Professional Summary

Strategic Technical Delivery Lead with 15 years of experience designing, delivering, and supporting **enterprise-grade web and integration platforms** across the both Lead Management and Automotive Retail domains. Strong background in **backend engineering (PHP/Laravel)**, with deep expertise in **multi-tenant architecture** and **API-first system design** supporting high-volume, business-critical operations. Proven ability to bridge engineering execution and business delivery, leading complex integrations involving **Salesforce, HubSpot, and middleware like WSO2**. Hands-on leader in Release Governance (CAB), UAT, and Production Support, ensuring high system availability and operational stability for platforms processing thousands of records daily. Experienced in mentoring cross-functional teams and translating complex technical requirements into **scalable, reliable, and maintainable software solutions**.

Core Technical Skills

- **Engineering Leadership & Delivery:** Technical Delivery Management, Solution Architecture & Design, SDLC Oversight, Cross-functional Team Mentoring & Coordination, Stakeholder & Customer Management.
 - **Backend Engineering:** PHP (Laravel – Advanced), Node.js (Integration & API Development), Multi-tenant Architecture, REST API Design & Management, Enterprise System Integration.
 - **Frontend:** React.js & Angular (Solution Design, API Integration Guidance, Performance Troubleshooting), Mobile-first Design.
 - **Data:** PostgreSQL, MySQL, Microsoft SQL Server, MongoDB, Relational Database Design.
 - **Enterprise & Middleware Integration:** Salesforce Integration, HubSpot Integration, WSO2 Middleware, API Contract Definition & Versioning, Scalable System Design.
 - **Release Governance & Support:** CI/CD Pipelines (Delivery Coordination), Git, Bitbucket, Change Acceptance Board (CAB) Leadership, UAT Management & Production Support, Environment & Release Governance.
 - **Tools:** Zoho Projects, Confluence, JIRA.
 - **Modern Productivity:** AI-Assisted Engineering (ChatGPT, Gemini, Kiro), Technical Documentation (Lucidchart, Draw.io, Gamma AI & Read AI).
-

Professional Experience

Operations Lead / Solution Engineer | QR Solutions (I) Pvt Ltd | February 2023 – Present

Technologies: Laravel, PostgreSQL, MySQL, React.js, Angular, REST APIs, Salesforce, HubSpot, WSO2

- **Provided solution-level guidance** across backend, frontend, and integrated systems supporting business-critical sales, lead management, and retail operations.
 - **Defined technology approaches and delivery strategies** for platforms involving 10+ enterprise system integrations, including Salesforce and HubSpot.
 - **Owned operational oversight for appRetail**, a multi-tenant web product used by 3+ enterprise customers with 70+ business users per customer.
 - **Led the Change Acceptance Board (CAB)**, owning release governance, approval workflows, and deployment readiness, improving release stability and reducing post-deployment issues.
 - **Orchestrated technical communication** between engineering teams, management, and enterprise customers.
 - **Conducted technical and delivery risk analysis** for customers' day-to-day activities and implemented mitigation plans to reduce production impact.
 - **Evaluated delivery quality and system stability** for platforms operating under mixed but business-critical SLAs.
 - **Supported team scaling and capability building** across engineering and support functions.
-

Project Lead / Technical Lead | QR Solutions (I) Pvt Ltd | February 2017 – January 2023

Phase 2: Technical Product Lead: appRetail Ecosystem (2019 – 2023)

Technologies: PHP, Laravel, PostgreSQL, Angular, REST APIs, Salesforce, Java, WSO2

- **Took ownership of appRetail** during its initial rollout with a single enterprise customer.
- **Led solution design** across backend and frontend, ensuring interconnected system behaviour and scalable architecture.
- **Contributed to backend architecture, data modeling, and workflows** handling thousands of retail and lead records daily.
- **Defined and maintained API contracts** supporting Angular-based frontend applications and Salesforce & WSO2 Integrations.
- **Worked closely with teams** to align UI interaction flows, data usage, and performance considerations.
- **Planned and executed product releases**, ensuring stability, backward compatibility, and UAT & customer readiness.
- **Authored and reviewed technical and functional documentation** including BRD, SOW, API documents, and end-user guides.
- **Conducted code peer reviews** to ensure quality, maintainability, and performance.

- **Troubleshoot and resolved** high-impact UAT and early production issues affecting customer-facing operations.
- **Delivered technical demos and walkthroughs** explaining product workflows and features.

Phase 1: Multi-Project & Cross-Technology Coordination (2017 – 2019)

Tools: Zoho Projects, Confluence, JIRA, Smartsheet

- **Managed a project coordination function** delivering multiple parallel projects across diverse technology stacks.
- **Planned and tracked delivery timelines, dependencies, and risks** across business-critical customer systems.
- **Identified cross-project risks and dependencies**, minimizing delivery conflicts and schedule slippage.
- **Coordinated with development, QA, and DevOps teams** to ensure consistent execution and delivery standards.
- **Facilitated customer requirement discussions** and solution alignment.

Team Lead – Support

QR Solutions (I) Pvt Ltd | July 2016 – January 2017

QR Solutions | August 2014 – June 2016

Technologies: PHP, Java, MySQL, Microsoft SQL Server, Salesforce, DataLoader.io, Data Analysis, MS Office

- **Led recruitment, training, and operational management** for ~20+ support team members across multiple customers.
- **Owned production support** for business-critical systems handling thousands of records per day, in 24/7 shift-based operations.
- **Led enterprise support operations** covering Salesforce and custom Java/PHP applications for 3 enterprise customers in the AU time zone.
- **Managed incidents under formal and informal SLAs**, ensuring minimal business disruption.
- **Worked on onboarding new customers** for support and established foundational support workflows and SOPs.
- **Served as a technical escalation point** for complex cross-system and data integration issues.
- **Implemented significant automation** of manual operational tasks, improving efficiency and accuracy.
- **Performed root cause analysis** and coordinated with development teams for permanent fixes.
- **Designed and implemented Managed Services workflows**, SOPs, and monitoring checklists.

- **Performed data analysis for large data sets**, providing actionable insights and solutions to customers.
-

Support and Development Analyst | QR Solutions | January 2013 – July 2014

Technologies: PHP, Java, MySQL, Microsoft SQL Server, Salesforce, DataLoader.io, Data Analysis, MS Office

- **Investigated and resolved integration and data-flow issues** across interconnected systems.
 - **Developed utilities and scripts** to automate manual validations and support tasks.
 - **Provided hands-on support** for Salesforce, middleware platforms, and custom Java/PHP applications.
 - **Assisted in bug fixes, enhancements, and deployment support** up to UAT environments.
 - **Executed daily, weekly, and monthly Managed Services activities** for enterprise customers.
 - **Maintained a centralized Support Registry** to track incidents, recurring tasks, and resolutions.
 - **Conducted training sessions** to onboard and upskill team members on system workflows.
-

Education

B. Tech – Information Technology

Paavai College of Engineering | June 2007 – May 2010
