Work Experience

PHP Laravel Developer

Coding Hands Infotech LLP, Thrissur-Kerala

Full-time

0-15 days notice period

May 2022 to Present

Developed and maintained a scalable admin panel & customer app for a popular Australian bakery chain used across 56 franchise locations to manage orders, inventory, menus, and user roles.

- Developed a dynamic recipe management application enabling users to create, modify, and scale complex recipes with real-time ingredient adjustments, collaborating closely with UI/UX designers to build efficient and responsive web applications.
- Participated in code reviews, stand-up meetings and unit testing.
- Gained a strong understanding of the nature of asynchronous programming

Projects :

POS Admin Panel – Restaurant Franchisee (Professional Project)

- Developed a scalable POS system including Admin Panel and Customer Application for restaurant and retail operations.
- Built and maintained backend APIs for product management, orders, inventory, loyalty programs, reviews, and reporting features.
- Tech Stack: PHP, Laravel, MySQL, React.js, Firebase, REST APIs.

Recipe Management System – Restaurant Franchisee (Professional Project)

- Contributed to a recipe & inventory management application for franchisees.
- Improved performance using caching and queue-based background processing.
- Tech Stack: Laravel, PHP, MySQL, Queue Jobs, JSON Export.
