SUMMARY

Backend & Full Stack Developer with 2.5+ years of hands-on experience in PHP (Laravel, Yii2) for backend development, worked in Golang for high-performance API development, and Angular and React for frontend. Strong skills in REST API design, relational database management (MySQL, PostgreSQL), and integrating third-party services including payment gateways, CRM APIs, and cloud infrastructure (AWS EC2). Proven ability to handle full project ownership, lead and manage development teams, and communicate directly with clients from requirement gathering through to delivery

PROFESSIONAL EXPERIENCE

Saiha Software technologies Pvt. Ltd.

2024

kochi

- Independently architected and delivered end-to-end backend systems using PHP (Laravel, Yii2), while contributing to team management and collaborative project execution.
- Handling backend development tasks using Golang in existing applications.
- Designed and optimised relational databases (MySQL, PostgreSQL) and built scalable REST APIs for enterprise client applications.
- Integrated third-party services including Zoho Books API, Google Meet API, SmartGateway POS, and Pine Labs POS payment gateways.
- Configured OnlyOffice Document Editor for real-time collaborative editing and version history in a Document Management System.
- Provisioned and managed live AWS EC2 instances and OpenVPN configurations for a cybersecurity exam portal.
- Built Angular and React frontends, delivering full-stack solutions end to end.
- Managed client communication, gathered requirements, and ensured timely project delivery.

EDUCATION

Master of Computer Applications

Kerala Technical university

2021 – 2023

Kottayam, kerala

Bachelor of Computer Applications

Kannur University

2018 – 2021

kannur

SKILLS

- PHP
- Laravel, Yii2
- Full Stack Development
- javascript
- MySQL
- PostgreSQL
- AWS
- API Integration
- REST API, Git, Postman

LANGUAGES

English

Malayalam

Tamil

Hindi

CERTIFICATES

- ▶ AWS Academy Graduate — Cloud Foundations (Amazon Web Services)
- ▶ Data Science & Machine Learning using Python

PROJECTS

- ▶ Independently built a Google Drive-like Document Management System using PHP (Laravel/Yii2) and Angular, with file storage, copy, share, metadata tagging, and role-based access control; configured OnlyOffice Editor for in-browser editing, real-time co-editing, and full version history.
- ▶ Independently delivered end-to-end payment gateway integrations for SmartGateway (online) and Pine Labs POS (in-person), covering full payment flow, webhook handling, idempotency checks, and reconciliation logging.
- ▶ Integrated Zoho Books API via OAuth 2.0 to sync invoices and receipts between a client portal and Zoho Books, automating invoice generation and financial reconciliation.
- ▶ Built a Student Management System using PHP (Laravel/Yii2) backend and Angular frontend, covering student records, course management, and admin reporting; integrated Google Meet API into the portal enabling instructors to schedule and launch live classes directly from the platform.
- ▶ Worked on a cybersecurity exam portal built with Go and React, contributing to AWS EC2 lab instance provisioning and OpenVPN (.ovpn) file generation for secure student lab access.
