

TOM THOMAS

Backend Developer | PHP (Laravel) | Node.js | MySQL

Kerala, India | Open to Remote / Onsite

Email: tom38669@gmail.com | Phone: +91 70258 12367

PROFESSIONAL SUMMARY

Backend Developer with 3+ years of experience designing, building, and scaling secure backend systems using Laravel, Node.js, and MySQL. Proven ability to deliver high-performance REST APIs, optimize databases, and implement authentication and background processing systems. Seeking backend roles in product-based or SaaS companies.

CORE SKILLS

PHP, Laravel, Node.js (Express.js), MySQL, REST APIs, JWT, Laravel Sanctum, Git, Linux, Apache, Nginx, Cron Jobs

PROFESSIONAL EXPERIENCE

Backend Developer — Tchrish Solutions (2022 – Dec 2025)

- Developed and maintained 15+ production-grade REST APIs
- Implemented secure authentication using JWT and Laravel Sanctum
- Optimized MySQL queries achieving ~30% performance improvement
- Built Node.js microservices and background processing jobs
- Managed Linux-based deployments with Apache and Nginx

PROJECTS

Business Management System – Laravel, MySQL, JWT

Designed secure REST APIs with role-based access control and optimized database schemas.

Notification & Background Processing Service – Node.js, Express

Built scheduled notification and asynchronous background processing services.

ADDITIONAL STRENGTHS

- Strong understanding of backend security principles
- Experience owning backend features end-to-end
- Performance tuning and database optimization mindset
- Continuous learner focused on scalable system design

EDUCATION

Bachelor of Computer Applications (BCA) – Mahatma Gandhi University (2017 – 2020)

CERTIFICATIONS

CCNA Networking – INET

PHP & Laravel Development

Node.js (Self-learned)
