PROFESSIONAL SUMMARY

Senior PHP Developer (PHP / Laravel) with 3.5+ years of experience delivering scalable web applications across healthcare, community platforms, and enterprise sectors. Specialises in Laravel, CodeIgniter, Eloquent ORM, RESTful API design, OOP, and Design Patterns, with strong command of MySQL. Currently leading a backend team on a community platform architected for 10,000+ users, maintaining a 90%+ task completion rate from day one. Proven expertise in payment gateway integration, CI/CD automation, process optimisation, and developer mentoring. Seeking to contribute hands-on backend leadership to an innovative team.

PROFESSIONAL EXPERIENCE

Senior PHP Developer

Nov 2025 – Present

Smartlounge IT Solutions | Ernakulam, Kerala, India

- Optimised backend architecture across multiple Laravel and CodeIgniter applications, tuning Eloquent ORM queries and MySQL performance to maintain 99.9% uptime across all live environments.
- Overseeing an engineering team on a platform built to handle 10,000+ concurrent users — standardising coding conventions, conducting code audits, and driving consistent on-time delivery across all sprints.
- Engineered end-to-end payment gateway integrations covering transaction initiation, callbacks, webhooks, reconciliation, and failure handling, reducing payment failure rates by ~25%.
- Championed security hardening across APIs, payment flows, and user data pipelines, minimising vulnerability exposure across all live systems.
- Mentored 3-5 junior developers via in-depth code reviews and technical guidance, accelerating team throughput and raising code quality standards.

Software Developer

Nov 2024 – Oct 2025

LakTech Innovations | Kottayam, Kerala, India

- Built and deployed a real-time Token Management System for hospital workflow automation using PHP, Laravel, Artisan CLI, and Bootstrap, streamlining patient flow across 7+ departments and cutting manual coordination time by ~40%.
- Developed a robust Order Management System leveraging Eloquent ORM, role-based access control, and RESTful APIs, replacing Excel-based processes across 4+ departments and eliminating manual data entry errors entirely.
- Streamlined spreadsheet-based workflows across multiple departments using Artisan CLI automation, enabling live service delivery and slashing average processing time significantly.
- Administered server provisioning and production maintenance on Linux/Apache and Nginx environments, ensuring consistent uptime and system stability.

Associate Software Developer

Sep 2022 – Oct 2024

CODEPOINT Softwares Pvt. Ltd. | Ernakulam, Kerala, India

- Directed a team delivering full-stack web applications using HTML, CSS, JavaScript, React.js, Laravel, Blade templating, and CodeIgniter, meeting all project deadlines across multiple client engagements.
- Refactored and optimised application features using OOP principles and Design Patterns, improving application load times by ~30% and enhancing user experience across client projects.
- Integrated RESTful APIs with Swagger documentation and strengthened application integrity, enabling improved data processing and system interoperability across platforms.
- Partnered with designers, project managers, and QA testers in an Agile/Scrum environment, ensuring smooth handoffs and on-time deployments.

KEY PROJECTS

Pride Community Platform — Backend Team Lead

Nov 2025 – Present

Stack: Laravel, Eloquent ORM, MySQL, RESTful APIs, WebSockets | Scale: 10,000+ users (estimated)

- Spearheading server-side development for a large-scale social platform with 8+ modules: Unity Circle, Incident Reporting, Marketplace, Business Directory, Events, Dating, and Live Classes and more.
- Constructed RESTful APIs, WebSocket event channels, and high-performance MySQL schemas to support 10,000+ concurrent users, optimising Eloquent ORM queries across all modules.
- Executed all backend audits and pull request approvals, upholding API integrity and enforcing best practices across the full team.

Real-Time Token Management System — Hospital Workflow

Nov 2024 – Jan 2025

Stack: PHP, Laravel, Eloquent ORM, WebSockets, Bootstrap, Artisan CLI

- Designed and delivered a live hospital queue management system serving 3+ departments, replacing 100% of manual token processes and reducing patient wait times by ~40%.
- Integrated WebSocket-driven Laravel Broadcasting for instant token synchronisation across all display screens and staff devices with zero-page refresh required.
- Resolved complex token state conflicts by implementing error-proof generation, hold, and call-next logic, boosting operational efficiency and eliminating duplication errors.

ACHIEVEMENTS & LEADERSHIP

- Promoted to Backend Team Lead at Smartlounge IT Solutions, overseeing system design decisions, code reviews, and API output for a platform targeting 10,000+ users.
- Maintained a 90%+ personal task completion rate across the full Pride Community Platform project lifecycle, from initial planning through active delivery.
- Coached a cohort of 3-5 junior developers in targeted feedback sessions, elevating team productivity and raising overall standards.
- Led and organised an e-waste management exhibition, coordinating logistics, participants, and community awareness initiatives end to end.
- Shipped a hospital workflow system that fully replaced all paper-based queue processes across 3+ departments, trimming handover overhead by ~40%.

TECHNICAL SKILLS

Languages: PHP, JavaScript, SQL, C, C++

Frameworks & Libraries: Laravel, CodeIgniter, React.js, Vue.js, jQuery, TailwindCSS, Blade, Smarty

Laravel Ecosystem: Eloquent ORM, Artisan CLI, Laravel Broadcasting, WebSockets, Composer

Architecture & Patterns: MVC Architecture, OOP, Design Patterns (Repository, Service Layer), RESTful API Design, API Integration

Frontend Tooling: npm, Webpack

Databases & Tools: MySQL, Caching (Redis), MongoDB, PHPMyAdmin, Postman, Swagger / OpenAPI, Git, PHPStorm

Web Servers: Nginx, Apache

DevOps & Cloud: Linux CLI, cPanel, Server Deployment, Production Maintenance

Testing: PHPUnit, Unit Testing

Specialisations: Payment Gateway Integration, Role-Based Access Control, Secure Coding, Code Review

Methodologies: Agile, Scrum

Soft Skills: Team Leadership, Mentoring & Coaching, Stakeholder Collaboration, Initiative & Ownership, Communication

EDUCATION

Bachelor of Computer Application (BCA)

Mahatma Gandhi University | Kerala, India | CGPA: 7.03 / 10 (as per university CCPA system)

Graduated April 2022

Higher Secondary Certificate – Computer Science

St. Ephrems HSS, Mannanam, Kerala, India

Graduated March 2019

LANGUAGES

English — Professional working proficiency (spoken & written)

Tamil — spoken

Malayalam — Native
