

Sushama Ranjan

Senior Full Stack Developer | Technical Lead

SUSHAMA RANJAN

Technical Lead at
HappiestMinds Technologies

TECHNICAL STRENGTHS

Backend & Architecture

PHP (5.x–8.x), Laravel (v8/v9),
Symfony (v5/v6), Pimcore
(v6/v10/v11)
Object-Oriented
Programming (OOP), SOLID
Principles, Design Patterns
Microservices & Event-Driven
Architecture, High-volume
Data Processing &
Asynchronous Workflows,
RESTful API Design &
Integration

Frontend

React.js, JavaScript,
HTML5, CSS3

Security & Identity Integrations

SSO Implementation using
SAML 2.0, OpenID Connect
(OIDC),
Okta Integration, Salesforce
Integration

Databases, Search & Messaging

PROFESSIONAL SUMMARY

Technical Lead with 14 years building enterprise PHP/Laravel/Symfony platforms at scale. Specialist in event-driven microservices (Kafka), CMS/MDM systems (Pimcore), and SSO/IAM integrations. Led teams of 20+ and delivered zero-downtime deployments on AWS. Actively uses GitHub Copilot and AI tooling to raise engineering velocity.

June 2023 – Present

HappiestMinds Technologies

Technical Lead

- Developed full-stack solutions using PHP, Symfony, Pimcore, and React to build scalable enterprise applications.
- Designed and built high-performance RESTful APIs and backend services to enable seamless integration with frontend applications and external systems.
- Designed and implemented Apache Kafka pipelines for real-time data ingestion, processing 50K+ events/day across 5+ distributed external source systems.
- Engineered a CSV bulk data import pipeline supporting 1M+ record uploads with batch processing, enabling high-throughput ingestion into the MDM system while maintaining data integrity and fault tolerance.
- Implemented asynchronous processing pipelines using Symfony Messenger for reliable message handling and background job execution.
- Built responsive frontend components and dashboards using React.js, integrating APIs for dynamic data-driven interfaces.
- Established engineering standards, code quality practices, and architecture governance for scalable application development.
- Led a POC on Copilot bundle integration, assessing feasibility for AI-augmented Data enrichment.
- Implement CMS, DAM, and MDM solutions for robust content, asset, and data management.
- Collaborate with stakeholders, product managers, and business teams to align technical solutions with strategic objectives.
- Led and mentored the development team, ensuring adherence to coding standards, best practices, and design patterns.

MySQL, MariaDB, MongoDB
Redis, Elasticsearch,
OpenSearch, Apache Kafka
(CDC, Producers/Consumers),
Symfony Messenger (Async
Processing)

Cloud & DevOps

AWS: S3, RDS, CI/CD
Pipelines, GitHub Actions

Quality & Observability

SonarQube, Lighthouse,
GTMetrix
Performance Optimization
Security Hardening

Developer Productivity

GitHub Copilot, OpenAI
Codex, prompt engineering
for code generation

Engineering Leadership

Solution Architecture,
Code Reviews & Mentoring,
Agile / Scrum Delivery,
Stakeholder Communication

CMS

Opencart, Joomla,
Wordpress, Shopify, Orange
HRMS.

EDUCATION

Master of Computer Applications (MCA)

Mody University of Science
and Technology, Rajasthan
(2005 – 2007)

Bachelor of Computer Applications (BCA)

Birla Institute of Technology,
Mesra, Ranchi
(2001 – 2004)

- Manage and optimize AWS S3 integration within the system for scalable, secure, and high-performance asset storage.
- Implement Symfony Messenger for asynchronous job handling, message queuing, and reliable communication between services.
- Integrate OpenConnect for secure authentication, single sign-on, and enhanced access control across enterprise applications.
- Wrote and maintained PHPUnit test suites to ensure code reliability, covering unit and integration tests across core application modules.
- Design and build RESTful APIs to streamline connectivity and data exchange with external platforms and services.
- Asynchronous processing and message-driven workflows using Kafka and Symfony Messenger
- Designed and implemented Salesforce CDC-based data integration pipelines to synchronize real-time data changes into MDM.

June 2022 – May 2023

Net Solutions

Technical Lead

- Developed full-stack solutions using PHP, Laravel, and React to build scalable enterprise applications.
- Led solution design and implementation across multiple application portfolios, ensuring scalable architecture and alignment with business objectives.
- Reviewed business requirements and translated them into scalable technical architectures.
- Developed comprehensive technical documentation including system design documents, sequence diagrams, ER diagrams, and data flow diagrams (DFD).
- Maintained CI/CD pipelines and DevOps workflows using GitHub.
- Provided architectural guidance and code reviews to ensure quality and performance.
- Worked on the Learning Management System (LMS) domain, designing and developing scalable platforms for course management, enrollment, tracking, and reporting.
- Built high-performance REST APIs supporting scalable, low-latency data access for enterprise applications.

August 2013 – June 2022

OnSumaye Pvt. Ltd., Noida

Technical Lead

- Worked directly with leadership to define technology strategy and long-term product vision.
- Led end-to-end design and development of large-scale web applications and LMS platforms.

LinkedIn:

<https://www.linkedin.com/in/sushmaranjan/>

- Architected and deployed SAML 2.0 SSO and IAM solutions across 9 enterprise client applications, centralizing authentication and eliminating per-app password management for end users.
- Designed highly scalable RESTful APIs and optimized system performance using SonarQube and Lighthouse.
- Led and mentored a cross-functional team of 20–25 engineers across 2 concurrent projects over 4 years, ensuring consistent on-time delivery through Agile sprint planning and structured code review practices

January 2010 – July 2013

Media Mosaic Pvt. Ltd., Noida

Senior Web Developer

Developed and maintained PHP-based web applications and CMS platforms.

- Integrated payment gateways including PayPal and HDFC.
- Built RESTful services and improved application security and performance.
- Contributed to coding standards and best practices across teams.

CERTIFICATIONS

- Generative AI & OpenAI API Integration — Udemy
- Software Architecture & Design of Modern Large-Scale Systems — Udemy
- Scrum Master Certification by Agile Enterprise Coach- Udemy (Instructor- Vipesh Singla, Certified SAFe Agile Coach)
- Dive in and learn React.js from scratch! Learn React, Hooks, Redux, React Router, Next.js, Best Practices and way more! - Udemy
