PROFESSIONAL SUMMARY

Results-driven Senior PHP/Laravel Developer and Team Lead with 5+ years of experience delivering scalable web applications, leading distributed teams, and collaborating with international clients in remote environments. Expertise in backend architecture, API development, database optimization, and system modernization across enterprise and government platforms. Proven track record of improving system performance, migrating large-scale data (18L+ records with 99.7% integrity), mitigating security risks, and accelerating development cycles by 20–30% through process standardization and Agile practices. Strong business analysis capabilities with a focus on aligning technical solutions with business goals, enhancing client satisfaction, and driving product growth.

CORE SKILLS

- **Backend Development:** PHP, Laravel, Symfony, REST API Development, MVC Architecture
- **Frontend & Full Stack:** JavaScript, React.js, MERN Stack, UI Optimization
- **Database & Performance:** MySQL, Query Optimization, Stored Procedures, Data Migration, Scalability
- **System Design & Security:** API Security, Vulnerability Mitigation, Token-Based Authentication
- **Leadership & Collaboration:** Team Leadership, Remote Team Management, Agile/Waterfall, Client Communication
- **Business Analysis:** Requirement Gathering, Process Optimization, Solution Design, Stakeholder Management

EDUCATION

ISTAR College, Sardar Patel University Master of Science in Information Technology	2020
NVPAS College of Pure and Applied Sciences Bachelor of Science in Information Technology	2018

WORK EXPERIENCE

Team Lead <i>ITAnswers Pvt Ltd (Remote)</i>	Aug 2023 – Present
• Led end-to-end development and delivery of scalable web applications while managing remote teams and international client communication across multiple time zones and complex project environments. • Standardized development workflows, coding practices, and branching strategies, improving issue resolution speed by 20–30% and ensuring consistent code quality, maintainability, and faster team collaboration. • Designed and implemented secure API systems, identifying vulnerabilities and introducing token-based authentication mechanisms to enhance data protection, prevent unauthorized access, and strengthen overall system security. • Successfully migrated 18L+ data records across systems with 99.7% integrity, optimizing database structures and performance while ensuring minimal downtime and seamless business continuity during transition. • Introduced reporting frameworks and automated updates, reducing senior management oversight time significantly. • Collaborated with stakeholders to analyze business requirements and deliver optimized technical solutions aligned with growth objectives.	
Senior Full Stack Developer / Team Lead <i>Mayora Infotech Pvt Ltd (Remote)</i>	Sep 2022 – Mar 2023
• Delivered high-quality backend services and scalable features under tight deadlines in a fully remote environment. • Improved team collaboration by defining structured development and communication processes. • Provided proactive client support, ensuring issue resolution and maintaining strong project momentum. • Contributed to technical discussions and architectural decisions to enhance long-term system sustainability.	
Full Stack Developer <i>Brainstorm Wizards Pvt Ltd (Remote)</i>	Feb 2022 – Jul 2022
• Developed and optimized application features to streamline workflows and reduce user effort. • Collaborated closely with teams and clients to ensure seamless project delivery and feature planning. • Proactively identified and resolved technical issues to maintain system stability and performance.	
PHP Full Stack Developer <i>Iflair Web Technologies Pvt Ltd</i>	Jul 2021 – Dec 2021
• Resolved critical legacy system issues and improved application performance under high-pressure conditions. • Enhanced existing applications through targeted optimizations and user experience improvements. • Delivered stable and maintainable code ensuring project deadlines were met consistently.	

Project Assistant (PHP Developer)

Dec 2020 – Jun 2021

INFLIBNET Centre (UGC)

- Developed and optimized modules for large-scale government platforms serving 15L+ users.
- Improved database performance through stored procedures and query optimization.
- Enhanced system scalability and reliability for high-traffic academic platforms.

Faculty Cum Developer

Oct 2019 – Dec 2020

Tops Technologies

- Trained students and junior developers, improving onboarding efficiency and technical proficiency.
- Developed and maintained applications while ensuring code quality and timely delivery.
- Contributed to knowledge sharing and team productivity through structured training programs.

PROJECTS

- **Government & Large-Scale Academic Platforms (ESS & ShodhGanga)** Developed and enhanced critical modules for large-scale academic platforms serving 15L+ users, improving system scalability, data processing efficiency, and access to research and journal resources.
- **Oil Salvage Suite (Enterprise Multi-Platform Ecosystem)** Worked across multiple interconnected systems including CRM, APIs, and external portals, enabling seamless data flow and improving operational efficiency for complex enterprise workflows.
- **Cataphract (UK Compliance Platform)** Contributed to backend systems integrated with external government services, ensuring secure verification processes, reliable API integrations, and compliance-driven workflows.
- **Cleardue (Automated Revenue Collection Platform)** Built and enhanced scalable billing and reconciliation systems supporting multi-entity financial operations and automated revenue workflows.
- **Synapse CRM & Business Automation Systems** Designed and optimized CRM and automation workflows, improving communication tracking, operational efficiency, and client lifecycle management.
- **Enterprise & Domain Applications** Delivered and contributed to multiple domain-driven applications including recruitment platforms, healthcare systems, manufacturing operations, inventory management, and real estate portals, enhancing business workflows and system usability.
- **Additional Systems & Tools** Worked on time tracking systems, school management applications, and internal business tools, focusing on performance optimization, process simplification, and improved user experience.

KEY ACHIEVEMENTS

- Improved issue resolution efficiency by **20–30%** by introducing standardized development workflows, coding practices, and structured ticket handling processes across teams.
- Successfully led **large-scale data migration of 18L+ records** with **99.7% data integrity**, ensuring zero business disruption and optimized database performance.
- Identified and mitigated critical **API security vulnerabilities** by implementing custom token-based authentication mechanisms, strengthening system reliability and client trust.
- Reduced senior management dependency by **automating reporting and communication systems**, improving decision-making speed and operational transparency.
- Accelerated project delivery timelines by introducing **Agile and structured development models**, improving team productivity and reducing bottlenecks.
- Rapidly mastered legacy frameworks within **3 days** and resolved **12+ critical issues within 2 weeks**, ensuring client satisfaction and project continuity.
- Enhanced onboarding and training processes for developers, reducing ramp-up time and improving team efficiency in remote working environments.
- Strengthened client relationships and contributed to **project upgrades and new module acquisitions** through proactive risk analysis and solution-oriented communication.

CERTIFICATIONS

- React + Redux Certification – SoloLearn (2022)
- PHP Certification – SoloLearn (2017)
- SQL Fundamentals Certification – SoloLearn (2016)
- Certified Secure Computer User (CSCU) – EC-Council (2014)
