SUMMARY

Results-driven Backend Developer with 3.5+ years of experience in building scalable, high-performance server-side applications using PHP (CodeIgniter, Laravel), Python (FastAPI), and REST APIs, with strong expertise in database design, integration, and optimization.

WORK EXPERIENCE

YOUNDER BOTS PRIVATE LIMITED

Feb 2024 - Feb 2025

Backend Developer

- Managed end-to-end backend deployments and monitoring for scalable web applications.
- Built and integrated secure payment and messaging solutions to support business-critical workflows.
- Optimized APIs and database performance to enhance speed, scalability, and reliability.
- Worked closely with frontend and product teams to deliver maintainable, production-ready backend solutions.

CODERZBOT INNOVATIONS

July 2023 - Jan 2024

Developer

- Implemented and maintained secure, scalable RESTful APIs to enable seamless communication between frontend and backend systems.
- Designed, optimized, and secured MySQL databases to improve data retrieval efficiency, reliability, and performance.
- Developed and maintained high-performance backend services and APIs supporting web applications, admin panels, and mobile applications.

UNIFLYN TECHNOLOGIES

Aug 2021 - June 2023

Junior Developer

- **API Development & Integration:** Designing and developing secure, scalable RESTful APIs and integrating third-party services to support application functionality.
- **Authentication & Authorization:** Implementing secure login systems, role-based access control, and data protection mechanisms.
- **Debugging & Maintenance:** Troubleshooting issues, fixing bugs, and maintaining backend systems to ensure high availability and stability.
- **Deployment & Version Control:** Managing deployments, environment configurations, and version control using tools like Git.
- **Scalability & Reliability:** Designing backend systems that support scalability, load handling, and future feature expansion.

EDUCATION

University College of Engineering
Bachelor Of Technology - 7.5

September 2017 - April 2021

PROJECTS

VdoJar OTT App

- Developed secure and scalable backend APIs for video streaming and content management. Implemented user authentication, payment gateway integration, and subscription management. Optimized database queries to improve streaming performance and reduce latency.

Healboxx App

- Designed and built RESTful APIs for managing doctor consultations, patient records, and appointments. Integrated real-time notifications and secure authentication for seamless user experience. Developed an admin panel for managing doctors, patients, and transactions efficiently.

Food Delivery App

- Created API-driven backend for restaurant listings, order management, integrated payment and SMS gateways for order confirmations and delivery updates. Developed an admin dashboard for restaurant owners to manage menus, orders, and promotions.

Hardware Rental Management System

- Developed a feature-rich admin panel in CodeIgniter for tracking and managing hardware rentals. Implemented role-based access control for different levels of users.

Pawnshop Management Software

- Designed and developed a system for pledging transactions, interest calculations, loan repayments, and inventory management. Implemented automated reminder notifications for due payments, reducing overdue accounts by 20%.

SKILLS

- | | |
|--|--|
| • BACKEND: PHP (CODEIGNITER, LARAVEL), PYTHON (FASTAPI), REST API | • TOOLS & DEVOPS: GIT, POSTMAN |
| • FRONTEND: HTML, CSS, JAVASCRIPT | • PAYMENT GATEWAY INTEGRATION: RAZORPAY, PAYSTACK |
| • DATABASE MANAGEMENT: MYSQL, POSTGRES SQL | • SMS GATEWAY: TEXT SPEED |
