About Me

Full stack developer with 6.5 + years of experience with website and web application building, front end and back end development. Driven to provide excellent service and high quality coding to create secure and functional sites for clients. Experience in maintaining the developed sites with adding new requirements

Works

Latest Project

Current Project: Hotel Booking Web Application

Tech Stack: Laravel 12, PHP, MySQL, JavaScript, jQuery, HTML5, CSS3, Bootstrap

Key Responsibilities & Achievements:

- Developing a full-fledged room booking web application from scratch using Laravel framework.
- Implemented multi-user login functionality.
- Integrated Two-Factor Authentication (2FA) using Google Authenticator to enhance security.
- Built dynamic room and pricing modules, including:
 - Real-time availability checking based on current bookings.
 - Rate calculation logic for weekdays, weekends, and festival seasons using date range conditions.
- Developed an advanced booking system:
 - Included filters by date, status, room type, and customer.
 - Calendar view integration with drag-and-drop booking visualization using jQuery and FullCalendar.
- Built responsive modals and dynamic forms using jQuery for booking actions.
- Integrated WhatsApp SMS notifications for booking confirmations.
- Used AJAX and Laravel validation for seamless, real-time user interactions and form handling.

Previous Projects

- Developed e commerce website both front-end and back-end
- Maintenance of job portal website
- Developed Rest apis for e commerce project
- Developed various cms and dynamic websites
