Pune, Maharashtra, 411033, India | 08793293613

Innovative Full Stack Engineer with 6+ years building scalable PHP/React solutions. Expert in integrating AI-driven workflows (prompt engineering for code generation, debugging, and SEO content optimization) to accelerate development cycles by 30%. Reduced page load times by 55%+ and boosted SEO rankings for 15+ client projects. Combines engineering rigor with modern AI tools to deliver future-proof systems.

Work Experience

Technical Lead

Sep 2021 - Present

Dynamisch | India

Frontend & Frameworks

React.js (Hooks, Context API) | Next.js | Tailwind CSS

Backend & Databases

PHP (Codeigniter/Laravel) | RESTful APIs | PL/SQL | PostgreSQL | MongoDB

AI-Augmented Development

GitHub Copilot | Windsurf AI | Prompt Engineering | AI-Assisted Debugging | LLM Integration

DevOps & Infrastructure

CI/CD Pipelines (GitHub Actions/Jenkins) | Docker | AWS | Server Management | Linux CLI

Tools & Workflow

Git | Jira (Agile/Scrum) | Trello | Postman | VS Code

Business Impact

Client Communication | Stakeholder Management | AI-Driven Process Optimization

•

Software Developer

Jan 2021 - Sep 2021

Nucleosys Tech | Pune, Maharashtra, India

1. Optimized 200+ queries and stored procedures, reducing HRMS report runtime by 68% (25min → 8min) and enhancing system scalability for 10K+ users.

2. Delivered 15+ end-to-end solutions—from database architecture (PL/SQL) to frontend (HTML, PHP)—ensuring compliance with client SLA requirements.

Software Engineer

Dec 2019 - Dec 2020

Montek Tech Services Pvt Ltd. | Pune Area, India

1. Develops information systems by designing, developing, and installing software solutions.

2. Determines operational feasibility by evaluating analysis, problem definition, requirements, solution development, and proposed solutions.

3. Develops software solutions by studying information needs, conferring with users, and studying systems flow, data

usage, and work processes.

4. Investigates problem areas.

5. Follows the software development lifecycle.

6. Documents and demonstrates solutions by developing documentation, flowcharts, layouts, diagrams, charts, code comments, and clear code.

7. Prepares and installs solutions by determining and designing system specifications, standards, and programming.

8. Improves operations by conducting systems analysis and recommending changes in policies and procedures.

9. Obtains and licenses software by obtaining required information from vendors, recommending purchases, and testing and approving products.

10. Protects operations by keeping information confidential.

11. Provides information by collecting, analyzing, and summarizing development and service issues.

12. Accomplishes engineering and organization mission by completing related results as needed.

Php Developer

Sep 2018 - Nov 2019

Gatitaa Technology Private Limited | Pune Area, India

1. Write “clean”, well-designed code

2. Produce detailed specifications

3. Troubleshoot, test, and maintain the core product software and databases to ensure strong optimization and functionality.

4. Contribute in all phases of the development lifecycle

5. Follow industry best practices

6. Develop and deploy new features to facilitate related procedures and tools if necessary

Projects

I-Bin Smart Waste Collection And Management System (Final semester project)
