Strong knowledge of Laravel framework, PHP, MySQL, RESTful APIs, MVC architecture, and Git version control. Experienced in database optimization, API integration, debugging, and performance improvement. Able to collaborate with cross-functional teams and deliver scalable, secure solutions.

TECHNICAL SKILLS

PHP - Laravel framework	CSS	Bootstrap
MVC Arcitecture	AJAX	Git
HTML	JQuery	Bitbucket
MySQL	Database Management	Jira
Database Design		

PROFESSIONAL EXPERIENCE

Bagmo Pvt Ltd, KINFRA Hi Tech Park, Kalamassery

JAN 2022 - PRESENT

Software Developer

Bagmo Pvt Ltd is a healthcare startup based out of Kochi, Kerala. It focuses on solving the healthcare needs of the country using engineering innovations and operation management techniques.

Project Handled

Blood Bank Management System

Statewide Government-Approved Project

The blood bank management system by Bagmo monitors individual blood bags. It aims to reduce the mortality rates in rural India due to the unavailability of blood.

Responsibilities

- Development: Writing clean, maintainable, and efficient code in PHP using the Laravel framework.
- Application Design: Designing the architecture of web applications and ensuring scalability and performance.
- Implemented authentication, authorization, and role-based access control for government users.
- Database Management: Designing database schemas and writing efficient SQL queries and implemented Laravel migrations and seeders..
- Version Control: Using version control systems like Bitbucket to manage codebase changes and collaborate with other developers.
- Mentoring: Mentoring junior developers and assisting them in learning Laravel and web development concepts.
- Optimized MySQL queries to handle high-volume data across multiple hospitals.
- Built backend logic for admin dashboards and reporting modules.
- Ensured data accuracy, validation, and secure access.
- Experience working in Agile / Scrum environment.
- Strong debugging and problem-solving skills

LOGGFI

It is a real-time temperature data logger, Loggfi helps organizations in the Vaccine, Healthcare, Food and other industries record environmental conditions for asset protection.

Responsibilities

- Development: Writing clean, maintainable, and efficient code in PHP using the Laravel framework.
 - RESTful API Development: Building RESTful APIs for mobile applications or frontend frameworks using Laravel's API resources, middleware, and routing features.
 - Application Design: Designed scalable and high-performance web application architectures.
 - Database Management: Designing database schemas and writing efficient SQL queries.
 - Scalability: Designing applications with scalability in mind to accommodate future growth and increased user load.
 - Mentoring: Mentoring junior developers and assisting them in learning Laravel and web development concepts.
-

IROHUB INFOTECH

Software Intern

JULY 2021 - DEC 2021

Responsibilities

- PHP Development: Gained foundational knowledge and hands-on experience in building websites using PHP.
 - Frameworks: Introduced to PHP frameworks like Laravel, understanding their structure and usage in web development.
 - Text Editors: Became proficient in using text editors like Sublime Text and Visual Studio Code for coding and debugging.
 - HTML and CSS: Developed skills in basic HTML tags and advanced HTML techniques, along with CSS for styling web pages.
-
