

SIJI ANN THOMAS

Senior Backend Developer | PHP · Laravel · Node.js | 6+ Years

cgann02@gmail.com | +91 8943375191 | Palakkad, Kerala, India | linkedin.com/in/cgann02 | github.com/cganntthomas

PROFESSIONAL SUMMARY

Results-driven Senior Backend Developer with 6+ years of experience designing and deploying scalable, high-performance web applications. Deep expertise in PHP/Laravel REST API architecture, Node.js/Express.js backend systems, and relational/non-relational database design. Proven ability to reduce production bugs by 30%, migrate legacy systems, and integrate third-party services (Razorpay, OneSignal, Google Cloud). Committed to clean code, MVC best practices, and agile collaboration.

TECHNICAL SKILLS

Languages	PHP, JavaScript
Backend	Laravel (5.2–12), Node.js, Express.js, Symfony, CakePHP
Databases	MySQL, MongoDB, Mongoose ORM, Query Optimization
API & Auth	RESTful APIs, JWT Authentication, Passport, OAuth
Architecture	MVC, Microservices, Modular Routing, Middleware Design
Tools	Git, GitLab, Postman, JIRA, NPM
Cloud & Services	Google Cloud Platform, Razorpay, OneSignal, GreenAds
Practices	Agile/Scrum, CI/CD, Code Review, Unit Testing

WORK EXPERIENCE

Sr. Laravel Developer (Contract) | DDDKing Netline Pvt Ltd

Aug 2025 – Jan 2026

- Engineered and enhanced core features for a high-traffic online food ordering platform serving thousands of daily users.
- Reduced production bugs by 30% by proactively identifying and resolving critical backend defects.
- Contributed to full platform revamp, improving user experience and backend performance.
- Collaborated in agile sprints to deliver scalable backend solutions on tight timelines.

Sr. Laravel Developer (Contract) | dMACQ Software Pvt Ltd

Mar 2023 – May 2023

- Successfully migrated a legacy Core PHP application to Laravel, reducing technical debt significantly.
- Restructured codebase using MVC architecture, improving maintainability and developer productivity.
- Optimized application performance, resulting in faster response times and reduced server load.

Sr. Laravel Developer | WebandCrafts

Feb 2020 – Dec 2022

- Architected and delivered RESTful APIs for multiple web and mobile applications with JWT authentication.
- Built full backend for Mylelts Partner, an IELTS e-learning platform (web + mobile), from design to deployment.
- Integrated Razorpay payment gateway (processing live transactions) and OneSignal push notifications.
- Designed normalized database schemas and optimized complex MySQL queries for improved performance.
- Collaborated with cross-functional teams using GitLab for version control and Google Cloud for deployment.

Jr. Laravel/PHP Developer | Vaibhav Global Pvt Ltd

Apr 2017 – Nov 2019

- Developed and maintained frontend and backend components for internal enterprise applications.
- Worked across Symfony and Laravel frameworks on multiple product lines.
- Managed task lifecycle using JIRA in a collaborative agile environment.
- Built foundational skills in PHP backend development, database design, and team collaboration.

KEY PROJECTS

MyIelts Partner – IELTS Learning Platform

Platform: Web & Mobile | Stack: Laravel, MySQL, REST APIs, Razorpay, OneSignal, Google Cloud, GitLab
<https://myedtekpartner.com/>

- Built end-to-end backend: user auth, course management, payment integration, push notifications.

ERAS Teachers – Job Portal for Teachers

Platform: Web | Stack: Laravel, MySQL, Razorpay, GreenAds, GitLab
<https://erasteachers.com/>

- Developed job listing, application, and payment modules for a dedicated education job platform.

Keralavision Shopping Challenge – Live Gaming Platform

Platform: Mobile App | Stack: Laravel, MongoDB, GitLab

- Engineered real-time gaming logic and data pipelines using Laravel and MongoDB for a mobile app.

Node.js REST API Project – Personal/Portfolio

Platform: Backend | Stack: Node.js, Express.js, MongoDB, Mongoose, JWT

- Built production-ready RESTful APIs with JWT auth, modular routing, middleware, and error handling.

ESOP – Employee Stock Ownership Plan

Platform: Web | Stack: Laravel, MySQL, JIRA

- Developed stock management and reporting modules for internal enterprise HR platform.

EIndent – Online Store Management System

Platform: Web (Internal) | Stack: Symfony, MySQL, JIRA

- Built inventory, order, and user management features using Symfony framework.

EDUCATION

BCA (Bachelor of Computer Applications) – Distance | Bharatiyar University

Diploma in Computer Engineering | St. Mary's Polytechnic College

CORE COMPETENCIES

Backend Development · REST API Design · PHP/Laravel · Node.js · Express.js · MySQL · MongoDB · JWT Authentication · MVC Architecture · Agile/Scrum · Git · Google Cloud · Payment Gateway Integration · Database Optimization · System Migration · Technical Leadership
