

SAURABH RAJ SINGH

Senior Full Stack PHP Team Lead | 14+ Years in SaaS and Web Development

Sonepur, Odisha, India | Email: bestwebsite777@gmail.com | Mobile: +91-8106110797

✦ PROFESSIONAL SUMMARY

Visionary Senior Full Stack Lead (14+ years) specializing in **PHP (LAMP Stack)** and **SaaS architecture**. Proven ability to lead remote full-stack teams, architect and deploy high-availability enterprise web solutions, and deliver robust **RESTful APIs**. Demonstrated success in application performance optimization and continuous delivery. Seeking a Senior Developer or Team Lead role to leverage deep expertise in Custom PHP Architectures, Laravel, WordPress, CI/CD, MySQL tuning, and AWS EC2 deployments.

✦ CORE TECHNICAL EXPERTISE

Category	Key Technologies
Backend & Database	PHP (14 Yrs), MySQL, MariaDB, Custom PHP Architectures, Composer, Database Optimization, RESTful APIs
Cloud & DevOps	AWS EC2, Git/CodeCommit, CI/CD Pipelines, Nginx, Apache, SSO (Single Sign-On), Web Scraping
Frameworks & CMS	WordPress (Theme/Plugin Development), Custom MVC, Codeigniter, Laravel (Familiarity)
Frontend Stack	JavaScript, jQuery, AJAX, HTML5, CSS3, Bootstrap
Operating Systems	Linux, Windows

📁 PROFESSIONAL EXPERIENCE

1. Senior Software Engineer / Team Lead (Remote)

Vervantis, USA | [2015 – 2025] (10 Years)

- Architected and led the full-cycle development of the **high-availability Vervantis SaaS Portal** (<https://portal.vervantis.com>), defining both application and database architecture from ideation to production.
- Significantly optimized application performance by 40% by implementing sophisticated caching layers and executing deep **MySQL query tuning** across high-traffic, critical modules.
- Designed, developed, and maintained **modular RESTful APIs** to serve internal frontend applications and facilitate seamless, secure third-party system integrations.

- Managed and automated **CI/CD deployment workflows** utilizing AWS CodeCommit and **EC2** to ensure reliable, continuous delivery with zero downtime.
- Developed and deployed automated **Web Scraping solutions** for the daily aggregation of critical external data (e.g., NOAA, stock market data), ensuring data timeliness and accuracy.
- Provided comprehensive **technical mentorship** to junior developers, conducted rigorous **code reviews**, and enforced strict coding standards across the team.

2. Software Engineer / Team Lead (PHP)

VIPITService, Hyderabad, India | [2012 – 2015]

- Developed and maintained a **high-traffic B2B portal** serving many **corporate clients**, ensuring continuous operational stability and user experience.
- **Spearheaded the migration** of legacy PHP applications to a modern, stable environment, successfully **reducing critical system downtime by 15%**.
- Managed end-to-end feature development from concept to launch, optimizing code for security, performance, and scalability across the platform.

3. Software Engineer / Team Lead (PHP)

Ficussoft Solutions, Bhubaneswar, India | [2010 – 2012]

- **Directed a three-person development team** in the successful launch of a major e-commerce module, contributing to a **10% increase in monthly client revenue**.
- Designed and optimized complex **MySQL schemas** for new, high-volume transactional data modules, ensuring data integrity and fast retrieval speeds.
- Responsible for **full-stack implementation**, spanning database design, complex backend business logic, and responsive front-end integration.

4. Software Engineer (PHP)

AJATUS SOFTWARE, Bhubaneswar, India | [2009 – 2010]

- Implemented core business logic modules for client websites, specializing in dynamic user interaction using **jQuery** and **AJAX**.
- Gained foundational expertise in **WordPress theme and plugin development**, delivering customized content management solutions for multiple clients.

EDUCATION

Master of Computer Applications (MCA)

G.M. College (Government), Sambalpur University, India

LEADERSHIP & WORK STYLE

- **Technical Leadership:** Proven ability to mentor, guide, and lead developers while enforcing high coding standards and best practices through systematic code reviews.
 - **Remote Proficiency:** Highly experienced and productive in independent, fully remote team environments, accustomed to asynchronous communication and global timezones.
 - **Adaptability & Ownership:** Swiftly masters and proficiently implements new technologies, taking full ownership of complex application requirements and project delivery.
-
