

SUVARNA T.S

PHP Developer

✉ suvarnats.tech28@gmail.com ☎ 9048960320 📍 Kochi, Kerala

PROFILE SUMMARY

Experienced PHP Developer with hands-on expertise in designing, developing, and maintaining dynamic web applications. Proficient in PHP frameworks such as **Laravel and CodeIgniter**, delivering **secure, scalable, and high-performance** solutions. Strong background in **backend development, database management (MySQL, MongoDB)**, and **RESTful API development**, with a focus on clean architecture, optimized performance, and seamless user experiences.

WORK EXPERIENCE

Senior Software Engineer

stealth guard pvt ltd

12/2025 – Present

Trivandrum

- Designed and implemented a custom MVC framework in PHP, improving code organization, scalability, and maintainability.
- Built a MySQL-driven data layer with optimized queries, indexing, and prepared statements for high performance.
- Developed reusable controllers, models, and views, following SOLID principles and clean architecture.
- Optimized MySQL schemas, resulting in a 30% improvement in query performance and a 20% reduction in server response time.
- Ensured application security by preventing SQL injection, XSS, and CSRF attacks

PHP Developer

Techmaven IT Solutions

01/2023 – 10/2025

Cochin

- Developed and maintained server-side logic using PHP, ensuring efficient, secure, and scalable web applications.
- Designed and implemented MongoDB schemas, optimizing data storage and query performance.
- Integrated RESTful APIs and third-party services into existing platforms to enhance functionality and user experience.
- Wrote modular, reusable code and maintained coding standards across projects using Git and version control workflows.
- Conducted regular debugging, unit testing, and performance tuning to ensure high application reliability

PHP Developer

Devinters Info Solutions

10/2021 – 12/2022

Cochin

- Used all aspects of MySQL/PHP programming (object- oriented PHP), Laravel, CodeIgniter framework in Laragon ,Wamp, Xamp environment.
- Used the model view controller (MVC) framework to build modular and maintainable applications.
- Experience developing REST applications on modern MVC PHP framework Laravel.
- Implemented cron jobs and background workers in PHP for tasks like data syncing and report generation.

PHP Programmer

Asset Software Solutions

11/2019 – 10/2021

Cochin

- Experience developing well-organized, maintainable, object- oriented, unit-tested code in PHP.
- Experience in database designing with MySQL.
- Contributed to improving process efficiency by identifying, debugging, and fixing software bugs.
- Authored detailed API documentation and provided support for integrating PHP backend services with mobile apps and third-party platforms.
- Developed interactive, dynamic websites using JavaScript, jQuery, and AJAX for seamless, real-time user experiences.

TECHNICAL SKILLS

Backend

PHP 7/8, Laravel, CodeIgniter, WordPress, OOP

Frontend

React, JavaScript, HTML, CSS, AJAX, jQuery

Databases

MySQL, MongoDB

API & Integrations

RESTful APIs, API Authentication (JWT, OAuth2)

Cloud & Deployment

AWS, Git (GitHub, GitLab)

Project Management and Collaboration

Trello, Jira

PROJECTS

E-Commerce Platform

A shopping platform that enables users browse products, add them to the cart and make online purchases seamlessly.

Hospital Management System

Manages hospital operations include patient records, appointments billing and user roles.

Employee Management System

Designed to efficiently handle employee records roles, and administrative tasks in a centralized platform.

Swimming School Management

Manages student registrations, class schedules, and instructor assignments efficiently.

Multi-Level Payout System (MLM / Trading Platform)

multi-level payout (MLM) system supporting up to 5+ hierarchy levels with automated commission distribution.

EDUCATION

B.Tech in Computer Science and Engineering,

Model Engineering College, Cochin

06/2015 – 05/2019
