PROFESSIONAL SUMMARY

Highly motivated PHP Developer with 3+ years of experience in developing scalable web applications, RESTful APIs, and database management. Proven expertise in Core PHP, Laravel, CodeIgniter, and MySQL with strong problem-solving abilities and passion for delivering innovative solutions. Specialized in building educational management systems with advanced features including placement tracking, automated assessments, cloud storage integration, and verification workflows. Additionally experienced in logistics and warehouse management systems with expertise in real-time tracking and inventory optimization.

TECHNICAL SKILLS

Backend: PHP, Core PHP, Laravel, CodeIgniter, Yii Framework, Python

Frontend: HTML5, CSS3, JavaScript, Bootstrap, jQuery, AJAX, Responsive Design

Database: MySQL, Query Optimization, Database Design, Indexing, Data Modeling

Cloud & Storage: AWS S3, CloudFront, IAM Policies, Cloud Integration

Tools & Platforms: Git, RESTful APIs, cPanel, JIRA, Slack, Postman

Server Technologies: Windows Server, Linux (Ubuntu), IIS, Nginx

Other: JSON, Agile, OCR, PDF Generation, Google Maps API

Development Practices: MVC Architecture, Object-Oriented Programming (OOP), Code Review, Testing & Debugging, Performance Optimization

PROFESSIONAL EXPERIENCE

Software Developer - PHP & API Specialist

DigitalEdu IT Solutions Pvt Ltd., Pune | Apr 2025 – Present

- ☐ Designed and developed secure, scalable RESTful APIs using Core PHP and Yii framework for educational management systems serving 10,000+ users
- ☐ Built dynamic modules for course management, exam scheduling, student-teacher communication, and attendance tracking with real-time updates
- ☐ Developed comprehensive Placement Management Module handling 500+ job postings and 2000+ student applications annually
- ☐ Created On-Screen Assessment (OSA) system with AWS S3 integration, reducing paper usage by 95% and evaluation time by 70%
- ☐ Collaborated with frontend teams to implement interactive UI components using AJAX, JavaScript, and jQuery
- ☐ Optimized SQL queries and implemented proper indexing, improving database response time by 45%
- ☐ Managed server deployments, automated cron jobs, and backup routines for production environments
- ☐ Implemented comprehensive data security measures including validation, sanitization, role-based access control, and protection against SQL Injection/XSS attacks

PHP Developer

Monarch Surveyors & Engineering Consultants Limited, Pune | Sep 2024 – Mar 2025

- Developed and maintained multiple modules in Monarch Project Management (MPM) system handling 50+ concurrent projects
- Created RESTful APIs for seamless data flow between modules, improving system integration by 40%
- Implemented security best practices including protection against SQL Injection, XSS, and CSRF vulnerabilities
- Performed database optimization and query tuning, reducing page load times by 35% for large dataset management
- Developed responsive user interfaces using HTML5, CSS3, Bootstrap, and JavaScript ensuring cross-browser compatibility
- Integrated third-party APIs for document management and notification services
- Conducted code reviews and mentored junior developers on best practices

Software Developer

Swatpro Technologies Pte Ltd, Pune (Subsidiary of Vtc3pl) | Jan 2024 – Sep 2024

- Developed custom software solutions using PHP, MySQL, Laravel, and CodeIgniter frameworks
- Built and implemented web applications with focus on scalability and performance optimization
- Developed RESTful API endpoints for mobile application integration
- Configured cPanel and managed automated cron jobs for server task optimization and scheduled backups
- Collaborated with cross-functional teams for requirement analysis and feature implementation
- Enhanced Warehouse Management System with advanced inventory tracking features
- Implemented email notification system and SMS gateway integration

Software Developer

VTC3PL Pvt Ltd, Pune | Sep 2022 – Dec 2023

- Developed Transport Management System (TMS) with real-time GPS tracking serving 200+ vehicles and fleet optimization
- Built Warehouse Management System (WMS) with barcode scanning and RFID integration, managing 50,000+ SKUs
- Designed real-time vehicle tracking dashboard with Google Maps API integration and 30-second location updates
- Implemented geofencing, route optimization, and automated reporting reducing delivery time by 35%
- Optimized database queries and enhanced application performance, handling 10,000+ daily transactions
- Created automated shipment tracking with SMS/Email notifications to customers
- Collaborated with cross-functional teams for requirement analysis and agile implementation

KEY PROJECTS

Placement Module - Educational Management System

Technologies: Core PHP, MySQL, JavaScript, AJAX, REST APIs, PDF Generation (TCPDF), Yii Framework
Company: DigitalEdu IT Solutions

- *Designed comprehensive placement portal with company registration, job posting, and eligibility criteria management*
- *Implemented intelligent job matching algorithm filtering eligible students based on academic performance, skills, and preferences*
- *Built end-to-end application workflow with interview scheduling, round tracking, and results management*
- *Created admin dashboard with analytics, reporting capabilities, and Excel/PDF export functionality*
- *Integrated email notification system for application updates and interview reminders*
- *Developed student profile management with resume upload and skill assessment features*
- ***Impact:*** *Facilitated placement tracking for 2000+ students, improving coordination efficiency by 60%, increased placement rate by 25%*

OSA (On Screen Assessment) Module - Exam Management

Technologies: Core PHP, MySQL, JavaScript, AJAX, AWS S3, CloudFront, TCPDF, OCR, Yii Framework
Company: DigitalEdu IT Solutions

- Built secure document upload system with AWS S3 integration and CloudFront CDN for scalable storage handling 10GB+ files
- Implemented OCR pipeline using Tesseract for automatic question detection and text extraction from scanned papers
- Created dynamic exam interface with timed assessments, auto-submit functionality, and anti-cheating measures
- Developed TCPDF-based report generation with performance analytics, result sheets, and graphical charts
- Integrated answer key validation with automated marking system for objective questions
- Built faculty dashboard for exam creation, student monitoring, and result analysis
- **Impact:** Digitized assessment process for 5000+ students, reduced paper waste by 95%, automated evaluation saving 70% faculty time, improved result declaration speed from 2 weeks to 2 days

Transport Management System (TMS)

Technologies: Core PHP, Laravel, MySQL, JavaScript, Google Maps API, AJAX, REST APIs
Company: VTC3PL Pvt Ltd

- Developed comprehensive fleet management module with vehicle registration, driver profiles, and document tracking
- Integrated Google Maps API for real-time GPS tracking with 30-second location updates and route history
- Implemented geofencing and route deviation alerts for enhanced security and compliance
- Created shipment management with barcode scanning, proof of delivery (POD), and customer signature capture
- Built fuel management system tracking consumption, expenses, and calculating vehicle efficiency
- Developed automated trip planning with route optimization and load capacity management
- Generated automated reports for distance traveled, fuel consumption, and driver performance
- **Impact:** Managed 200+ vehicles, reduced delivery time by 35%, improved on-time delivery from 78% to 94%, decreased fuel costs by 28%, enhanced customer satisfaction by 40%

Warehouse Management System (WMS)

Technologies: Core PHP, CodeIgniter, MySQL, JavaScript, Barcode/RFID Integration, AJAX
Company: VTC3PL Pvt Ltd & Swatpro Technologies

- Built real-time inventory tracking system with barcode and RFID integration managing 50,000+ SKUs
- Implemented receiving operations with automated GRN (Goods Receipt Note) generation and quality checks
- Created intelligent picking and packing optimization with bin location suggestions and wave picking
- Developed inbound/outbound management with purchase order and sales order integration
- Built stock adjustment module with reason tracking and approval workflow
- Implemented cycle counting and physical inventory management features
- Created comprehensive reporting dashboard with inventory valuation, aging analysis, and stock movement reports
- Integrated shipping carrier APIs for label generation and tracking updates
- **Impact:** Increased inventory accuracy from 92% to 99%, reduced fulfillment time by 40%, improved warehouse space utilization by 25%, decreased stock discrepancies by 80%

Verification Operation Communication (VOCOxP)

Technologies: Core PHP, MySQL, JavaScript, AJAX, REST APIs, Third-party API Integration
Company: Monarch Surveyors & Engineering Consultants Limited

- Developed comprehensive digital verification platform for Aadhaar, PAN, Voter ID, Driving License, and Criminal Records
- Integrated government APIs and third-party verification services for real-time document authentication
- Implemented secure document verification workflow with authenticity assurance and fraud detection
- Built wallet integration system with payment gateway, transaction monitoring, and automated fund management
- Created multi-level admin panel with customized role-based access controls and member profile management
- Developed verification request tracking system with status updates and notification alerts
- Implemented detailed audit logs for compliance and security purposes
- Impact: Processed 10,000+ verification requests monthly, reduced verification time from 3 days to 2 hours, improved accuracy by 98%

ACHIEVEMENTS & CONTRIBUTIONS

- Successfully delivered 8+ enterprise-level projects on time and within budget
- Reduced code bugs by 40% through implementation of code review practices and unit testing
- Mentored 3 junior developers on PHP best practices and framework architecture
- Optimized legacy codebase resulting in 50% improvement in application performance
- Received "Best Developer Award" at VTC3PL for exceptional contribution to TMS project
- Contributed to open-source PHP libraries and actively participated in developer communities

EDUCATION

Bachelor of Technology (B.Tech)

Karmayogi Institute of Technology, Pandharpur, Maharashtra

2019 – 2023

CGPA: 8.91/10

CERTIFICATIONS & TRAINING

- **Python & PHP Course** - Disha Computer Institute (Jan 2022 - May 2022)
