Sr. Software Engineer, 06/2023 to 03/2024

Hyvesports Pvt. LTD - Trivandrum

- Streamlining the entirety of production management system developments is paramount. Our focus spans from lead management to customer relations, production scheduling, process optimization, task delegation, dispatch, and ongoing customer support. This comprehensive approach serves as the cornerstone for effectively managing and controlling our entire institution.
- Throughout the design and development phase, we abstained from off-the-shelf solutions due to the unique nature of our working and production processes. Our commitment to tailored solutions led us to develop a distinctive technique, ensuring our objectives are met with precision.
- With expertise in Dashboard Developments, we boast a proven track record of crafting bespoke dashboards that offer real-time insights, facilitating informed decision-making and bolstering organizational visibility.
- Additionally, we excel in creating tools tailored to enhance communication for both business owners and agents, with the primary aim of reducing workload and maximizing operational efficiency.
- Successfully managed the training of over 40 non-technical users, guiding them in using the software and assisting with migration to a new system.
- Regularly trained 5 to 10 new team members each month, both in person and remotely, ensuring smooth onboarding and knowledge transfer.

Software Engineer, 04/2021 to 05/2023

Picky Assist Inc - Trivandrum

- Adept at revamping legacy code to new structural and reusable code, resulting in increased maintainability and scalability.
- Proficient in building various types of mini web-apps, create innovative solutions that meet user needs.
- Skilled in Dashboard Developments, with a proven track record of designing and implementing custom dashboards that provide real-time insights, streamline decision-making, and enhance organizational visibility.
- Developing tools to support communication for business owners and agents, aimed at reducing workload and increasing efficiency.
- Successfully worked on more than 13 projects, with 11 of them completed. Also contributed reusable code that was adopted across the entire company
- Increased code quality and reduced bug rates by establishing comprehensive unit and integration testing protocols.

Software Engineer, 09/2020 to 04/2021

Groware Global - Trivandrum

- Developing a diverse range of marketing websites, including online food delivery, supermarkets, and inventory management, that help businesses streamline operations and improve customer engagement.
