

SUNITHA VS (PHP/LARAVEL DEVELOPER)

7 years of experience in Software Development

+91 9744410580 / sunitha1994vs@gmail.com

EDUCATION - B.Tech Computer Science (2011 - 2015 / CGPA: 8.16)

PROFESSIONAL SUMMARY

Dynamic and results-driven **Full-Stack Developer** with over **7 years of experience** in designing, developing, and maintaining scalable web applications. Skilled in both **front-end and back-end development**, with a strong foundation in **PHP frameworks** (Laravel, CodeIgniter) and modern **JavaScript libraries/frameworks** like **Vue.js**. Adept at building responsive user interfaces with a keen eye for **UI/UX design**, while also ensuring robust backend architecture and seamless API integrations.

TECHNICAL SKILLS

Backend : Laravel (6 years), CodeIgniter (4 years), Core PHP

Frontend : HTML5, CSS3, JavaScript, Vue.js , jQuery, Bootstrap

Databases : MySQL, Oracle

API : RESTful API, SOAP, JSON, XML

Tools & Services : Jenkins, QuickBooks API, Stripe, Git, Postman

WORK HISTORY

Senior Software Developer, Xynosoft Solutions (27th February 2024 - Current)

1. Nursing App (Admin Panel & Mobile APIs)

Developed a backend system and mobile APIs for a **Nursing Management App** used by companies in Qatar. The platform enables nurses to log activities and track their schedules, while clients can monitor service status and daily reports.

Tech Stack: Laravel, HTML, CSS, JavaScript, REST API, MySQL

2. HR Portal (Admin Panel & Employee Portal)

Developed a comprehensive HR management system with separate login modules for HR and employees. The platform handles payroll processing, attendance tracking, leave management, and employee data management. Built with Laravel for Xynosoft and Can Consultancies, Qatar.

Tech Stack: Laravel, HTML, CSS, JavaScript, MySQL

3. Custom CMS Websites for Small Businesses

Designed and developed user-friendly, **manageable admin panels** using **CodeIgniter**, tailored for small companies to showcase their products and services. Each project included dynamic content sections (text/images/videos), contact forms, SEO support, and easy-to-use dashboards for non-technical users. **Total Custom CMS Projects Delivered: 10+**

Tech Stack: CodeIgniter, PHP, MySQL, HTML5, CSS3, JavaScript, Bootstrap, jQuery

Software Developer, Net Trans Infotech Pvt. Ltd. (25th October 2022 - 4th December 2023)

Joined as Software Developer in UK Telecom Process. Net Trans is a leading IT Service company providing comprehensive solutions in the telecommunication industry.

1. AvooMobile UK based sim service website (<https://avoomobile.com/>)
Technologies-: Laravel, HTML, CSS, JavaScript, REST API, MySQL
2. Worked in implementing different payment gateways with custom payment checkout page (Bank of America Gateway , Stripe , Wyre Checkout , Payment Moonlite API, Craftgate gateway)
3. Worked with other sim service websites like <https://miloconnect.world/> , <https://solitums.com/>
4. Implemented billing automation in avoomobile system.
5. Worked with Multiple **POS systems**

Software Engineer , Spices Board (23rd May 2018 - 9th May 2021)

Joined Spices Board as a Software Engineer (PHP) on a contract basis, contributing to multiple enterprise applications. Worked extensively with PHP frameworks like CakePHP, CodeIgniter, and Laravel, integrating front-end technologies including Bootstrap, jQuery, Ajax.

Developed and maintained systems for exporter registration, transfer management, billing, electronic data processing, direct benefit transfer via SOAP APIs, pensioner information, leave management, and appraisal systems, utilizing databases such as Oracle and MySQL, and employing REST and SOAP APIs for seamless data exchange.

PHP Programmer - 2Hats logic solutions (OCT 2017 - JAN 2018)

Wordpress customization and plugin development for various websites

1. <https://renartelc.com/> (converted static HTML website to dynamic wordpress content)
2. <https://malagaferieboligudlejning.dk/> (Wordpress theme and plugin customization)
3. <https://brylleled.dk/> (Image Plugin customization and modifications)
