ABOUT ME

RESULTS-DRIVEN SENIOR PHP LARAVEL DEVELOPER WITH 6+ YEARS OF EXPERIENCE IN BUILDING SCALABLE, SECURE, AND HIGH-PERFORMANCE WEB APPLICATIONS. SPECIALIZED IN DEVELOPING ENTERPRISE-LEVEL BACKEND SYSTEMS, REST APIS, AND SAAS PLATFORMS USING LARAVEL AND MODERN PHP ECOSYSTEM. STRONG EXPERTISE IN DATABASE DESIGN, THIRD-PARTY INTEGRATIONS, AND SYSTEM ARCHITECTURE ACROSS DOMAINS LIKE EDTECH, FINTECH, AND HEALTHCARE.

EXPERIENCE

Corenest Infotech

2020 - Present

Senior PHP Laravel Developer

- Designed and developed robust web applications using PHP (Laravel), ensuring scalability, maintainability, and high performance
- Built and managed RESTful APIs for web and mobile applications, enabling seamless integration across platforms
- Architected and implemented modular and reusable backend systems, reducing development time and improving code quality
- Developed complex database structures and optimized queries using MySQL, improving system performance and response time
- Integrated multiple third-party services such as payment gateways, CRM systems, and cloud APIs
- Implemented authentication and authorization systems including JWT, OAuth, and role-based access control
- Worked with frontend teams to integrate APIs with modern UI frameworks, ensuring smooth data flow and user experience
-

TECH STACK

- **Backend:** PHP, Laravel, REST APIs, Microservices
- **Database:** MySQL, PostgreSQL
- **Frontend (Basic):** HTML, CSS, JavaScript, jQuery
- **DevOps & Cloud:** AWS, DigitalOcean, Docker
- **Tools:** Git, Postman, JIRA
- **Integrations:** Payment Gateways, Third-party APIs, Webhooks

PROJECTS

Afterpay – Buy Now Pay Later System

www.afterpay.com

- Built backend services for a Buy Now Pay Later (BNPL) financial system handling installment-based payments
- Developed secure APIs using Laravel for payment scheduling, transaction management, and customer accounts
- Implemented EMI calculation engine with flexible repayment plans and due-date tracking
- Integrated payment gateways and third-party financial services for real-time processing
- Developed fraud detection and validation logic to reduce risky transactions
- Built admin dashboards for managing users, transactions, repayments, and financial reports
- Ensured data security using encryption, tokenization, and secure authentication (JWT/OAuth)
- Optimized system to handle high-volume concurrent transactions

Tech Stack: Laravel, PHP, MySQL, REST APIs, Payment Gateway APIs, AWS

Coviu – Telehealth

www.coviu.com

- Developed a backend system for a secure telehealth platform enabling virtual doctor-patient consultations
- Built APIs using Laravel for managing appointments, sessions, and patient records
- Integrated video conferencing APIs (WebRTC / third-party services) for real-time consultations
- Implemented scheduling system with availability tracking, booking management, and reminders
- Built secure patient data handling system ensuring compliance with healthcare standards
- Developed notification system (email/SMS) for appointment confirmations and follow-ups
- Created admin dashboards for clinics to manage doctors, patients, and session history
- Improved performance and reliability for handling multiple concurrent video sessions
- **Tech Stack:** Laravel, PHP, MySQL, WebRTC APIs, REST APIs, AWS

OpenLearning

www.openlearning.com

- Developed a scalable backend system for an online learning experience platform focused on collaborative and interactive education
- Built robust APIs using Laravel to manage courses, modules, student enrollments, and learning progress
- Designed a discussion and engagement system enabling students and instructors to interact through posts, comments, and peer reviews
- Implemented role-based access control for admins, educators, and learners with secure authentication mechanisms
- Integrated third-party services for notifications, content delivery, and external learning tools
- Optimized database queries and backend performance using caching, queues, and background jobs
- Ensured platform scalability to support large numbers of concurrent users and course content delivery
- **Tech Stack:** Laravel, PHP, MySQL, Redis, REST APIs, AWS
