

SRIDHARAN THULASI

PHP/LARAVEL DEVELOPER

sridharankyr@gmail.com | +91 9360152525 | www.linkedin.com/in/sridharankyr2525

SUMMARY

Full Stack Laravel Developer with 2+ years of experience building scalable ERP, SaaS, POS, and E-commerce applications using Laravel, MySQL, and Vue.js. Specialized in backend architecture, multi-tenant systems, REST API development, real-time dashboards, and secure payment integrations. Proven ability to design optimized database structures, improve system performance, and develop reliable server-side solutions for both web and mobile applications.

KEY SKILLS

- ✓ **Backend:** PHP (Laravel), REST API Development
- ✓ **Frontend:** Vue.js, jQuery, AJAX, Bootstrap
- ✓ **Database:** MySQL
- ✓ **Tools:** Git, Linux
- ✓ **Expertise:** E-commerce Systems, Payment Gateway Integration, Admin Panels, Multi-Tenant Applications

PROFESSIONAL EXPERIENCE

Dhina Technologies

Experience Highlights

- Developed full-scale E-commerce platforms including product variants, cart logic, and order workflow processing.
- Built and integrated REST APIs for Android applications.
- Designed dynamic CMS and admin panels with role-based authentication.
- Implemented product synchronization systems for external platforms.
- Optimized backend queries improving performance and response time.

PROJECTS

Cloud School Uniforms — Online Uniform Ordering and Delivery System (November 2024 – present)

Core Modules Implemented:

- Purchase Order Management: purchase request & order, goods receipt note, debit note
- Delivery management & Reporting Dashboard
- Inventory and warehouse Management: product tracking, expiry indicators, stock-control.
- Products & School-Class: product bundles, school-class mapping
- Logs & Auditing: detailed activity logs with old/new value tracking
- Roles & Permissions: secure role-based authorization across modules.
- Automated report generation for sales and chatbot functionality for customer support.

IntelTech- Vision POS (SaaS Restaurant Management System) (April 2024 – October 2024)

Built a clean and powerful order management dashboard using Laravel and Blade. Developed modular features for order, table, and kitchen fully functional and scalable backend, along with a modern UI for the dashboard.

Key Contribution:

- Built SaaS-based multi-tenant POS dashboard.
- Developed order, table, and kitchen workflow modules.
- Implemented multi-kitchen management (Food & Beverage sections).
- Designed audit & compliance inspection tracking module.
- Developed document tracking system (registrations, licenses, passports).
- Optimized database relationships using Eloquent ORM.
- Designed clean REST API structure for frontend integration.

EDUCATION

- Noorul Islam College of Engineering- Anna University — (B.Tech – I.T) | CGPA: 7.0
- Higher Secondary Certificate (12th) | 72%
- Secondary School Leaving Certificate (10th) | 74%
