LinkedIn : www.linkedin.com/in/sajitha-beegum-k-p-2a130427b

GitHub : github.com/SajithaKP

PHP Developer with **3+ years of experience** in **Laravel** and **CodeIgniter**, specializing in **web applications using Blade** and **REST API development**. Strong in MySQL, backend logic, and performance optimization, with a focus on scalable and maintainable solutions.

SKILLS

- Expertise in PHP, MySQL, JavaScript, HTML5, CSS3, Bootstrap, APIs and basic knowledge of React.js
- Experience with Laravel and CodeIgniter framework
- Familiar with tools like Visual Studio Code, Postman, Putty, and Git.
- Excellent written and oral communication skills, a team player with leadership abilities, an analytical mindset, and strong problem-solving skills

WORKEXPERIENCE

Allytic Labs — KC Arcade, CSEZ PO, Kakkanad, Kochi, Kerala - SOFTWARE ENGINEER

May 2024 - Present

- **Developed FEME**, a real-time audio/video calling platform, implementing WebSocket-based communication, multi-role authentication, coin-based monetization, payment gateway integration, Firebase notifications, and OTP verification via SMS/WhatsApp, along with a comprehensive admin web panel for user, transaction, and call-log management.
Tech: Laravel, MySQL, Laravel Sanctum, REST APIs
- **Built an internal Staff Portal**, a **role-based company management system** (Admin, Manager, HR, Staff) featuring salary and leave management, attendance tracking, task and project management, meeting scheduling, dashboards, and calendar-based visibility of holidays and events.
Tech: Laravel, Blade, MySQL, Laravel Sanctum, REST APIs
- **Designed and implemented a Visa Process Management System**, digitizing end-to-end visa workflows with multi-level role access (Superuser, Manager, Employee, Agent, Finance, Dispatch), document tracking, approvals, payment validation.
Tech: Laravel, Blade, MySQL, Laravel Sanctum, REST APIs
- **Ziya Matrimony – Online Matrimonial Platform:**
Developed a matrimonial web application enabling user profile creation, partner search, interest requests, messaging, and admin management of users and subscriptions.
Tech: CodeIgniter, MySQL
- **BidMaster – Service & Product Marketplace Platform**
Developed a marketplace platform where users can register as **Providers or Seekers** to buy and sell products and services. Seekers can post service requirements, and providers can respond and offer services through the platform. Also developed a **web-based Admin Panel** for managing users, products, services, bids.
Tech: Laravel, MySQL, REST APIs, Web Admin Panel

- **Developed an Artist Content Platform**, enabling user registration, media uploads (images, video, audio, documents), follow/like functionality, and social engagement through scalable backend APIs
Tech: Laravel, Blade, MySQL,
- **CMS – College Management System:** Built a **JWT-secured, role-based platform** for student/teacher admissions, user management, and college operations with standardized REST APIs and email notifications.
Tech: Laravel, MySQL, JWT, REST APIs
- **TimeStore – Product & Service Management:** Developed a **secure API-driven system** for product, service, enquiry, and sales tracking using scalable REST architecture.
Tech: Laravel, MySQL, REST APIs
- **Job Tracking System:** Created an **API-based job assignment and tracking system** to automate technician and supervisor maintenance workflows.
Tech: PHP, Laravel, REST APIs
- **Time Vosio – Sales Web Application:** Developed a **Laravel web application** for managing product and service sales, transactions, and service entries.
Tech: Laravel, MySQL, Blade
