

SHIJIN MT

Senior Software Developer (PHP Laravel , React.js)

+91 8075875575 | shijinmt777@gmail.com | Bangalore, Karnataka |

<https://www.linkedin.com/in/shijin-m-t-15934a175/>

PROFESSIONAL SUMMARY

Result-driven Software Developer with over 5 years of experience specializing in building, scaling, and maintaining dynamic web applications. Proficient in backend development using PHP, Laravel framework, Oracle, and MySQL database management. Adept at REST API development, third-party system integrations, payment gateways, and modern frontend technologies. Proven track record of working across cross-functional teams to deliver secure, highly optimized, and scalable software solutions.

CORE TECHNICAL SKILLS

- **Programming & Frameworks:** Laravel Framework, ASP .NET MVC Framework , JavaScript, React.js
- **Databases & Storage:** MySQL, Oracle DB, Database Schema Design, Query Optimization
- **Web Technologies:** HTML5, CSS3, Bootstrap 5, AJAX, JSON, RESTful APIs
- **Tools & Methodologies:** Git, GitHub, Version Control, Code Review, Requirement Analysis

Backend

PHP , Laravel , REST API , JSON API , MVC Architecture ,Authentication , JWT ,OAuth ,
Payment Gateway Integration , API Development , Third Party Integration

Frontend

HTML5 , CSS3 , Bootstrap 5 , JavaScript , jQuery , AJAX

Databases

MySQL

Oracle DB

Tools

Git , GitHub , Postman

Architecture

MVC , RESTful Services , Database Design , Query Optimization

PROFESSIONAL EXPERIENCE

Software Developer | Moserp Technologies, Bangalore | *June 2022 – Present*

- Engineered and scaled enterprise-grade web applications utilizing Laravel Framework, React.js and Oracle.
- Architected and integrated secure RESTful third-party APIs in .NET framework to extend application functionalities and performance.
- Optimized Oracle database schemas by restructuring indices and rewritten complex joins, reducing query execution time.
- *Key Engineering Accomplishment:* Successfully migrated a legacy synchronous data sync process to a decoupled **Laravel Queue architecture**, reducing server request timeouts by **90%** and improving API response efficiency.

PHP Laravel Developer | AS Designs, Kannur | *June 2021 – May 2022*

- Developed backend systems and dynamic features using Laravel, JavaScript, and MySQL databases.
- Successfully implemented payment gateway solutions and external module API integrations.
- Gathered requirements directly from client stakeholders to transform feedback into rapid, iterative software deployments.
- Maintained code repositories using Git, ensuring smooth deployments across staging environments.

PROJECTS

Real Time Weather Monitoring Dashboard

Technologies : React.js , Oracle

- **Developed real time weather monitoring dashboard.**
- **Optimized complex queries and logic for real time data.**
- **Generated weather reports based on station data's.**

ERP Management System

Technologies: Laravel, Oracle, MySQL, JavaScript

- **Developed modules for HR, Finance and Reporting.**
- **Built REST APIs for external integrations.**
- **Implemented role-based access controls.**

Payment Gateway Integration

Technologies: Laravel, Razor pay/PayU

- Implemented payment processing.
- Integrated webhook verification.
- Reduced payment reconciliation effort.

Data Synchronization Platform

Technologies: Laravel Queue, MySQL

- Designed asynchronous queue architecture.
- Reduced timeout issues by 90%.
- Improved system scalability.

EDUCATION

Master of Computer Application (MCA) | 2020

School of Information Science & Technology, Kannur, Kerala.

BSc. Computer Science | 2017

Taliparamba Arts & Science College, Kannur, Kerala.

LANGUAGES

English, Malayalam, Hindi.
