

VENKATACHALAM VE

Senior Software Engineer | Full Stack Developer

Chennai, Tamil Nadu, India

Phone: +91 80151 99022 | Email: Venkatachalam.Ve@gmail.com

LinkedIn: <https://www.linkedin.com/in/venkatachalam-venkatachalam>

PROFESSIONAL SUMMARY

Senior Software Engineer with 7+ years of experience designing, developing, and optimizing enterprise-grade web applications across SaaS (PMIS), Insurance, E-Commerce, and Healthcare domains. Skilled in **Angular SPA architecture with lazy loading, PHP (Yii2, Laravel), Python REST API development, MySQL performance optimization, multi-tenant SaaS systems, and AI-driven automation**. Proven track record of delivering scalable, high-performance solutions for global clients in the **US and Singapore markets**.

AI & AUTOMATION EXPERIENCE:

Improved development workflows using AI-driven automation, Enhanced intelligent chatbot solutions for workflow automation, Developed automated pull request analysis system, Designed AI-assisted bug detection system to enhance code quality

CORE COMPETENCIES

Full Stack Development, SaaS & Multi-Tenant Architecture, Insurance Domain Applications, Secure Authentication (SSO), AI-Based Automation & Code Review, Performance Optimization, MySQL Query Optimization, RESTful API Development & Integration, MVC Architecture, Agile & Git-Based Workflow

TECHNICAL SKILLS

Frontend Technologies: HTML5, CSS3, Angular, React.js, TypeScript, JavaScript (ES6+), Bootstrap, jQuery, AJAX

Backend Technologies: PHP (Yii2, Laravel, Wordpress, Codeigniter) - MVC Architecture, Python (REST APIs, AI Processing), Flask

Database: MySQL, PostgreSQL

Architecture & Security: Multi-Tenant SaaS Systems, Role-Based Access Control (RBAC), Secure Authentication, API Logging, Monitoring, CSRF Protection

Tools & Platforms: Git, Docker, Postman, WebRTC

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Anubavam Technologies, Chennai Dec 2023 – Present

SaaS Platform – CREATRIX

Designed and developed PMIS enhancements and Sprint Management SPAs using Angular 14 with modular architecture and reusable component design principles.

- Built real-time dashboards to track committed vs. completed story points with dynamic filtering and interactive visualizations, improving sprint visibility and decision-making.
- Developed Sprint Capacity Planning dashboards with workload balancing and role-based availability calculations using Angular Material (Mat-table) and dynamic UI components.
- Engineered a Worklog/Timesheet module featuring Quick Log functionality, task-optional logging, and automated meeting imports using reactive and template-driven forms with custom validations. Created responsive Timesheet History reports (sprint-wise and date-wise) using Angular Material, Bootstrap, Flexbox, and CSS Grid with SCSS theming for consistent branding.
- Integrated task, story, epic, and goal management features into the PMIS ecosystem, enabling end-to-end sprint tracking and reporting.

Claim Assist – Insurance Domain (US Clients)

Designed and implemented complete Claim Lifecycle Management system (Intake to Closure). - Developed business validation rules for policy coverage verification and claim approval workflows. - Built role-based dashboards for Adjusters, Reviewers, and Administrators. - Developed Python-based REST APIs to extract and process policy declaration page data. - Implemented AI-driven Guidance PDF generation based on Safeco and Liberty policy documents. - Designed structured logging framework for API requests, AI outputs, and exception monitoring. - Optimized database indexing strategies to improve claim processing efficiency. - Provided production support and resolved UAT and live environment issues.

Software Developer

Betelgeuse Technologies, Chennai Aug 2022 – Nov 2023

Singlebag – Multi-Vendor E-Commerce Platform Designed and Developed scalable multi-vendor marketplace platform with vendor onboarding and catalog management. - Implemented complete Order Lifecycle Management including payments, shipment tracking, returns, and refunds. - Built commission calculation engine and automated vendor payout system. - Integrated secure payment gateways with real-time transaction validation. - Designed admin dashboards for vendor analytics, revenue tracking, and reporting. - Implemented RBAC-based authentication for Admin, Vendor, and Customer roles.

Full Stack Developer
Q Ads, Karaikudi Sep 2020 – Jul 2022

E-Commerce & Business Applications

Designed and Developed scalable E-Commerce platforms using Laravel and WordPress (WooCommerce). - Implemented product management, pricing rules, cart systems, and checkout workflows. - Integrated payment gateways including Razorpay, Stripe, and PayPal. - Developed inventory tracking system with automated alerts and invoice generation. - Designed admin dashboards with revenue analytics and customer insights. - Built RESTful APIs for mobile applications and third-party integrations. - Designed and developed Billing & Accounting Software module with invoice management.

Team Lead cum Full Stack Developer
OCTS, Karaikudi Jun 2018 – Aug 2020

Medical Consultation & Telehealth Platform

Designed and developed secure Telemedicine Platform serving Singapore and US clients. - Built appointment scheduling, doctor availability, and consultation tracking modules. - Implemented WebRTC-based real-time video consultation with encrypted communication. - Developed role-based dashboards for doctors and patients. - Integrated secure online payment systems for consultation billing. - Developed Python-based chatbot for symptom pre-screening. - Optimized backend APIs to handle concurrent consultations efficiently.

EDUCATION

M.Sc. Information Technology - Alagappa University – 2018

Bachelor of Computer Applications - Alagappa University – 2016

Diploma in Computer Science Engineering - Cochin Technical College – 2013
