PROFESSIONAL SUMMARY

Backend Developer with 2+ years of experience building scalable SaaS applications using PHP and Laravel. Specialized in REST API development, RBAC systems, and third-party integrations. Improved backend performance by up to 50% through query optimization and efficient data handling in workforce and payroll systems.

SKILLS

PHP, Laravel, REST API Development, MySQL, SQLite, API Integration, Authentication & Authorization, RBAC, MVC Architecture, Query Optimization, JSON, Git, GitHub, Postman, Composer, Secure Coding Practices, SaaS Architecture

WORK EXPERIENCE

Backend Developer

Dibasys Pvt Ltd, Kerala

Jan 2024 – Present

Project: Swift Checkin (Construction Workforce Management SaaS Platform)

Client: Double AA Services, Australia

- Developed and maintained backend modules (timesheets, payroll, invoices), supporting **35+ active users** and real-time workforce tracking
- Designed and implemented RESTful APIs for payroll, attendance, and workforce systems, improving system integration efficiency by **40%**
- Built RBAC system for approval workflows, reducing manual approval processing time by **30%**
- Implemented authentication and authorization mechanisms, eliminating unauthorized access issues and strengthening API security across critical endpoints
- Integrated **Xero APIs (OAuth 2.0)** for payroll and employee sync, ensuring accurate financial data processing

- Optimized MySQL queries using indexing and joins, reducing query execution time by **40–50%**
 - Implemented pagination, filtering, and sorting, improving large dataset handling performance by **50%**
 - Applied secure coding practices (validation, sanitization), eliminating common vulnerabilities across critical endpoints
 - Collaborated with frontend team to identify and resolve 25+ critical bugs, improving system stability and reducing production issues during deployment cycles
-

PROJECTS

Saas Subscription API

Tech: Laravel, REST API, MySQL

Type: Personal Project

- Built a subscription-based backend system handling subscription plans, user lifecycle, and access control
 - Reduced duplicate subscription errors by 80% through validation and constraint logic
 - Implemented token-based authentication using Laravel Sanctum
 - Designed full subscription lifecycle (create, upgrade, downgrade, cancel, expiry)
 - Developed secure REST APIs with structured JSON responses, improving reliability
-

EDUCATION

B.Tech – Computer Science Engineering

PRIST University, Thanjavur

Graduation: 2025

LANGUAGES

Malayalam – Native

English – Professional Working Proficiency

Tamil – Intermediate
