

SANJAY K V

Software Engineer (PHP | Laravel | Full-Stack Web Development)

+91 9567931877 | sanjaykv504@gmail.com | [linkedin.com/in/sanjay-k-v-1b606723a](https://www.linkedin.com/in/sanjay-k-v-1b606723a) | Kerala, India

PROFESSIONAL SUMMARY

Results-oriented Software Engineer with 4.6+ years of progressive experience architecting and delivering enterprise-grade PHP/Laravel applications, ERP systems, and document management platforms. Proficient across the full stack — Laravel, Vue.js, MySQL, Docker, and REST API design. Experienced in applying AI-assisted development workflows (Prompt Engineering, Gemini API) to accelerate delivery cycles. Strong collaborator and code reviewer with a track record of mentoring peers, leading technical discussions, and shipping production-quality software across cross-functional teams. Google-certified in AI (7-course series, 2026).

CORE COMPETENCIES

PHP & Laravel | Vue.js | REST API Design | MySQL / MariaDB | Docker | ERP Development | CRM Development | Microservices Patterns | Queue Systems (Redis) | Caching Strategies | System Architecture | Prompt Engineering | AI-Assisted Development | Code Reviews | Cross-team Collaboration | Agile / Scrum

TECHNICAL SKILLS

Programming Languages	PHP, JavaScript (ES6+), SQL, Dart, Java
Frameworks & Libraries	Laravel, Laravel Horizon, CodeIgniter, Vue.js, Livewire
Databases	MySQL, MariaDB — schema design, indexing, query optimization
Cloud & DevOps	Docker, Git (GitHub / GitLab), Ubuntu Server, Linux CLI
AI-Assisted Dev	Prompt Engineering, Gemini API (Google AI Studio), NotebookLM, LLM Integration
Tools & Platforms	PhpStorm, VS Code, Android Studio, UiPath RPA, Zoho, Hubstaff, MS Office
Leadership & Process	Code Reviews, Technical Mentoring, Agile / Scrum, Cross-team Collaboration

WORK EXPERIENCE

Software Engineer

Direct Axis Technology • Kerala, India

Apr 2025 – Present

Tech Stack: PHP, Laravel, Vue.js, MySQL, Docker, REST APIs, Redis

- Designed and developed modular features for AxisPro ERP — a multi-tenant enterprise system covering Finance, Sales, Purchase, Inventory, and HR — improving module load performance and reducing redundant DB queries by restructuring Eloquent relationships.
- Engineered SmartPRO, an enterprise document management platform with role-based approval workflows, version control, and audit trail; reduced manual document routing time by eliminating paper-based handoffs.
- Architected scalable REST API contracts across ERP modules, enforcing consistent request/response structures and reducing front-end integration bugs by standardizing API error handling.
- Implemented queue-based background processing using Laravel Horizon and Redis for async ERP tasks, improving system responsiveness for high-load operations.
- Applied Prompt Engineering and Gemini API (Google AI Studio) to prototype AI feature integrations within enterprise workflows, including AI-assisted document classification and automated status suggestions.

- Built internal knowledge bases using NotebookLM, enabling AI-powered retrieval of product documentation and reducing new-engineer onboarding time.
- Conducted structured code reviews for team PRs, enforcing SOLID principles and Laravel best practices; mentored junior developers through pair programming sessions.

Backend Laravel Developer

Maple Tech Space Pvt. Ltd. • Infopark, Koratty, Kerala

Feb 2023 – Apr 2025

Tech Stack: PHP, Laravel, MySQL, REST APIs, JavaScript

- Architected and maintained a multi-client CRM platform in Laravel, serving enterprise clients with lead management, sales pipeline tracking, and performance dashboards — supporting concurrent usage across multiple tenants.
- Integrated Facebook Lead Ads API, enabling automated real-time lead capture into the CRM pipeline and eliminating manual data entry for the sales team, reducing lead response time.
- Designed and optimized MySQL schemas and complex queries for the CRM data layer, improving report generation speed through proper indexing and query refactoring.
- Built and deployed multiple client-facing web applications end-to-end, managing requirements through to production deployment with zero critical post-launch defects.
- Collaborated with QA teams on test plan creation, assessment execution, and quality gate enforcement across all release cycles.
- Mentored junior developers on Laravel conventions, REST API design, and database optimization best practices, improving overall team code quality.
- Analyzed user feedback and translated insights into sprint-ready backlog items, contributing to measurable improvements in product reliability across iterative releases.

Junior Software Developer

Glinjos Innovations Software Solutions LLP • Kannur, Kerala

Oct 2021 – Feb 2023

Tech Stack: PHP, Laravel, CodeIgniter, MySQL, Flutter (Dart), Android (Java)

- Delivered 5 end-to-end production projects: Offar (e-commerce), Srisai (service booking), GDiary (digital diary), Truck Management System (logistics ERP), and OnReach (SaaS outreach) — across web and mobile platforms.
- Designed scalable MySQL database schemas for logistics and e-commerce domains, including indexing strategies that improved data retrieval performance on high-volume tables.
- Developed cross-platform mobile applications in Flutter (Dart) and native Android (Java), delivering responsive UX for consumer-facing apps.
- Self-initiated learning and deployed RPA automation workflows using UiPath, eliminating repetitive manual operations for client business processes.
- Built RESTful APIs and MVC-structured backend logic in Laravel and CodeIgniter, following clean architecture patterns and agile sprint delivery.

CERTIFICATIONS

Google AI Professional Certificate Series — 7-Course Specialization

1. AI Fundamentals 2. AI Brainstorming and Planning 3. AI for Research and Insights
4. AI for Writing and Communicating 5. AI for Content Creation 6. AI for Data Analysis 7.
AI for App Building

Google • Apr 2026

EDUCATION

Bachelor of Computer Applications (BCA)

Kannur University, Kerala

Jun 2018 – Mar 2021

KEY PROJECTS

AxisPro ERP — Direct Axis Technology

Stack: *Laravel, Vue.js, MySQL, Docker, Redis, REST APIs*

Multi-module enterprise ERP (Finance, Sales, Purchase, Inventory, HR) with queue-based async processing, Eloquent ORM optimization, and modular architecture designed for scalability.

SmartPRO — Document Management Platform — Direct Axis Technology

Stack: *Laravel, Vue.js, MySQL, Role-Based Access Control*

Enterprise workflow platform with role-based document approval chains, version control, audit trail, and AI-assisted document classification prototype.

CRM with Facebook Lead Ads Integration — Maple Tech Space Pvt. Ltd.

Stack: *Laravel, MySQL, Facebook Graph API, JavaScript*

Multi-tenant CRM with real-time automated lead ingestion via Facebook Lead Ads API, sales pipeline management, and performance reporting dashboards.

Truck Management System — Glinjos Innovations

Stack: *CodeIgniter, MySQL, PHP*

Logistics ERP covering fleet operations, route management, driver records, and automated billing for a transport company.

OnReach — SaaS Outreach Platform — Glinjos Innovations

Stack: *Laravel, MySQL, REST APIs, JavaScript*

SaaS communication tool with campaign management, contact segmentation, and delivery analytics for scalable outreach automation.
