PROFESSIONAL SUMMARY

Results-driven Software Engineer with over 2 years of professional experience specializing in backend architecture and full-stack development. Proven expertise in building, optimizing, and maintaining scalable enterprise web applications using **Laravel (PHP)** and Python (Django/Flask). Adept at designing complex database schemas, integrating third-party APIs, and developing interactive dashboards. Seeking a challenging Software Developer role in a forward-thinking MNC or the Dubai IT sector to leverage technical expertise in driving efficient, high-performance software solutions.

TECHNICAL SKILLS

Backend Frameworks & Languages: PHP (Laravel), Python (Django, Flask)

Frontend Technologies: HTML5, CSS3, JavaScript, AJAX, Bootstrap, Tailwind CSS

Data Visualization: Chart.js, D3.js, SVG

Databases: MySQL, PostgreSQL

Tools & Concepts: REST API Integration, Role-Based Access Control (RBAC), Authentication (Breeze, Jetstream, LDAP), CRUD Operations, Agile Development, Database Schema Design

PROFESSIONAL EXPERIENCE

Software Engineer (Laravel Development)

March 2024 – Present

Cochin Shipyard Limited

Spearhead the end-to-end development of multiple enterprise-grade Laravel applications to digitize and streamline internal shipbuilding and IT operations.

- Multi-Functional Shipbuilding ERP:** Architected an integrated system for Indent Tracking, Bill of Materials (BOM) management, MLF, and Yard Tracking, significantly optimizing shipbuilding supply chain workflows.
- Task Management System:** Developed a customized, Jira-like project tracking application using Laravel, MySQL, and AJAX. Implemented role-based authentication (Admin/User), CRUD operations via Laravel controllers, and built interactive project overview dashboards using Chart.js.
- Live Desk & Resource Management:** Engineered a real-time system monitoring tool leveraging external REST APIs to track live system usage, hardware availability, and active user login/logout sessions across the network.
- Material Estimation Module:** Built a dedicated application for accurate material purchasing and real-time indent tracking, improving overall procurement efficiency.
- Approval Workflow Portal:** Implemented a secure Laravel-based portal to manage internal system updates and multi-level data approvals.
- IT Administration:** Co-managed IT networking infrastructure, administered security protocols, and provided vital system maintenance support.

- Developed full-stack web applications utilizing Python frameworks including Django and Flask, establishing seamless backend-to-frontend integrations.
- Designed and implemented clean, responsive frontend layouts employing HTML, CSS, JavaScript, and Bootstrap.
- Collaborated closely with senior developers across the Software Development Life Cycle (SDLC) to debug, test, and successfully deploy highly functional web applications.

ACADEMIC & PERSONAL PROJECTS

Online Shopping Platform

Python, Django, HTML, CSS

- Built a comprehensive e-commerce platform enabling users to dynamically browse product catalogs, utilize selection carts, and securely purchase items.

Emotion Recognition System (Autism Assistance)

Python, Django, FER

- Developed an innovative serious gaming platform aimed at assisting children with Autism Spectrum Disorder (ASD) in enhancing emotional intelligence.
- Integrated a Facial Expression Recognition (FER) algorithm alongside Django to accurately identify and analyze emotional responses in real-time.

EDUCATION

B.Tech in Computer Science and Engineering

2020 – 2023

APJ Abdul Kalam Technological University

- CGPA: 8.14

Diploma in Computer Science

2017 – 2020

State Board of Technical Education

- CGPA: 8.21

CERTIFICATIONS & ACHIEVEMENTS

- **Act Apprenticeship (1 Year Training)** – Cochin Shipyard Limited: Completed comprehensive technical training and hands-on software development experience.
- **Full Stack Development Certification** – Inmakes Infotech Pvt. Ltd (Aug 2023): Developed web applications integrating Django backends with modern frontend technologies.
- **Paper Presentation (ICET 2022)** – International Conference on Emerging Technologies: Presented a technical paper on "Movie Recommendation System utilizing Machine Learning."
