<i>Livewire</i>	<i>Jquery</i>	<i>Oracle</i>	<i>AWS</i>	<i>Queue</i>
<i>Lumen</i>	<i>Ajax</i>		<i>Nginx</i>	<i>Task Scheduler</i>
<i>CodeIgniter</i>	<i>HTML</i>			
	<i>CSS</i>			
	<i>Bootstrap</i>			
	<i>Tailwind</i>			
	<i>Canvas</i>			

Employment History

Senior Software Engineer at Sigma Infosolutions Pvt. Ltd (Bangalore)

June 2023 - Present

- Integral member of the full-stack development team specializing in React.js and Laravel.
- Engineered microservices in Node.js for ecommerce cron jobs, enhancing system efficiency.
- Successfully modernized legacy Laravel projects, migrating front-end to React.js.
- Implemented a transition from polling mechanisms to event-driven architecture using Socket.io and Redis for the ecommerce support portal.
- Proficient in Payment Integrations: Razorpay, Stripe.
- Expertise in Technologies: PHP, React.js, Laravel, Livewire, JavaScript, jQuery, Ajax, Lumen (Microframework), CodeIgniter, Redis-Socket.io, Queue, Task Scheduler, HTML, CSS, Bootstrap, Tailwind.
- Extensive experience with Databases: MySQL, MS SQL, Oracle.
- Managed servers on Nginx, Apache, IIS, and AWS.
- Utilized Bitbucket for Version Control and Jira for Project Tracking.

Senior Software Engineer at Y2Z Labs Pvt. Ltd (Technopark, Thiruvananthapuram)

October 2019 – June 2023

- Developed Edaya, the company's core product, an innovative hospitality cloud application that replaces traditional PMS systems in hotels. Also created REST APIs for mobile applications for guests to order food and make hotel-related requests seamlessly.

- Architected the database design and software workflow from scratch using PHP Laravel as the primary backend and MySQL as the database. Integrated Web sockets (Redis-Socket.io) and Firebase for real-time communication, Queues for asynchronous operations, and Laravel Task Scheduler for cron jobs.
- Utilized various mainstream technologies such as CodeIgniter, Lumen (Microframework), React, Canvas, JavaScript, jQuery, Ajax and Livewire for other projects.
- Other Main Projects are Surveys and Case System Management for BPOs.
- Surveys Application is used for creating graphical surveys and triggering the survey at the end of each customer calls. Customers who opted out won't be getting the survey. Survey responses are shown real time and negative survey responses are also notified to the higher management the moment they get a negative survey.
- Case Management Systems are useful for BPOs where executives will be able to know the customer identity and history with the company without even picking up the call as when the call comes a popup screen with customer details and history will be opened on the computer screen.
- Payment Integrations: Razor pay.
- Technologies: Php, Laravel, Livewire, JavaScript, JQuery, Ajax, Lumen (Microframework), CodeIgniter, Redis-Socket.io, Queue, Task Scheduler, ReactJs, HTML, CSS, Bootstrap, Tailwind
- Databases: Mysql, MsSql, Oracle
- Server: Apache, IIS, AWS
- Version Control: GitLab

Software Engineer at Scrubz FZC (Ajman Free Zone, Ajman, UAE)

May 2015 – October 2019

- Developed the company's e-commerce website using BigCommerce and created a web service in PHP to efficiently update product stocks from different suppliers.
- Payment Integrations: 2Checkout.
- Technologies: Php, Javascript, Ajax, BigCommerce, Shopify
- Databases: Mysql

Junior Software Engineer at Digits Innovators LLP (Kannur, Kerala)

April 2014 – February 2015

- Utilized crucial design software skills to assist with projects.
- Implemented and updated application modules under the direction of Senior Software Developers.
- Effectively coded software changes and alterations based on specific design specifications.
- Technologies: Php, Mysql, Javascript, JQuery and Ajax
- Databases: Mysql
