ABOUT ME

Technical Lead and Full Stack Developer with 7+ years of experience designing, developing, and integrating ERP, CRM, healthcare, and eCommerce platforms using Laravel, PHP, Vue.js, Livewire, Filament, MySQL, Docker, and modern web technologies.

Experienced in architecting API-driven business applications, designing database schemas, optimizing large-scale systems, and integrating enterprise platforms including Salesforce, VICIdial, PayPal, AWS S3, Airtel IQ, Shiprocket, Blue Dart, DTDC, and Google APIs.

Proven track record of delivering healthcare ERP solutions, multi-brand eCommerce platforms, centralized lead management systems, and CRM integrations while mentoring development teams, improving application performance, and translating complex business requirements into scalable technical solutions.

LANGUAGES

- Malayalam
- Hindi
- English
- Gujarati
- Tamil (Basic)
- Mandrian (Basic)

EDUCATION

Veer Narmad South Gujarat University, Surat 2007-2010	Master of Computer Application Web Technology
Sardar Patel University, Anand 2003 - 2006	Bachelor of Science Information Science
Gujarat State Higher Secondary Education Board 2003	H.S.C Science
Gujarat State Education Board 2000	S.S.C

KEY PROJECTS

- CoE ERP
- Trichella ERP
- Clinical eCommerce Platform
- VCare Products
- CRM & Dialler Platform
- Centralized Lead Management Platform

SKILLS

- **Backend**

Laravel, PHP, REST APIs, Yii2, MySQL

- **Frontend**

Vue.js, Livewire, Alpine.js, JavaScript, JQuery, AJAX, Vite

- **Architecture**

Modular Monolith, API-First Design, Database Design, Design Patterns, SOLID

- **Infrastructure & Cloud**

Docker, Nginx, Linux, Cron Jobs, Supervisor, Queue Workers, AWS (EC2, IAM, Security Groups, Route 53)

- **Integrations**

Salesforce, VICIdial, PayPal, AWS S3, Airtel IQ, Shiprocket, Blue Dart, DTDC, Google Maps API

- **Performance**

Query Optimization, Caching, Indexing, N+1 Resolution, Search Optimization

- **Version Control & VCS**

Git.GitHub.CI/CD.Release Management,Branching Strategies (Git Flow)

EXPERIENCE

Praba's Vcare Health Clinic Pvt. Ltd.

2022 - 2026

- Customized Aureus ERP architecture to support healthcare and clinical business workflows, including patient, consultation, billing, and operational processes.
- Designed and implemented database schemas and workflows for Trichella ERP based on business requirements and stakeholder discussions.
- Built and enhanced CRM, Dialler, ERP, and eCommerce platforms supporting healthcare and beauty industry operations.
- Developed a centralized lead management platform supporting 85+ landing pages with dynamic field mapping and routing to multiple CRM environments.
- Designed API-based synchronization pipelines between cloud-hosted lead systems and internal CRM infrastructure using scheduled jobs and cron automation.
- Developed secure third-party APIs enabling vendors and partners to push customer and lead data into internal CRM systems.
- Built integrations with Salesforce, VICIdial, Airtel IQ, Pabbly, AWS S3, Google Maps, Shiprocket, Blue Dart, DTDC, and PayPal.
- Developed healthcare-focused eCommerce platforms integrated with a legacy Java ERP for prescription validation, order processing, and customer-specific product visibility.
- Implemented questionnaire-driven product recommendation workflows for Trichella eCommerce.
- Managed queue workers, cron jobs, and Supervisor-based background services for email delivery, OTP processing, lead synchronization, and automated token management.
- Automated Blue Dart authentication token renewal and integration workflows to ensure uninterrupted shipping operations.
- Configured and maintained Nginx-based production environments, including recovery and restoration of compromised server environments.
- Optimized application performance through query tuning, indexing, caching, eager loading strategies, N+1 query resolution, and search optimization.
- Integrated PayPal refund workflows supporting full and partial order cancellations based on complex business validation rules.
- Refactored legacy codebases and junior-developed modules to improve maintainability, scalability, and performance using SOLID principles and design patterns.
- Mentored and guided a development team of 8 engineers through code reviews, architecture discussions, troubleshooting sessions, and solution design workshops.
- Utilized Docker-based development environments for ERP application deployment and team development workflows.

REFERENCES

Mayur Tayade(Admin)

Phone: +91 9909902288

Sr.PHP Developer

Unistar Softech Pvt. Ltd.

- Designed and developed scalable RESTful APIs for web applications, improving system performance, scalability, and response times.
- Refactored and optimized legacy codebases, significantly improving code readability, maintainability, and development efficiency.
- Developed and maintained backend services, microservice integrations, and third-party API connections to support business operations.
- Designed and optimized relational database schemas, queries, and indexing strategies to ensure high performance and data integrity.
- Conducted code reviews, enforced coding standards, and promoted best practices including SOLID principles and design patterns.
- Collaborated closely with frontend developers to integrate user-facing components with backend services and APIs.
- Implemented authentication, authorization, and security best practices to protect application data and system resources.
- Participated in system architecture discussions, performance tuning, debugging, and production issue resolution.
- Worked within Agile development environments, contributing to sprint planning, estimation, and delivery of business-critical features.

Asst. Professor

Hunan University of Science & Engineering , China

- Developed and delivered undergraduate and postgraduate courses in Computer Science, including PHP, Java, Software Engineering, Design Patterns, Web Development, and Application Frameworks.
- Designed course materials, assignments, practical labs, and assessments aligned with academic and industry standards.
- Mentored students on academic projects, internships, and career development, helping bridge the gap between academia and industry.
- Established and maintained relationships with industry partners to facilitate internships, training programs, and employment opportunities for students.
- Collaborated with faculty members across departments to create interdisciplinary learning initiatives and enhance the overall student experience.
- Participated in curriculum development and continuous improvement activities to keep programs aligned with emerging technologies and industry needs.
- Assisted in the evaluation, interviewing, and selection of faculty members, research assistants, and graduate students.
- Contributed to departmental planning, academic advising, student assessments, and quality assurance initiatives.
