Coimbatore, TN, India

saravanakumar170588@gmail.com

OBJECTIVE

To pursue a challenging career and be part of a progressing organization that offers scope to enhance my knowledge, skills and reach the pinnacle with dedication and hard work

JOB RESPONSE

- ✚ **Web-based Product Development:** Responsible for creating and implementing an array of web-based products using PHP, MySQL, Laravel, Symfony, Pimcore, Vue JS, Node.js, Express.js, and JavaScript.
- ✚ **Back-end Development:** Developed robust back-end components and connected the application with various web services to enhance functionality.
- ✚ **Front-end Collaboration:** Assisted front-end developers to ensure seamless integration of their work with the overall application architecture.
- ✚ **High-Quality Code:** Wrote clean, fast, and scalable PHP code to a high standard, ensuring timely delivery of projects.
- ✚ **Detailed Specifications:** Produced detailed specifications to guide development and ensure project requirements were met.
- ✚ **Maintenance and Troubleshooting:** Troubleshot, tested, and maintained core product software and databases to ensure reliability and performance.
- ✚ **Problem Solving:** Demonstrated self-motivation, attention to detail, and creative problem-solving skills in addressing complex challenges.
- ✚ **Coding and Design Proficiency:** Proficient in both coding and design, as well as software testing and debugging.
- ✚ **Fluency in Multiple Languages:** Fluent in PHP, JavaScript, and other coding languages, allowing for versatile development capabilities.
- ✚ **SEO Implementation:** Integrated SEO best practices to enhance the visibility and ranking of web products in search engines.
- ✚ **Security:** Implemented robust security measures to protect web applications from vulnerabilities and threats.
- ✚ **Infrastructure Management:** Utilized Kubernetes for container orchestration and AWS services for deployment, ensuring scalable and efficient infrastructure management.
- ✚ **Teamwork and Leadership:** Excelled in team environments and leadership roles, having managed two web and software development projects successfully.

TECHNICAL SKILLS

- ✚ Object-Oriented Approach : **OOPS paradigm**
- ✚ Client-Side Scripting Language : **HTML5, CSS3, Bootstraps, JavaScript, jQuery, Vue JS, Angular and Ext JS**
- ✚ Server-Side Scripting Language : **PHP, NodeJS**
- ✚ MVC Frameworks: : **Laravel, Symfony, Yii2, Vitiger CRM, Core PHP**
- ✚ CMS : **Pimcore**
- ✚ Hybrid App Build Tools : **PhoneGap, Cordova**
- ✚ RDBMS : **MySQL, PostgreSQL, MS SQL Server**
- ✚ NO SQL : **MongoDB**
- ✚ Version Tools : **SVN, GIT**
- ✚ Template Language : **Smarty, Blade, Twig**
- ✚ Mobile App Deployment : **Play-Store, App-Store**
- ✚ Web Development Tools : **Apache Server (WAMP/LAMP/XAMPP Stacks), Redis, Memcached, Debug, Putty, SSH, FTP, Samba, GIT.**
- ✚ Testing : **PHP Unit Testing**
- ✚ Code Standard : **PSR-1, PSR-2, Sonar Lint**
- ✚ Build Tools : **Azure DevOps, Jenkins.**
- ✚ Web Security : **OAuth2 SSO, reCAPTCHA, password hashing, XSS, CSRF tokens, SQL injection prevention**
- ✚ Third-Party Integration : **Social media (Facebook, Twitter, YouTube API), Payment Gateways, Messaging APIs for sending emails and messages**

MANAGMENT SKILLS

- ✚ **Learning Ability:** Quickly grasp new concepts and technologies, continuously improving knowledge and skills to stay current with industry trends.
- ✚ **Strong Work Ethics:** Demonstrate dedication and commitment to delivering high-quality work, consistently going above and beyond to meet project goals.
- ✚ **Punctual and Adaptable:** Reliable and timely, able to adjust to changing circumstances and requirements with ease, ensuring project continuity.
- ✚ **Effective Communication:** Clearly convey ideas and information, fostering understanding and collaboration among team members and stakeholders.
- ✚ **Teamwork:** Excel in collaborative environments, contributing positively to team dynamics and achieving collective objectives.
- ✚ **Task Prioritization:** Efficiently manage workload by prioritizing tasks, ensuring timely completion of high-priority activities.
- ✚ **Problem Solving and Logical Thinking:** Approach challenges methodically, using logical reasoning to identify solutions and resolve issues effectively.

EXPERIENCE

+ 12.7 Years

Senior Full Stack Developer

Bright Visionz Pvt Ltd

June 2024 - July 2025

1 Years

Project: EnhanceMD

The EnhanceMD Project: A Comprehensive Weight Loss Program with GLP-1 Medication:

User Registration and Intake Process:

- ❖ **Intake 1 - User Qualification:** Users complete a questionnaire to determine eligibility for the weight loss program and GLP-1 medication. Health data and lifestyle details are captured.
- ❖ **Intake 2 - Medication Eligibility & Consultation:** After qualifying, users move to Intake 2 for medication details. They consult with lab practitioners and doctors to get prescribed GLP-1 medication.
- ❖ **Intake 3 - Prescription and Dosage:** Users receive their GLP-1 medication prescription after consultation, with clear, transparent pricing and dosage instructions.
- ❖ **Intake 4 - Virtual Consultations:** Users have virtual consultations with healthcare professionals to discuss the prescribed weight loss plan and receive ongoing support.

Ecommerce Functionalities:

- ❖ **Personalized Weight Loss Program:** Users choose and customize their weight loss plan based on intake assessments.
- ❖ **Add to Cart & Wishlist:** Users can add products (such as supplements) to their cart or Wishlist for future purchase.
- ❖ **Payment Gateway:** Secure payment options for purchasing the weight loss program, GLP-1 medication, and consultation packages.
- ❖ **Subscription Plans:** Users can subscribe to monthly or quarterly plans for continuous support and medication delivery.

Tech Stack: PHP, MySQL, VueJS, Angular, HTML5, CSS3, jQuery, JavaScript, Bootstrap, Twig, HTML 5, PrimeNg, PrimeVue

Project: Rolex

The Rolex Project is an ecommerce initiative focused on creating a seamless and engaging shopping experience. Key features of the project include:

- ✚ **Shop Landing Page:** A visually appealing and user-friendly landing page that serves as the entry point for customers.
- ✚ **Ecommerce Functionalities:**
 - ❖ **Add to Wishlist:** Allows users to save items they are interested in for future reference.
 - ❖ **Add to Cart:** Enables users to select products they wish to purchase and place them in a virtual shopping cart.
 - ❖ **Payment Gateway Transactions:** Facilitates secure and efficient payment processing for purchases.
- ✚ **Rolex Pages:** Dedicated sections showcasing Rolex products, leveraging the robust capabilities of Pimcore for managing objects, documents, and assets.

By utilizing Pimcore comprehensive suite of tools, the project ensures efficient content management and a superior user experience, ultimately driving sales and customer satisfaction.

Tech Stack: PHP, MySQL, Pimcore, HTML5, CSS3, jQuery, JavaScript, ExtJS Bootstrap, Twig, HTML 5

Project URL: <https://www.huber.li/>

Responsibilities:

- ✚ Conducted client interactions to gather requirements and provide regular status updates.
- ✚ Utilized Jira for task management, streamlining the development process and enhancing team collaboration.
- ✚ Executed tasks throughout the development lifecycle, including coding, testing, and deployment to Azure.
- ✚ Conducted comprehensive code reviews for junior developers, providing constructive feedback.
- ✚ Proactively identified and resolved code conflicts, ensuring smooth integration of contributions.

Project: Panasonic Aviation Corporation

The Panasonic Aviation Corporation project focuses on maintaining and enhancing various PAC features using Pimcore. Key aspects of the project include:

- ✚ **Airline Management:** Efficient handling of airline-specific data and operations.
- ✚ **Store Management:** Overseeing store operations and inventory.
- ✚ **Cabin Class Management:** Managing different cabin classes and associated services.
- ✚ **User Management:** Handling user data and roles.
- ✚ **Aircraft Management:** Managing detailed information related to different aircraft.
- ✚ **Meal Code Management:** Overseeing meal codes for proper catering and meal services.
- ✚ **Product Management:** Managing product details and inventory.
- ✚ **Catalog Management:** Creating and managing product catalogues.
- ✚ **Catalog Assignment Mapping:** Mapping products to catalogues through data objects for organized inventory and sales management.

The project supports various user roles, including:

- ✚ **Store Manager and Admin:** Manages store operations, inventory, and user roles within the store.
- ✚ **Airline Manager and Admin:** Handles airline operations, data management, and administrative tasks.

By leveraging Pimcore's comprehensive data management capabilities, the project aims to provide a robust and integrated solution for managing diverse aspects of aviation and retail operations efficiently.

Tech Stack: PHP, MySQL, Pimcore, HTML5, CSS3, jQuery, JavaScript, ExtJS, Bootstrap, Twig, HTML 5

Project URL: <https://marketplace-dev.nextcloud.aero/admin>

Responsibilities:

- ✚ Conducted client interactions to gather requirements and provide regular status updates.
- ✚ Utilized Jira for task management, streamlining the development process and enhancing team collaboration.
- ✚ Executed tasks throughout the development lifecycle, including coding, testing, and deployment to Azure.
- ✚ Conducted comprehensive code reviews for junior developers, providing constructive feedback.
- ✚ Proactively identified and resolved code conflicts, ensuring smooth integration of contributions.

Oct 2016 - May 2022

5.7 Years

Project: SAM CRM

The SAM CRM project involves developing a comprehensive Customer Relationship Management system with various functionalities, mentoring a team of four members, and using a robust tech stack. Key aspects of the project include:

Mobile Application:

- ✚ Developed and deployed a mobile app for both iOS and Android platforms using PhoneGap and Cordova.
- ✚ The mobile app, named **SAM AI**, is available on both the Play Store and the App Store.

Systems and Features:

- ✚ **Event Management System:** Organizes and manages events.
- ✚ **Email Marketing System:** Facilitates email marketing campaigns.
- ✚ **Network Relationship Management System:** Manages relationships and networks.
- ✚ **Chatbot Management System:** Manages and operates chatbots.
- ✚ **Role-Based Access Control:** Ensures secure access and permissions based on user roles.
- ✚ **User Management System:** Handles user data and roles.

By leveraging this comprehensive tech stack and set of responsibilities, the SAM CRM project aims to deliver a powerful and integrated CRM solution to manage various business processes efficiently.

Tech Stack: PHP, MySQL, Laravel, Vue JS, HTML5, CSS3, jQuery, JavaScript, Bootstrap, blade, HTML 5

Project URL: <https://love.sam.ai>

Responsibilities:

- ✚ Conducted client interactions to gather requirements and provide regular status updates.
- ✚ Utilized Jira for task management, streamlining the development process and enhancing team collaboration.
- ✚ Executed tasks throughout the development lifecycle, including coding, testing, and deployment to Azure.
- ✚ Conducted comprehensive code reviews for junior developers, providing constructive feedback.
- ✚ Proactively identified and resolved code conflicts, ensuring smooth integration of contributions.

Project: Tax Pot Management System

The Tax Pot Management System is designed to facilitate and streamline the process of tax filing between clients and auditors. Key features and functionalities include:

- ✚ **Client-Auditor Interaction:** Provides a platform for clients to request auditors to submit tax filings.
- ✚ **Online Tax Filing:** Enables the submission of tax documents and filings through an online interface.
- ✚ **Auditor Assessment:** Involves the evaluation and selection of auditors based on client needs.
- ✚ **Document Requests:** Allows clients to request necessary documents from auditors for tax filing.
- ✚ **Approval Workflow:** Manages the approval process for documents related to tax filings.

This system ensures efficient communication and document management, making the tax filing process more transparent and organized for both clients and auditors.

Tech Stack: PHP, MySQL, Laravel, HTML5, CSS3, jQuery, JavaScript, Vue JS, Bootstrap, blade, HTML 5

Responsibilities:

- ✚ Conducted client interactions to gather requirements and provide regular status updates.
- ✚ Utilized Jira for task management, streamlining the development process and enhancing team collaboration.
- ✚ Executed tasks throughout the development lifecycle, including coding, testing, and deployment to Azure.
- ✚ Conducted comprehensive code reviews for junior developers, providing constructive feedback.
- ✚ Proactively identified and resolved code conflicts, ensuring smooth integration of contributions.

PHP Developer

Rsales Arm IT Services Pvt Ltd

Aug 2012 - Sep 2016

4.1 Years

Project: Audi

Designed and developed a comprehensive management portal for Audineev, encompassing an Employee Management Portal, Leader-board Configuration System, Document Management System, and Customer Relationship Portal. The project included implementing Role-Based Access Control to ensure secure and efficient access to various functionalities.

Systems and Features:

- ✚ **User Management System:** Handles user data and roles.
- ✚ **Employee Management Portal:** Created a robust system to manage employee data, track performance, and streamline HR processes.
- ✚ **Leader-board Configuration System:** Developed a dynamic leaderboard to visualize and track employee achievements and performance metrics.
- ✚ **Document Management System:** Implemented a secure platform for storing, organizing, and sharing documents, enhancing collaboration and document control.
- ✚ **Customer Relationship Portal:** Built a portal to manage customer interactions, track communications, and maintain detailed customer profiles.
- ✚ **Role-Based Access Control:** Designed and integrated a security framework to assign access permissions based on user roles, ensuring data security and compliance.

Tech Stack: PHP, MySQL, Yii, HTML5, CSS3, jQuery, JavaScript, Bootstrap, HTML 5

Project URL: <https://audineev.com/>

Responsibilities:

- ✚ Conducted client interactions to gather requirements and provide regular status updates.
- ✚ Utilized Jira for task management, streamlining the development process and enhancing team collaboration.
- ✚ Enhanced employee performance tracking and recognition through the leader-board system.
- ✚ Improved document handling and collaboration with the Document Management System.
- ✚ Strengthened customer relationship management with a user-friendly Customer Relationship Portal.
- ✚ Ensured data security and compliance through effective Role-Based Access Control implementation.

AWARD

Centum Award for Mathematics: Received for outstanding performance in the SSLC Board Examination

LANGUAGE

- ✚ **Tamil:** Native (Read, Write, Speak)
- ✚ **English:** Proficient (Read, Write, Speak)

EDUCATION

Master of Computer Science and Engineering JULY 2009 - JUNE 2011

Computer Science and Engineering CGPA: 8.27 / 10
