

REMYA R KRISHNAN

Objective

Experienced software developer with 10 plus years of total expertise in web development, specializing in Laravel, Vue.js, JavaScript, PHP, and Perl. Proven track record of delivering high-quality software solutions, leading development teams, and applying design patterns and object-oriented programming (OOP) concepts effectively. Skilled at leveraging these principles to build scalable and maintainable applications. With 6 years of full-stack development experience using Vue.js and Laravel, I am seeking to contribute my expertise to a dynamic development team.

Technical Skills

- Programming Languages: PHP, Perl, JavaScript, HTML, CSS
- Frameworks/Libraries: Laravel, Vue.js, jQuery, Catalyst Perl
- Databases: MySQL
- Tools: Git, JIRA
- Other: SCSS, Tailwind css, Linux, InertiaJS, Memcached, Bootstrap css
- Key Skills: Laravel, PHP, Perl, Vue.js, JavaScript, Memcached, MySQL, RESTful API Integration, CSV, Cache Management, Linux

Professional Experience

Senior Developer | TeqinValley | Jan 2025 - Present

- Designed and developed a web-based recharge coupon selling system with API support for mobile platforms. Key features include:
- **REST API for Mobile Use:** Provided secure APIs for third-party mobile applications to handle coupon sales.
- **Admin Portal:** Implemented a role-based admin panel for super admins and users to manage stores, branches, and employee access.
- **Coupon Management:** Integrated with third-party providers **Likecard** and **Bitaqaty** to fetch coupons at scheduled intervals; coupons can be edited, categorized, or deactivated from the admin panel.
- **Manual Categorization:** Allowed custom creation of coupon categories for better

organization.

- **Payment Gateway Integration:** Integrated **Edfapay** for secure and seamless payment processing.
- **Multilingual Support:** Implemented full Arabic language support using Vue.js i18n.
- **Admin Dashboard:** Created a real-time dashboard for tracking sales, activity, and system performance.
- Developed a comprehensive Loan Management System using Vue.js for the frontend and Laravel for the backend. The system includes modules for loan management, customers, admins, loan officers, auditors, investors, and investment management.

Senior Software Engineer | Absilt Technologies | Jan 2023 – Jan 2025

- Orchestrated a team of 3 developers to design and implement a business management system, resulting in a 30% reduction in customer response time through the adept utilisation of Laravel and Vue.
- Mentored junior developers by offering invaluable guidance on best practices and conducting comprehensive code reviews.
- Demonstrated proficiency in modular programming using Laravel, ensuring the autonomy of each module with dedicated controllers, routes, and service classes.- Implemented various design patterns to enhance the maintainability and scalability of the application, contributing to its long-term efficiency

Senior Software Engineer| BEO Softwares | Jan 2020 – Dec 2022 & 2013 July -2015 Dec

- Developed a scalable web platform using Laravel and vue js, contributing to enhanced user experience and performance.
- Implemented new features and optimized existing ones to improve user experience and performance. Participated in daily stand-ups and sprint planning sessions to ensure efficient project execution.
- Created migration scripts and conducted extensive debugging and troubleshooting to resolve complex software issues, ensuring optimal system performance and reliability.
- Demonstrated expertise in working with RESTful APIs, designing and implementing robust, scalable, and secure endpoints for seamless communication between client applications and backend services

Perl/PHP Developer| Spectrum Softtech Solutions | Jan 2010 – 2013 July

- Assisted in the development of web applications using HTML, CSS, JavaScript, and PHP/Perl.
- Conducted unit testing and debugging to ensure code quality and functionality
- Collaborated with designers to create user-friendly, mobile friendly interfaces

Major Projects

- Pixicard

Pixicard is a recharge coupon selling platform developed by a two-member team using Laravel and Vue.js. The project features a secure backend with REST APIs for mobile integrations, enabling third-party apps to handle coupon purchases. The web-based admin panel supports multi-level user access, store and branch management, and employee roles. Coupons are automatically fetched from external providers like Likecard and Bitaqaty, with the ability to manage and categorize them manually. The platform also includes Edfapay payment gateway integration, Arabic language support, and a real-time admin dashboard for operational insights.

- Loan Management System

A full-stack loan management platform built with Vue.js and Laravel. The system provides a multi-user environment with dedicated modules for various stakeholders, including loan management, customers, administrators, loan officers, auditors, investors, and investment management. The platform is designed to streamline the entire loan lifecycle, from application to repayment, while ensuring secure access and data integrity for all user roles. RemyaRKrishnanResume.docx

- Business Management System (BMS)

BMS is a big-scale web application. It aims to simplify the entire workflow of small or medium or big-scale supermarkets as well as stores and also finds and eradicates the current obstacles. Team is focused on implementing the automation ability nearly 70 – 80%. It includes subscriptions, addons, sales, purchase, staff modules, POS, products, categories, brands. Etc modules

- Printing Portals

Actively involved in the redevelopment of Print24, an online custom printing service platform, where I participated in migrating the legacy backend from Perl to PHP (Laravel) while also contributing to enhancements on both the backend and frontend. The frontend was built using Vue.js, and the backend was restructured with Laravel. My responsibilities included migrating complex product data—such as products, categories, property combinations, and price matrices—using custom Perl scripts, ensuring data integrity throughout the process. I also worked on implementing language translation

features, optimizing backend modules, and improving dynamic pricing logic based on configurable product attributes.

- Frankstrade

An auction website focusing on live birds and animals. Features to check weather status, expected delivery, lives embargo etc before purchasing/shipping. User friendly methods for buyer-seller communication. Features like forum, buyer/seller rating and feedback etc.

- EasyFlow

EasyFlow is the core module used to extend SpectraMedi's(US based Medical Transcription Company) dictation and transcription services. The HIPAA-compliant EasyFlow module securely and reliably handles the storage, movement, and management of voice and transcription files. EasyFlow is a web-accessible, server-based system. Readily accessible and dynamically scalable to meet the dictation and transcription requirements, EasyFlow delivers all the benefits of an enterprise in-house system without the in-house costs and maintenance.

- Time tracker (door access system)

This Software Tracks every activity of employees and storing the records using MySQL. This helps for monitoring the work time of employees. Developed and implemented schedulers for mailing employees if they are late or early going

- Antikcart

Antikcart.com is a niche e-commerce platform focused on selling antique and vintage collectibles, including rare fountain pens, classic timepieces, and heritage accessories. The platform provides a smooth and secure shopping experience for enthusiasts and collectors of antique materials.

As a Full Stack Developer, I was responsible for building the application from the ground up using Vue.js (frontend) and Laravel (backend). I also integrated Razorpay for secure online payments and developed a fully functional admin backend to manage day-to-day operations.

Educational Qualification

☐ High School Education (SCSHS Valamangalam) -89%

☐ Higher Secondary Education (12th). (TDHSS Thuravoor).-86%

☐ BCA. (Amrita School Of Arts & Sciences, Cochin).-75%

- ☐ 6 Months LAMP Training in Spectrum Softtech Solutions
- ☐ Pursuing MCA 1st semester at Manipal University Jaipur (Online)

Certifications and trainings obtained

- ☐ Six months Perl/PHP Training.

Personal Details

- ☐ Nationality: Indian
- ☐ Date Birth: 18th May 1989
- ☐ Marital status: Married
- ☐ Contact No: +91-9656066839
- ☐ Email: remyacool1000bc@gmail.com
- ☐ Language Skills: English, Hindi, Malayalam.

Affirmation

I assure you, if given a chance to work in your esteemed organisation; I will prove my ability and will work to the best of my knowledge.

Place: Cochin, Kerala
