 Pune

Executive Profile

- Led end-to-end SDLC delivery for enterprise applications, translating complex business requirements into scalable architectures while ensuring seamless development, deployment, enhancements, and post-production support for mission-critical platforms.
- Successfully delivered and stabilized multiple enterprise solutions, including Simpro (SaaS System), Drive Safe (Education Portal), Cash for Trash (Recycling Solution), Waxcenter (Salon Management Platform), and Fastpitch (Recruiting System), ensuring on-time releases, zero critical escalations, and consistently high client satisfaction.
- Engineered high-performance application ecosystems by leading REST API integrations, optimizing database architecture, developing reusable frameworks, and executing performance tuning initiatives to improve system reliability and maintainability.
- Accelerated delivery outcomes by leading Agile development teams, conducting structured code reviews, driving Scrum ceremonies, and aligning closely with stakeholders to ensure high-quality releases within committed timelines.
- Architected cloud-native, event-driven systems leveraging AWS Lambda, SQS, DynamoDB, and OpenSearch to enable microservices-based architectures, asynchronous processing, and improved production resilience.
- Enhanced platform observability and operational stability by implementing centralized log analytics and monitoring dashboards using OpenSearch, Kibana, and Grafana, enabling proactive L2/L3 incident management and faster root cause resolution.
- Directed engineering teams of 4–5 developers, establishing strong code governance, sprint discipline, and collaboration with Product, QA, and DevOps teams to deliver predictable and high-quality release cycles.
- Driving AI-led innovation by advancing expertise in Agentic AI and Amazon Bedrock Agents through specialized certifications while exploring intelligent automation capabilities for next-generation web platforms.
- Recognized for delivering client-centric technology solutions, transforming complex business challenges into robust, scalable, and user-focused digital platforms across diverse technology stacks.

Technical Skills

Cloud & Serverless (AWS)	AWS Lambda, DynamoDB, SQS, EC2, S3, Cloud-Native Deployment & Scalability Handling
Frontend & Integration	JavaScript, TypeScript, Angular 4+, jQuery, HTML5, CSS3, Third-Party API Integrations
AI & Agentic Engineering	Agentic AI Concepts & Multi-Agent Workflows, Langflow, LangGraph, Amazon Bedrock, Amazon Bedrock Agents, Prompt Engineering & LLM Integration APIs
Backend Engineering	PHP (8.x), Laravel, CodeIgniter, Nette (MVC Framework), OpenCart
System Design	RESTful API Design, MVC Architecture, RBAC, Microservices Architecture & Event-Driven Systems, Asynchronous Processing & Service Integration
Testing	Unit Testing & End-to-end Testing
Search & Data Engineering	OpenSearch, MySQL, MongoDB
Observability & Production Engineering	Kibana, Grafana, L2/L3 Production Support, Root Cause Analysis & MTTR Reduction
DevOps, CI/CD & Version Control	Jenkins, Git, GitHub, Release Coordination & Deployment Management
Product Engineering & Collaboration Tools	Jira, GitHub Copilot, Claude / DXClaude, Visual Studio Code, PhpStorm
Methodologies	Agile, Scrum, Cross-Functional Collaboration with Product, QA & DevOps

Key Impact Areas

Software Development Lifecycle	Technical Leadership & Engineering Governance
Scalable Backend Architecture & System Design	Cloud-Native & Serverless Application Development
Event-Driven & Microservices Architecture	Production Stability & Observability Engineering
Performance Optimization & Database Tuning	Agile Delivery & Sprint Execution
L2/L3 Incident Management & Root Cause Analysis	SaaS Platform Scalability & Reliability

Key Skills

Certifications

- Pursuing AWS Cloud Computing Practitioner Course
- Agentic AI Course - Don Bosco Technical Institute (Vyawaśaik Prashikshan Kendra)
- Angular4 Certification – Softedge Institute of Aundh

Education

- 2009: Masters in Computer Science from Pune University
- 2007: Bachelors in Computer Science from Pune University

Career Timeline

Professional Experience

Since Dec'24 with NICE as Senior Software Engineer

- Contributing as a core backend engineer within the Platform team for a Customer Experience (CX) Chat module, driving development of new capabilities while enhancing legacy components to improve platform functionality and reliability.
- Designed and implemented scalable backend services and RESTful APIs to support real-time chat workflows, enabling robust, maintainable solutions aligned with evolving product requirements.
- Influenced solution architecture and delivery planning by actively participating in backlog grooming, technical discussions, effort estimation, and feasibility analysis for new product initiatives.
- Accelerated issue resolution and system stability by collaborating in cross-functional swarm sessions to diagnose and resolve complex issues across development, QA, staging, and production environments.
- Delivered 8+ high-impact product enhancements by partnering with Product and cross-functional teams, translating business requirements into scalable backend solutions that supported 1,000+ enterprise users and accelerated release turnaround time by ~20%.
- Strengthened production reliability by conducting in-depth log analysis and root cause investigations using OpenSearch and Kibana, improving incident response and system performance.
- Enabled high-quality Agile releases through close collaboration with Product, QA, and DevOps teams, ensuring seamless feature rollouts and consistent delivery standards.
- Elevated engineering quality and team capability by mentoring junior developers through structured code reviews and technical guidance, reinforcing clean architecture practices and coding standards.

May'15 – Dec'24 with Clarion Technologies (CMMI Level 3)

Growth Path:

- Delivered 10+ enterprise-grade web applications leveraging PHP, Laravel, CodeIgniter, JavaScript, jQuery, TypeScript, HTML, CSS, and MySQL within Agile/Scrum teams of 5–8 engineers, ensuring on-time global releases and improving feature delivery efficiency by ~20%.
- Enhanced code quality and development efficiency by designing reusable UI and backend components using strong Object-Oriented Programming principles, reducing code duplication and improving long-term maintainability across applications.
- Improved application performance and operational stability by collaborating with Product, QA, and DevOps teams to troubleshoot production issues, optimize database queries, and implement performance enhancements.
- Delivered end-to-end product features within Agile/Scrum teams, contributing to sprint planning, technical design discussions, effort estimation, and coordinated releases to ensure predictable and timely delivery cycles.
- Strengthened engineering standards and team capability by mentoring junior developers through structured code reviews and technical guidance, ensuring adherence to best practices and clean coding standards.
- Boosted system responsiveness and scalability by driving performance tuning initiatives, including query optimization and architectural improvements across core application modules.
- Successfully delivered and stabilized multiple product platforms, ensuring reliable production releases, enhanced system scalability, and sustained client satisfaction.

Previous Experience

Nov'12-May'15 with Cyberindigo Net Pvt. Ltd. as PHP Developer

Sep'11 – Sep'12 with Techmodi as Jr. PHP Developer

Jul'10 – Sep'11 with Agile Technosys as Trainee PHP

Personal Details

Date of Birth : 16th April 1986
Languages Known : English, Hindi & Marathi

Refer Annexure for project details

Project Details

CXone – Enterprise Contact Center Platform Backend

- Engineered and deployed 12+ scalable backend services and REST APIs using PHP, TypeScript, MySQL, Redis, and AWS, supporting 1,000+ global contact-center users across voice, chat, and digital interaction analytics platforms.
- Owned end-to-end delivery across 6+ major product releases.
- Boosted system performance by ~40% through advanced query optimization, Redis caching strategies, and asynchronous message-queue architectures, enabling seamless processing of high-volume, event-driven workloads.
- Strengthened engineering rigor by mentoring 4–5 developers and institutionalizing coding standards and test coverage practices, reducing post-release defects by ~25%.
- Resolved 10+ L2/L3 production incidents through structured root-cause analysis, enhanced monitoring frameworks, and resilient error-handling mechanisms—improving platform stability and reducing repeat incidents by ~30%.

Simpro – SaaS Project Management Platform

- Delivered 40+ high-priority Jira tickets across staff and customer modules within a 5-member Agile team, accelerating feature delivery timelines and enhancing overall client satisfaction.
- Provided end-to-end production support for global SaaS customers across 3+ regions, diagnosing architectural gaps and implementing robust fixes within a Core PHP–MVC–PostgreSQL environment to ensure system reliability.
- Optimized database schemas and workflow logic, improving application response time by ~20% and enhancing user experience for field-service teams across multiple markets.

Drive Safe – Education Scheduling Platform

- Led a zero-downtime migration from PHP 5.6 to 8.1 across 12+ critical modules, ensuring uninterrupted access for 2,000+ students and parents and strengthening platform security and performance.
- Resolved 15+ high-impact payment defects through structured Jira-based root cause analysis and cross-functional stakeholder coordination, improving transaction success rates and overall user experience.
- Delivered multiple enhancement releases while proactively managing client communication, ensuring stable MVC architecture and API performance with consistent production reliability.

Cash for Trash – Recycling Management System

- Delivered a full-stack Laravel solution supporting 4 distinct user roles (dispatchers, managers, drivers, and admins), streamlining lead tracking and scheduling workflows through end-to-end automation.
- Designed and deployed 15+ mobile-responsive APIs integrated with core operational workflows, reducing manual coordination efforts by ~25% and improving process efficiency.
- Successfully rolled out 5+ on-time production releases by incorporating structured client feedback and proactive performance monitoring, ensuring stable and scalable application performance.

Waxcenter – Salon Management Platform

- Architected scalable database schemas and merchant workflow logic to support multi-location salon operations, enhancing booking accuracy and improving ticket tracking efficiency across branches.
- Implemented seamless Google Drive integration and automated document workflows, reducing manual file handling efforts by ~30% and improving operational productivity.
- Delivered robust and stable admin and user modules encompassing lead management, ticketing systems, and RBAC-based access control, ensuring secure and streamlined platform operations.

Fastpitch Recruits – Sports Recruitment Platform

- Delivered 20+ high-impact feature enhancements across tournament, camp, and recruitment modules using PHP, MySQL, and jQuery, strengthening athlete tracking capabilities and overall platform functionality.
- Managed global client change requests and production fixes, ensuring seamless coordination across development and testing cycles with consistent on-time delivery.
- Designed and implemented optimized stored procedures and data validation frameworks, improving reporting accuracy and reducing data errors by ~20%.

Cpe247 – Online Education Platform

- Independently delivered a full lifecycle OpenCart solution, developing end-to-end modules for course, product, and user management to support online education customers.
- Architected robust database structures and transaction workflows enabling seamless purchasing and content delivery, enhancing transaction reliability and overall platform usability.
- Managed the complete development cycle—from requirement gathering to deployment—delivering a production-ready, stable, and scalable platform aligned with business objectives.
