai, Maharashtra

- Built 8 custom white-label platforms using Zend PHP for diverse client requirements.
- Built 2 dynamic back-office portals and implemented website page caching with Redis.

Web Developer

Credit Sudhaar Services Private Limited

📅 02/2019 - 07/2019 📍 Mumbai, Maharashtra

- Implemented over 27 third-party API integrations across the entire system.

Associate Software Developer

Shotformats Digital Production Private Limited

📅 06/2016 - 10/2018 📍 Mumbai, Maharashtra

- Owned and delivered the device insurance platform, including payment gateway integration and core logistics workflows.
- Integrated courier partner APIs (FedEx, Blue Dart) to enable real-time forward and reverse shipment tracking.

Software Development Intern

Shotformats Digital Productions Private Limited

📅 01/2016 - 05/2016 📍 Mumbai, Maharashtra

- Coordinated and completed development tasks for the device insurance project under the guidance of the Engineering Manager.

SKILLS

Backend Technologies

PHP, Laravel, Symfony, Zend, Yii, CodeIgniter, REST APIs, Java, Spring Boot, Microservices

Architecture and Design

System Design, Distributed Systems, Microservices Architecture, API Design, Performance Optimization

Cloud and DevOps

AWS, Docker, Kubernetes, Jenkins, CI/CD

Databases and Messaging

MySQL, MongoDB, Redis, Kafka

Frontend

React.js, AngularJS, JavaScript

Additional Programming Languages

Python, Go

Leadership and Delivery

Agile Scrum, Team Management, Team Scaling, Stakeholder Management, Project Delivery, Sprint Planning, Technical Documentation, Cross-Functional Collaboration

Monitoring and Tools

Grafana, Prometheus, Kibana, Postman, Git, Linux, Shell Scripting, JIRA, Confluence, Cursor, Microsoft Copilot

Engineering Practices

Multithreading, Unit Testing

CERTIFICATIONS

AWS Cloud Practitioner 2020

EDUCATION

BTech in Information Technology

Manipal University Jaipur

📅 08/2012 - 09/2016 📍 Jaipur, Rajasthan
