Experience

Maple Tech Space Pvt Ltd

Software Developer

Dec 2020 – Present

Thrissur, Kerala

- Developed a payment gateway system for client monthly subscription management.
- Engineered data processing logic to convert raw property data into relational and meaningful structures within the application.
- Designed and implemented a floating database capable of handling 6M+ data entries, ensuring scalability and high performance.
- Led development of a large-scale Real Estate CRM project, focusing on automation, lead management, and data analytics.
- Integrated SendGrid, Twilio, and Facebook Leads API into the CRM for communication and marketing automation.
- Developed custom e-commerce websites in Laravel tailored to client requirements.
- Collaborated with QA and testing teams to maintain product quality and ensure adherence to standards.
- Collected and analyzed user feedback to improve software usability and performance.
- Worked closely with cross-functional teams to identify, debug, and resolve software issues efficiently.

Projects

Real Estate CRM Platform | *Laravel, Mysql*

Feb 2021 - Present

- Built a complete CRM platform to manage leads, follow-ups, marketing campaigns, and property data.
- Implemented lead tagging, and automation workflows using Laravel Events and Queues.
- Developed modules for saved properties, user dashboards, and task scheduling.
- Designed and integrated prepaid email & SMS plans with credit tracking and notifications.
- Created analytics dashboards for lead performance, agent activity.
- Optimized database queries (over 1M+ records) with indexing, caching, and pagination for high-speed filtering.
- Improved system scalability with modular architecture, resource collections, and asynchronous jobs.

Property Data Synchronization System | *Laravel, Mysql*

March 2022 - Present

- Created automated synchronization between BridgeMLS and TRREB APIs for real-time property updates.
- Implemented incremental sync jobs with Laravel Scheduler and Queues to handle continuous data flow.
- Managed large-scale property imports and updates using optimized batch processing.
- Maintained separate live and archived property datasets for performance and data consistency.

AgentRoof Real Estate Website | *Laravel, Mysql, Vue Js, Javascript*

Jan 2021 - Jun 2023

- Developed AgentRoof, a real estate website showcasing active listings, property details, and search filters.
- Implemented advanced location-based and keyword search for properties using optimized Laravel queries.
- Focused on efficient data handling, caching, and pagination for high-performance user experience.
- Integrated APIs for property images, open house data, and listing histories.
- Ensured responsive design, SEO optimization, and fast API responses across all modules.

Technical Skills

Languages: PHP (Laravel), JavaScript (Vue.js, jQuery), HTML5, Bootstrap

Developer Tools: VS Code

Database & Storage: MySQL, BunnyCDN , AWS (Storage Integration)

API & Integrations:: RESTful APIs, Twilio (SMS), SendGrid (Email), Google Maps API, Facebook API, Stripe Integration API
